# Budget Message

By

GOVERNOR EARL WARREN

1952-1953 Budget

*To the Senate and Assembly of the State Legislature of California:*

I again welcome you to Sacramento for the Budget Session, and in accordance with Section 34, Article IV of the Constitution I submit to you the budget for our State for the Fiscal Year ending June 30, 1953.

This is the first session at which all of us have been housed in the new Capitol addition, and I trust that all of you will at long last be able to enjoy adequate facilities for the performance of your very important duties. It has been a matter of wonderment to me for many years how the Legislature could function in its totally inadequate and obsolete quarters. I want to say to you also that my staff and I are pleased with our new quarters and that we believe the greatly improved facilities will enable us to discharge our responsibilities to the people better than heretofore.

At the outset I report to you that our State is in a sound financial condition. No new or added taxes are required. The present rates will meet the budget expenditures and leave us with an estimated General Fund surplus of approximately \$70,000,000 on June 30, 1953, after financing the budget as herein proposed. This is substantially greater than we had reason to believe it would be when I submitted our budget for the current fiscal year, the reason for this being our estimates of revenue in last year's budget were proved to be conservative because we, as did other forecasters, failed to anticipate the full extent of scare buying and other forces related to the defense program which inflated

sales volume, prices and income. This budget contains a thorough discussion of the revenue estimates for the coming fiscal year and the assumptions on which they are based. We have used every means at our command to develop reliable and realistic estimates. However, these are uncertain times and any major unforeseen development in world affairs could make a substantial change in either direction in our revenue yield.

The budget for the next fiscal year which I submit to you is one of minimum requirements to carry out policies and functions already established by the Legislature. In the belief that the Legislature and the people in providing for annual budget sessions, intended them for the purpose of facilitating the preparation of budgets and not for changing policies greatly except in general sessions, we have endeavored in the presentation of this budget to follow your policies as established in the 1951 Session. With the exception of the instances which I will in a moment enumerate, this has been done explicitly. Any other increase is largely a matter of meeting the greater costs occasioned by the continued growth of the State and the advances in price and wage levels. It is significant for all of us to bear in mind that according to the estimates of the Census Bureau, our State has grown by 450,000 persons in the past year, 300,000 by in-migration and 150,000 by increase of births over deaths.

The expenditures in this budget are estimated at \$1,185,397,270 for the fiscal year, an increase of \$82,063,743 or 7.4 percent over the current fiscal year. Of this increase, \$34,500,000, or 42.2 percent, will go to local governments in the form of larger payments for support of public schools, and \$4,600,000 or 5.5 percent for other local subventions. \$5,902,000, or 7.2 percent represents the net increase in expenditures for capital outlay, and \$37,033,000, or 45.1 percent will be used for state operations. The latter sum includes \$12,550,000 for increased salaries of state employees, in accordance with Personnel Board recommendations, \$5,506,000 for the University, state colleges and other educational activities, \$3,290,000 for an improvement in the level of care at mental hospitals and homes, \$2,518,000 for public works and highway maintenance, and \$2,038,000 for better traffic law enforcement by the Highway Patrol.

## STATE OPERATIONS

Budget recommendations for the operation of the departments of the State Government have been carefully calculated to meet work loads. Every request has had a very thorough examination, and many have been sharply reduced before being presented to you. The details of the department operating requirements were released to your committees for their advance study one month ago. I follow this practice of so informing you in order that you may be thoroughly advised of the budget requests before the session is convened.

Your special attention is called to the following items which represent the major increases in this budget.

### *Mental Hygiene*

For several years we have been endeavoring to take our State out of the Asylum Age and establish it in the Hospital Age, where a high quality of medical care working toward rapid and complete cure is substituted for mere custodial care. Improvements in the quality of treatment authorized by the Legislature are now showing substantial results in earlier discharges and shorter periods of hospitalization. Six years ago the average length of time patients remained in our state hospitals for serious mental illnesses was 6.6 months. At the present time, the average length of such hospitalization is 4.5 months. If these advances had not been made we would now have one-third more patients in our state hospitals or an addition of 13,000 to the total of 40,000. This budget recommends funds for modest augmentation of medical, nursing and rehabilitation staffs so that still greater progress can be made.

### *Highway Patrol*

Accidents continue to take a horrible toll on our highways in both lives and property. Last year 3,411 of our citizens were killed; 2,420 of these lost their lives on rural highways. In addition, 95,000 people were injured, many thousands of them very badly injured. We are attempting to meet this problem in every possible way—through public safety programs, by driver education, by assigning additional patrolmen within our limited means to the most dangerous areas and by sending flying squadrons into places of extreme traffic density. We have received citations from national safety organizations for good highway engineering practices, enlightened

enforcement methods and for active safety programs. Our Highway Patrol is doing its best, but all of these things are not enough. Traffic fatalities increased 15.6 percent on our rural highways last year. The fact is the Patrol is of necessity spread too thinly. We do not have enough officers to man our highways. The State must have a more adequate patrol force, and the reasons for this statement are plain. In 1947 the Legislature provided the 40-hour week as of July 1, 1948, instead of the 48-hour week which had been in existence prior to 1948. This represented a reduction of one-sixth of the patrolmen available for duty on the highways. Since that time the small increases in personnel authorized by the Legislature have done little more than compensate for that loss. To be specific, the increase is but 5 percent. On the other hand, the number of automobiles on our highways since 1947 has increased by 1,433,000 or 36 percent. Since that same date, the annual number of accidents investigated by the Patrol has increased 82 percent. The supervision over the additional traffic occasioned by those 1,433,000 automobiles and the investigation of this increased number of accidents have reduced the number of officers actually patrolling the highways to the danger point in practically every county of the State. It is a proven fact that the number of accidents on any highway depend very largely upon the number of highway patrolmen who patrol it. I am therefore again recommending to you an increase in the strength of the Highway Patrol with a very earnest plea so that there may be more effective traffic law enforcement. Without this we cannot hope to substantially reduce the appalling number of traffic deaths. The 232 officers recommended in the budget represent the equivalent of 24 cents annually for each registered vehicle. This is indeed a small cost for the added protection it will buy for every man, woman and child in California.

#### *University of California and State Colleges*

In recent years you have authorized new state colleges at Los Angeles, Long Beach, and Sacramento, new campuses of the University of California at Santa Barbara and Riverside, and expanded activities at various of its other campuses. These expansions in the facilities for higher education have been only partly in operation in the immediate past while awaiting construction of buildings. An increase of more than \$5 million will be required for the more nearly complete operation of these institutions in the coming year.

### *Water Resources*

An appropriation of \$800,000 is proposed for preliminary plans and surveys on the Feather River Project which you authorized at the 1951 Session. This is a large and important project. If it is to become a reality in time to help many parts of our State which are badly in need of water, there should be no delay in making the surveys and preparing the preliminary plans for its realization. There is no more basic problem to be solved in California than the conservation of water and I again urge upon you the great importance of early action on this project.

### *Price and Pay Increases*

Provision has been made in this budget to meet further increases in prices, particularly for the larger items of food and clothing in the state institutions. A lump sum is recommended for allocation to the various institutions and departments supported by the General Fund if and when actual advances in prices occur. It may be interesting to point out that in our many state institutions we have 56,167 people who must be clothed and fed every day of the year. This means that in a year the State serves 61,500,000 meals, and an increase of one cent per meal would mean an additional cost of \$615,000 per year. Provision is also made for price advances in the estimated cost of highway maintenance and other activities financed from special funds.

As you know, the State Personnel Board is required by law to recommend salaries comparable to those paid in private industry and by other public agencies. The board has made its annual report and has recommended that funds be made available to allow an increase in the pay of state employees of approximately 5 percent in the fiscal year, with some further allowance for special equity adjustments including a special increase for employees caring for mental cases. The cost of this recommendation, including increases already authorized but not allocated, amounts to \$14,200,000 in the next fiscal year. A proposed salary adjustment item in conformity with the Personnel Board's recommendation is included in the budget.

The requirements for the functions above enumerated and for the price and pay increases account for the greater part of the increase in the portion of the budget dealing with the operating expenses of the State Government.

## CAPITAL OUTLAY

Of necessity the capital outlay items in this budget represent a very substantial amount of money. Of the \$222 million recommended, the sum of \$107 million is for highways, \$35 million is for education—\$17 million for the University, \$17 million for the state colleges, and \$1 million for other educational institutions. \$22 million is for mental hygiene, \$19 million for corrections, \$8 million for natural resources, \$5 million for office space, and \$24 million for miscellaneous buildings and a fund to meet the increased prices. These amounts represent projects for which there is an absolute and immediate need. It is a program which can be gotten under way within the fiscal year. We believe that national defense will have advanced to a point where materials may be available for them. Delay in beginning this work will inevitably mean that the State has failed to meet its obligation largely in the care, treatment, and education of thousands of its citizens. Except for the projects which were deferred by action in the 1951 Session, the postwar building program for which money was saved between 1943 and 1946, is practically all either completed or under contract. It has relieved some of the worst situations of overcrowding and hazardous housing, but there is still a long way to go to meet our building requirements. It must be remembered that since 1946 our State has increased in population by another 2,000,000 people. There are still hundreds of juvenile delinquents being held in local jails because of lack of space for them in the State's youth facilities. There is still a long waiting list of children—thousands of them—requiring care and treatment in state homes for the mentally defective. There is still much more to do at the new state colleges and the new campuses and graduate schools of the University. Our state hospitals for the mentally ill are still overcrowded, and we now have over 12,000 prisoners in our penitentiaries. We cannot stop building so long as our population is increasing at the rate of 450,000 each year, and particularly after we have been slowed down by defense programs.

## LOCAL ASSISTANCE

More than half the budget—\$625,000,000—comes under the general heading of local assistance.

### *Public Schools*

The largest item is the State's contribution to the support of public schools, which will amount to more than \$290,800,000 under existing law, an increase of more than \$22,500,000 over the current year. This is explained largely by the fact that there are in our public schools this year 144,000 more children than last year. In addition to the above sum, I have included \$12 million for the Equalization Fund of the General School Fund to assist those school districts which, in spite of the efforts of the State in the past to assist them with their special financial problems, find themselves distressed by the inflation which affects all of us. In 1946 the voters of California approved a constitutional amendment increasing the State's support for public schools to a minimum of \$120 per unit of attendance. Since that time the Legislature has on several occasions augmented this minimum. The definition of average daily attendance has been liberalized to include absences due to verified illness. Payments for the excess cost of educating physically handicapped children have been increased materially, and provision has been made for the education of the mentally retarded. Apportionments have been placed on a current year basis, thus correcting an inequity and relieving pressure in the financial operation of growing school districts. Special provision has been made for greater state assistance in districts with low assessed valuations and for small high schools. State payments toward the cost of transportation of school children have been increased and special incentive has been provided for the unification of schools. The State has guaranteed the interest and redemption payments on school building bonds for distressed districts to the extent of \$250,000,000. The State has granted \$55 million outright to the most distressed districts of our State for building purposes. Contributions for teachers' retirement have been liberalized. All told, the State, in addition to the grants made, and bond redemption payments assumed, has provided at least \$50 million annually for support of public school activities over and above the constitutional minimum since 1946. This is an impressive record, but it does not tell the full story because in 1946-47 our

budget for the public schools was \$113 million. Now, because of growth and further liberalization by the Legislature, our current budget for the same purpose is \$290 million. I am of the opinion, however, that it would be decidedly in the interests of better education to increase the Equalization Fund by \$12 million to assist the poorer districts.

Many of these districts, also, in spite of the help the State has heretofore afforded them, are still in need of additional school buildings after reaching the statutory limits in their tax rates and bonded indebtedness. The funds from the bond issue have been exhausted and it is my belief that another such bond issue should be submitted to the people in the November election. If the Legislature desires to continue the policy of assisting necessitous school districts in this manner and submits such a bond issue, I recommend that \$40 million be loaned to the districts pending the vote on the bond issue and providing for repayment therefrom or in the event that the bond issue should fail, from the funds of the school district on the same terms as the original bond issue for that purpose. Since our State now has a sizeable indebtedness because of this obligation, I recommend that when the \$40 million is repaid, it be placed in a special fund for amortization of the State's obligation under these bond issues. It is sound business, and would accomplish the same purpose as we accomplished in 1943 and 1945 when you completely amortized the entire outstanding bonded indebtedness of the State.

### *Social Welfare*

The State's share of aid to the aged, the blind, and needy children, while amounting to the very substantial sum of \$151 million, is showing a smaller rate of increase than in previous years, due primarily to better employment opportunities.

### *Shared Revenues*

Revenues from the automobile "in lieu" tax, gasoline tax, liquor licenses, and other shared taxes which the State collects and pays over to the counties and cities will amount to more than \$148 million.

## VETERANS FARM AND HOME LOAN PROGRAM

Due to accelerated activity in home purchases under the veterans farm and home loan program, the money from the last bond issue of \$100 million for that purpose has been exhausted. Unless some provision is made by the State to provide immediate additional funds for that purpose, no homes for veterans can be financed for a period of 10 months. There are still many veterans who need and are entitled to this help from the State. Many of these are wounded veterans from Korea. It is estimated by the Department of Veterans Affairs that it will be necessary to finance homes and farms to the extent of \$5,500,000 per month as has been the case in recent months. I therefore recommend that we lend to the Department of Veterans Affairs for this purpose either from surplus or from such other funds as may be available the sum of \$55 million to be repaid either from the bond issue to be voted on next November, or in such other manner as the Legislature may prescribe.

## FISCAL POLICIES

As I stated to you at the outset, the finances of our State are in excellent condition. The budget is in balance, as it has been every year since 1943. We have amortized our general bonded indebtedness that existed prior to that time, and with the exception of our obligation of approximately one-third of the school bond issue of \$250 million, we have no outstanding debt.

In 1947 you set aside the so-called "Rainy Day Fund" as a reserve for revenue deficiency. In the last 10 years, taxes have not been raised in California and for six of those years, taxes were decreased on an average of 15 percent, representing a saving to the people of approximately \$560 million. At the end of this fiscal year we will have an estimated surplus of \$70 million, after making provision for financing this budget. This is a fiscal record of which the Legislature may well be proud.

If it were reasonably safe to do so, I would again recommend to you that we reduce taxes once more, but I am of the opinion that we cannot do so with safety. Our revenues come from taxes measured by income and sales. The yields have increased with the recent expansion in business and incomes. The heavy wave of buying which took place after the outbreak of the Korean War greatly

increased receipts from the sales tax. Defense work and the general high level of prices, wages, and farm and industrial income, have resulted in revenues substantially in excess of previous years and of the estimates made in last year's budget.

A great part of our economy is geared to defense expenditures. We have no assurance that the present high level of our tax yields will continue. On the contrary, there is good reason to expect declines as defense spending begins to taper off. This is the time for careful planning of fiscal affairs. While a General Fund surplus of \$70 million at the end of the next fiscal year is forecast, in a broader sense, the State does not have a surplus so long as it has outstanding debt greater than that amount. To be fully on a pay-as-you-go basis, the State should set aside a sinking fund equal to its proportionate share of the school bond obligation. Substantial installments should be paid into such a sinking fund until the State's share of this obligation is fully funded.

We cannot avoid, even with our most careful economies, an increase in the state budget in the years ahead. The combined effects of the great postwar increase in birthrate and heavy in-migration is really just beginning to have its influence on school attendance. As this wave advances through the elementary and secondary schools and then through our colleges and university, our annual outlays for schools and higher education will inevitably increase by many millions, even if there is no change in the unit costs. Our best estimate is that the increase will be \$39 million in 1954-55 Fiscal Year over this year.

Welfare expenditures during these periods of full employment have not increased as much as in previous years. Curtailment in defense activities will cause readjustments in the labor force which will make it more difficult for aged and handicapped to obtain employment, and increased welfare costs are sure to result. This would add still more millions to our budget.

More money will be needed to finance the State's share of the flood control projects which have been authorized.

The purchasing power of the dollar in public construction is diminishing year by year. In fact, we now obtain for our dollar only 37 cents of construction as compared with one hundred cents of construction in 1939. In other words, the approximately \$100 million construction program recommended in this budget will produce only \$37 million dollars of construction as compared with

12 years ago. It is also worth remembering in this connection that in a tax reduction program comparable to that we had between 1943 and 1948, the Federal Government under present tax schedules would automatically take \$38 million out of the \$109 million of the state tax reduction to our citizens.

The primary responsibility of those of us who are charged with the administration of our state affairs is to maintain a solvent government. No matter what other virtues government might have, if it is not solvent, it cannot be good government. If we were to overestimate our revenues of the future, or underestimate our expenses in a fluctuating economy such as we have at the present time, we might, by giving slight temporary relief, be the cause of permanently injuring the credit of our State and the services it renders to the people. I urge you in the interest of stability to abide by the fiscal policies which you established last year as we are doing in all other things, in the hope that when the Legislature meets next January, conditions will be more stable and the road ahead of us will be more clearly discernable.

Finally, may I remind you that the surplus we are dealing with was accumulated over prior years, with most of it credited to the Fiscal Year 1950-51 as a result of the scare buying and defense expenditures occasioned by the Korean War. Only twelve million dollars of it can be credited to the current fiscal year. In no single year since World War II have we ever accumulated a sum approaching \$109 million in surplus and if we should reduce our income by that amount, it is more than possible that we would end the year with a deficit.

I offer you my wholehearted cooperation in your consideration of this budget.

Respectfully submitted,

  
Governor

March 3, 1952

# Letter of Transmittal

HONORABLE EARL WARREN, *Governor of California*  
*State Capitol, Sacramento, California*

DEAR GOVERNOR WARREN: Herewith transmitted is the state budget document for the fiscal year beginning July 1, 1952, and ending June 30, 1953, prepared in strict compliance with your policy of holding expenditures to minimum requirements for fully justified needs. State operations are on the basis of continuing the program approved for the present year, with adjustments for increased prices and wages, growing population, and current work load conditions.

The capital outlay portion of this budget is comprised of badly needed projects which should be undertaken without further delay.

Several changes have been made in the budget summary statements in the interest of a clearer and more concise accounting of fiscal operations. An analysis of expenditure requirements has been added, and the explanation of the revenue estimates has been revised and expanded. The increase in General Fund tax receipts and decrease in expenditures during 1950-51 and in the current year, which resulted in a substantial revision of the estimated state surplus, are fully explained.

I acknowledge here the splendid cooperation received from the directors of other departments and the excellent work of my own staff in the preparation of the budget.

Respectfully yours,

  
Director of Finance

March 3, 1952

# Summary Statements

---

Schedule 1. General Budget Summary.

Schedule 1-A. Reconciliation of General Fund Accumulated Surplus as of June 30, 1952, as Estimated in the 1951-52 Budget with the Amount Estimated in the 1952-53 Budget.

## Explanation of Budget Revenue Estimates

Schedule 2. Comparative Statement of Revenues for the Fiscal Years 1950-51, 1951-52 and 1952-53.

## Analysis of Expenditure Requirements

Schedule 3. Comparative Statement of Expenditures by Character, Function, Organization Unit and Fund for the Fiscal Years 1950-51, 1951-52 and 1952-53.

Schedule 4. General Fund, Statement of Financial Condition, June 30, 1951.

Schedule 5. Summary of Fund Condition by Funds as of June 30, 1951, June 30, 1952, and June 30, 1953.

Schedule 6. Statement of Balances in Other Treasury Funds not Included in Budget Totals as of June 30, 1951, June 30, 1952, and June 30, 1953.

Schedule 7. Comparative Statement of Contributions and Expenditures of Federal Aid Granted to the State of California for the Fiscal Years 1950-51, 1951-52, and 1952-53.

Schedule 8. Schedule of Proposed Expenditures by Method of Appropriation for the Fiscal Year 1952-53.

Schedule 9. Comparative Statement of Fixed Charges and Controllable Expenditures for the Fiscal Years 1950-51, 1951-52 and 1952-53.

Schedule 10. Reconciliation of the 1951-52 Budget with the Estimated Expenditures for 1951-52 as Presented in the 1952-53 Budget.

Schedule 11. Statement of Bonded Debt of the State of California as of November 30, 1951.

<sup>a</sup> The budget totals do not include revenues or expenditures of federal funds, utility funds, working capital and revolving funds, bond funds, interest redemption and sinking funds, trust and agency funds, and assessment funds. See Schedule 6 for summary of receipts and disbursement of these funds.

<sup>b</sup> See Schedule 1-A on following page for reconciliation of surplus with amount reported in the previous budget.

# Schedule 1-A

## RECONCILIATION OF GENERAL FUND ACCUMULATED SURPLUS AS OF JUNE 30, 1952 AS ESTIMATED IN THE 1951-52 BUDGET WITH THE AMOUNT ESTIMATED IN THE 1952-53 BUDGET

ACCUMULATED SURPLUS, JUNE 30, 1952, as estimated in the 1951-52 Budget.....		\$20,736,277
Effect of Legislative Action on the Budget and Re-estimate of Revenues:		
Revised estimate of revenues for 1950-51.....	\$665,306,312	
1951 Budget estimates.....	620,266,892	
Estimated additional revenues for 1950-51.....		+ 45,039,420
Funds were provided for price increases in cost of construction and for additional minor construction.....	\$19,000,000	
Provision was made for civil defense.....	12,000,000	
Additional funds were provided for school apportionments.....	13,475,000	
Action to extend the availability of construction appropriations in the Postwar Employment Reserve Fund precluded the reversion and transfer to the General Fund.....	4,044,693	
Other changes were made in authorized expenditures.....	3,472,124	—51,991,817
ACCUMULATED SURPLUS, after giving effect to revised estimate of revenues and legislative action (as reported August 16, 1951).....		\$13,783,880
Effect of Revised Estimates of Revenues and Expenditures as Presented in the 1952-53 Budget:		
Increase in Estimated Revenues:		
For the 1950-51 Fiscal Year:		
1952 Budget estimates.....	\$672,064,783	
Previous estimates.....	665,306,312	\$6,758,471
For the 1951-52 Fiscal Year:		
1952 Budget estimates.....	\$712,382,021	
1951 Budget estimates.....	641,033,620	71,348,401
TOTAL INCREASE IN REVENUE ESTIMATES.....		+ \$78,106,872
Decrease in estimated expenditures for the 1950-51 and 1951-52 Fiscal Years:		
Civil defense program delayed until the 1952-53 Fiscal Year.....	\$4,018,139	
Old-age security, decrease in estimated cost.....	12,426,956	
Aid to needy children, decrease in estimated cost.....	3,686,006	
Savings in all other authorized expenditures.....	20,336,367	
TOTAL DECREASE IN ESTIMATED EXPENDITURES.....		+ 40,467,468
ACCUMULATED SURPLUS, JUNE 30, 1952, as estimated in the 1952-53 Budget.....		\$132,358,220

# Budget Revenue Estimates

Under present conditions it is particularly important to preface any forecast of state revenues with an inventory of the many uncertainties in the economic outlook. Chief among these are the questions of war or truce in Korea, international friction, and the unrest in Asia, the Middle East and North Africa. Others include the national policy in matters of defense and fiscal affairs, use and effectiveness of economic controls, ability of the Nation's industrial machine to meet the demands for military and civilian goods, price trends, and consumer reactions in an abnormal market. These and many others are factors in an equation which will determine the State's revenue during the next 18 months. Conditions are changing daily and will continue to change. Since future developments cannot be known at this time, assumptions must be made on the basis of apparent trends and prevailing opinion. These assumptions are outlined in the material which follows.

State revenues are estimated to reach \$1,102,470,083 during the 1952-53 Fiscal Year. This represents an increase of 4.2 percent over the revised total anticipated in the current year, and 10.9 percent more than was received during 1950-51. Of this total, \$743,294,513 will accrue to the State General Fund and \$359,175,570 will go to the various special funds and reserves. Each of these amounts is above the revised figure for the year in progress and is considerably greater than actual receipts during the year which ended June 30, 1951. Comparative totals are shown in the following table:

## COMPARATIVE STATE REVENUES (In Thousands of Dollars)

	<i>Actual 1950-51</i>	<i>Estimated 1951-52</i>	<i>Estimated 1952-53</i>
General Fund:			
Sales and Use Taxes.....	\$399,243	\$410,100	\$427,100
Bank and Corporation			
Franchise Tax .....	98,245	115,250	118,500
Personal Income Tax.....	75,891	88,100	91,500
Insurance Tax .....	23,043	25,281	29,765
Inheritance and Gift			
Taxes .....	23,671	25,500	26,600
Alcoholic Beverage Taxes	19,890	18,745	19,740
Other Revenues .....	32,082	29,406	30,090
Total, General Fund...	\$672,065	\$712,382	\$743,295
Special Funds and Reserves:			
Motor Vehicle Fuel Taxes	\$149,907	\$160,121	\$168,021
Motor Vehicle Fees.....	125,061	133,776	140,035
Other Revenues .....	47,010	51,922	51,119
Totals, Special Funds...	\$321,978	\$345,819	\$359,175
Grand Totals, Revenue....	\$994,043	\$1,058,201	\$1,102,470

## Current Year Revenue

The estimate of revenue to be received during 1951-52 as shown in this budget represents a substantial revision over the amount forecast a year ago. Economic activity has been maintained at a higher level than was anticipated for this period when the original estimates were prepared in December of 1950. To some extent this development reflects the delay in the conversion from civilian goods to war materials and to some extent it is caused by the high proportion of defense contracts negotiated in California.

The \$1,058,201,000 total revenue now estimated for the current year compares with \$969,681,000 shown in the previous budget, an increase of \$88,520,000, or 9.1 percent. Special fund receipts have been changed only

moderately, but General Fund revenues have been increased from the original estimate of \$641 million a year ago to \$712 million as now revised for the current year. A comparison of the original and revised estimates of General Fund revenue from principal sources follows:

	<i>Estimated Revenue, 1951-52 (In Millions)</i>			
	<i>Original</i>	<i>Revised</i>	<i>Increase</i>	<i>Percent Increase</i>
Sales and Use Taxes...	\$376.2	\$410.1	\$33.9	9.0
Bank and Corporation				
Franchise .....	99.2	115.3	16.1	16.2
Personal Income .....	71.5	88.1	16.6	23.2
Inheritance and Gift ..	22.7	25.5	2.8	12.3
Alcoholic Beverages ..	18.0	18.7	0.7	3.9
Insurance .....	25.1	25.3	0.2	0.8
All Other .....	28.3	29.4	1.1	3.9
Total .....	\$641.0	\$712.4	\$71.4	11.1

Most of the \$71 million increase in the estimate of General Fund revenue this year can be traced directly to the sales, bank and corporation franchise, and personal income tax yields. The forecasts of receipts from other sources appear to be well within an acceptable margin of error, especially in view of the fact that most of the difference arises from collections of the unpredictable inheritance and gift tax levies.

Four developments contribute largely to the increase in sales tax collections in the current year: (1) a high level of building activity; (2) continued availability of consumers' durable goods; (3) larger consumer incomes; and (4) higher price levels than anticipated. A year ago the volume of residential building in California during 1951 was expected to drop one-third below the record volume of 1950, as a result of credit controls and material shortages. Industrial, commercial, and public construction was expected to increase, but not sufficiently to offset the decline in residential activity. In contrast with this outlook, preliminary data on actual building last year indicate only a slight decrease in expenditures for new dwellings, more than offset by an increase in total volume of other construction.

Consumer durable goods, such as automobiles and household appliances, were assumed to become in short supply as materials were diverted to defense production. While production was reduced during the year, stocks in the hands of manufacturers and retailers proved ample to meet current demand, and taxable sales during the calendar year 1951 appear to be only slightly below the record established in 1950.

The aggregate income of California residents last year is now estimated at \$20.8 billion, against the forecast of \$19.8 billion.<sup>1</sup> Higher federal income taxes absorbed part of the increase, but consumer spending last year is now estimated at \$17.7 billion, compared with the forecast of \$17.1 billion in the budget revenue statement last year.<sup>2</sup> Judging from experience, this \$600,000,000 increase would normally generate approximately \$14,000,000 of sales tax revenue.

Running through these other differences is the fact that the inflation spiral touched off by the Korean War continued through January, 1951, and rising prices

<sup>1</sup> State Budget, 1951-52, page A-21.

<sup>2</sup> State Budget, 1951-52, page A-22.

characterized most of last year. Retail prices averaged 7.4 percent above the September, 1950, benchmark. This is almost half again the rate of increase used in the budget revenue projections.<sup>3</sup>

### Higher Incomes

Reversal of the down trend in corporate profits between 1949 and 1950 was unexpectedly sharp. For the Nation as a whole, corporate earnings rose nearly 50 percent, and the gain in taxable earnings of corporations doing business in California was even larger. Against an estimated increase of 25 percent over 1949, returns filed with the State last year disclosed an actual increase of 54 percent. Since the estimate of 1950 earnings necessarily became the benchmark for forecasting 1951, actual receipts from this source are now expected to exceed the previous estimate for the current fiscal year by approximately 16 percent.

Changes in the composition of income received by individuals have an important bearing upon state revenues because of the graduated tax rates on personal income. To a great extent, these changes are not known until the returns are filed, tabulated, and analyzed—more than a year after the revenue estimate must be completed. Differences in taxable income below \$5,000 generate tax at a 1 percent rate, whereas changes in brackets above \$25,000 produce tax at a 6 percent rate. Property income, such as dividends and rents, showed a particularly large increase during 1950, and this type of income is concentrated in the upper brackets where rates are higher. Against an estimated increase of 5 percent in the tax to be paid on account of property income and 67 percent in the tax generated by capital gains during 1950 under the projections made last year, a preliminary analysis of tax returns shows an improvement of 40 percent in the tax on property income and 97 percent for capital gains. These two factors account for most of the \$16.6 million added to the revised estimate of personal income tax for the current fiscal year.

### THE 1952 OUTLOOK

International developments will determine basic economic trends in this country during 1952, just as they have in the last two years. Uncertainty and the fomenting of world unrest are twin instruments of communist foreign policy. For this reason it is almost futile to speculate on the course of world affairs, and it is impossible to predict developments with any degree of assurance. Two conclusions appear to be warranted, however: (1) the Korean War is but one manifestation of the deep conflict between democracy and communism; (2) national self-interest demands a vast rearmament program which must be prosecuted along present plans for at least two more years, despite the possibility of a seeming reversal in communist policy, truce agreements, or a peace offensive.

National defense will provide a powerful sustaining force in the Nation's economy, not only because of the sums involved, but also because of the program's urgency and inflexibility. According to the federal budget, cash payments for defense and related functions during 1952-53 will be \$62 billion, compared with \$47 billion in the current year and \$25 billion in fiscal 1951. For the most part, these expenditures are not

contingent upon budget approval. They represent payments on obligations already incurred. Nearly one-fifth of the national product will be directed toward accomplishing this goal. Total federal expenditures in the next year are estimated to reach \$87.2 billion, while cash receipts from the public are expected to be \$76.8 billion.<sup>4</sup> Unless the \$10 billion deficiency is narrowed by heavier tax levies or noninflationary borrowing, the outpouring of defense funds, coupled with a reduction in civilian goods, will constitute a potentially powerful inflationary force in the economy.

In addition to providing an element of strength which might otherwise be absent, defense production will have a far-reaching effect upon many segments of the economy. Productive capacity is being expanded—particularly in the metal working industries, electric power generation, chemical production, petroleum refining, and the manufacturing of aircraft. Employment in defense and related activities will require the addition of 1½ million workers to the labor force, while a million others are expected to move into defense work from less essential lines.<sup>5</sup> A relatively tight labor market undoubtedly will result in some upgrading of skills, higher wage rates, and possibly an increase in the hours of work per week. Metal shortages have already required drastic limitations upon the production of motor vehicles, radios, television sets, stoves, and household appliances. Controls have been imposed on residential and commercial building in order to free both supplies and labor for the task of industrial expansion. Production goals in agriculture have been established moderately above the levels of last year and support prices for agricultural products in general will be high. This general pattern, with some tapering off in plant expansion, is likely to prevail throughout the current year and well into 1953.

With increased employment, higher wage rates, and capacity output in almost every segment of the economy, the national product is expected to reach a new peak in 1952. A majority of the forecasts place the gross national production at, or near, \$350 billion, compared with \$326.8 billion in 1951. Personal incomes are estimated to increase from \$251 billion in the year just ended to \$267 billion in 1952. A part of this gain will be absorbed by higher taxes, but income after taxes will also advance appreciably—from approximately \$223 billion last year to \$235 billion in the current period.

At any time an outpouring of money unaccompanied by a parallel increase in consumer goods is inflationary. It adds to the volume of spendable income without, at the same time, expanding the volume of merchandise available for consumption. This pattern is particularly characteristic of a war period, when money is paid out for the production of material which cannot satisfy consumer needs. Unless the excess money is recaptured in the form of taxes, the economic stage is set for inflation, and neither artificial controls nor savings will have much long-term effect. Although increased productivity in such non-durable lines as textiles, apparel, and food may absorb a part of the excess purchasing power during 1952, and personal savings may continue at the abnormally high rate registered in most of last

<sup>4</sup> See Special Analysis A, Budget of the United States Government, Fiscal Year Ending June 30, 1953, page 1143.

<sup>5</sup> Council of Economic Advisors, Annual Economic Review, 1952. Economic Report of the President, 1952, page 106.

<sup>3</sup> *Ibid.*

year, underlying conditions are basically inflationary. Prices may be relatively stable in the first quarter of 1952, as federal income tax payments absorb purchasing power. Later, however, the full effect of deficit spending will be felt, and opinion is heavily on the side of further moderate price increases during the advanced phases of the defense build-up.

In general, economic activity in California should follow the national pattern. This State received 13 percent of the defense contracts negotiated through mid-1951, and although this share may decline as new defense plant facilities are completed in other parts of the Nation, California will continue to produce a disproportionate part of the Country's vital aircraft needs. While this State has not participated in the expansion of heavy industry, there has been great activity in machinery and equipment, electrical instruments, and in the network of subsidiary plants which supply parts and assemblies for the construction of today's extremely complex military planes.

Population growth during the budget period is expected to follow the trend of recent years. From a census total of 10,586,223 on April 1, 1950, the number of California residents increased to an estimated 11,100,000 on July 1, 1951. Projections to the corresponding July dates in 1952 and 1953 show totals of 11,460,000 and 11,800,000, respectively. Judged on the basis of partial data, natural increase (excess of births over deaths) in 1951 reached 152,000 as against a 145,000 level reported in the two previous years. Available indicators point to a continuing wave of new residents through migration from other areas.

### Economic Indexes

In order to have meaning, revenue estimates must be derived from a foundation of consistent economic data. This implies estimates or assumptions regarding such factors as national production and income, consumer expenditures and savings, price trends, and population growth. The most widely used, as well as the most convenient framework for these basic estimates, are the national economic accounts developed by the United States Department of Commerce. In formulating the estimates contained in the adjacent table, advice has been obtained from national economists and from analysts familiar with California conditions. Amounts shown are in general agreement with predictions made elsewhere regarding probable trends in 1952. *They rest on two fundamental assumptions: (1) absence of war or widespread police action in which the United States may be an active participant; and (2) prosecution of the defense program according to present schedule.* A subordinate assumption is made that federal tax rates will not be increased during the budget period.

### GENERAL FUND REVENUE

Slightly more than two-thirds of the State's total revenue during 1952-53 will accrue to the General Fund, according to the estimates presented in this budget. The \$743,295,000 anticipated for support of general activities represents an increase of \$30,913,000, or 4.3 percent, over the revised forecasts for the current year and \$71,231,000 more than was received in the period ending June 30, 1951. Gains over the current year are expected for all principal sources. In only one respect are figures for the three years 1950-51 through

### ECONOMIC INDEXES

\* Spendable resources include allowances for change in liquid asset holdings of individuals such as money, bank accounts, and savings bonds, and change in short-term consumer credit. Amounts are estimated by the State Department of Finance.  
Source: Data for 1950 and 1951 compiled by federal and state agencies. 1952 data estimated by State Department of Finance, Division of Budgets and Accounts.

1952-53 not generally comparable: \$2,000,000 of horse-racing revenue formerly going to the General Fund has been diverted to special purposes, beginning in the current year.

Under California's tax structure more than 85 percent of the State's General Fund revenue is derived from three sources: the levy on sales of tangible personal property for consumption; the bank and corporation franchise tax measured by income; and the income tax on individuals. The close connection between economic conditions and yields from these sources has already been noted. Any increase or decline in retail trade is reflected in sales tax receipts within a period of four months at the most. Changes in corporate earnings affect tax collections within three months of the closing of corporate accounts. And fluctuations in personal income during any calendar year start to influence state revenues in the first few months of the succeeding year. In this relationship, the income of State Government is almost abreast of current economic conditions. There is little buoyancy to sustain the Treasury after a turn in the business cycle. Only in the case of taxes on inheritances, insurance companies and banks,

and in the auditing of tax returns does the receipt of revenue lag appreciably behind the taxable event.

State taxes in general are proportionate to economic activity. A given increase or decrease in trade, corporate income, or liquor sales, for example, produces a corresponding change in tax collections. Only one-sixth of the revenue is obtained from levies which employ a variation in rates as the status of a specific taxpayer changes. These include the personal income, inheritance, and gift taxes, and pari-mutuel racing fees.

### Sales Tax—\$427,100,000

Receipts from the sales and use taxes in the coming fiscal year are estimated to be \$427,100,000, compared with \$410,100,000 during the current period and \$399,243,093 in 1950-51. A comparison of these sums, however, does not disclose the changes anticipated in taxable transactions as non-durable goods remain in ample supply and consumer durables become short. Moreover, it must be noted that sales tax collections during 1950-51 were inflated materially by the two waves of scare buying which swept the Country after the outbreak of the Korean War—first in July and August of 1950 and again in January-February, 1951. Approximately \$20 million was added to the normal volume of sales tax by this rush on the part of consumers and industry to purchase goods in advance of anticipated scarcity. In some measure, the \$410 million sales tax estimated for the current year represents a reaction to the earlier excesses.

Two methods have been employed to estimate taxable sales of tangible personal property during the period covered by this budget.<sup>6</sup> One was based upon the average relationship between taxable sales and the estimated spendable income of civilians in California during the 16 years 1935 through 1950.<sup>7</sup> Based on this relationship, estimated civilian spendable resources of \$17.7 billion during 1952 should result in taxable sales of \$13.1 billion. Although the procedure relies on crude relationships, the average error, excluding war years, has been approximately \$175 million (equal to \$5,250,000 in tax), while the net error has been \$115 million (equal to \$3,450,000 in tax). Chief weaknesses are to be found in the fact that approximately 30 percent of the current tax is generated by building activity and sales of industrial equipment and supplies. Changes in these items may not be measured by changes in the volume of consumer spending.

The second method of estimation involves an analysis of sales in the 44 trade and industrial classifications reported by the State Board of Equalization. Where population and prices are important factors, taxable sales have been reduced to per capita amounts in dollars of constant value. Trends revealed by this procedure were projected through 1952 and the first quarter of the following year. Allowance was made for an increase

in the per capita consumption of non-durables and certain luxury items, for growth in population, and for a price increase of 5 percent from the 1951 average. With these data as a basis, dollar volume of sales in each group was projected for the new budget period. Where motor vehicle ownership appeared to be the determining factor, the same method was used by relating taxable sales to motor vehicle registrations. Taxable sales of industrial machinery and equipment have been estimated on the basis of advice obtained from leading establishments in the field regarding the probable volume of business activity, or on the basis of information obtained from trade journals.

Three principal deviations were made from this general technique: sales of building materials were estimated to fall 14 percent below the indicated total for 1951 (sharply reduced residential and commercial building, partially offset by somewhat larger industrial construction); a decline of one-third was taken in sales of household appliances; and unit sales of new motor vehicles were reduced 30 percent from 1951, in line with restricted vehicle production. The dollar volume of used vehicles, accessories, and parts was estimated to increase 12.6 percent, partly due to higher prices and partly to the fact that a larger number of vehicles will be in need of replacement parts. A summary of the estimate prepared by this method follows:

<i>Principal Products Sold</i>	<i>Taxable Sales (In Millions)</i>			<i>Percent change 1951-52</i>
	<i>1950</i>	<i>Est. 1951*</i>	<i>Est. 1952</i>	
Non-durable goods -----	\$4,953	\$5,485	\$6,039	+10.1
Consumer durables † ---	1,149	1,168	1,113	-4.7
Motor vehicles—new ---	1,300	1,104	865	-21.6
Motor vehicles—used, supplies, and parts---	1,289	1,464	1,649	+12.6
Building materials -----	1,511	1,631	1,400	-14.2
Producers' equipment and supplies † -----	1,951	2,332	2,450	+5.1
Unallocated -----	106	143	151	+5.6
<b>Total-----</b>	<b>\$12,259</b>	<b>\$13,327</b>	<b>\$13,667</b>	<b>+2.5</b>

\* Three quarters actual and one quarter estimated.

† Other than motor vehicles and building materials.

Since the possible errors in this method are large, due to inadequate information and mistakes in judgment, the estimate of total taxable sales during calendar 1952 was rounded to \$13.5 billion, representing a reasonable point between the results obtained under each of the two procedures. This compares with \$13.3 billion estimated for 1951 and \$12.3 billion in 1950. With allowance for somewhat greater supplies of durable goods and higher prices in the early months of 1953, self-assessed tax in 1952-53 was estimated at \$410,000,000. Audit assessments are expected to return \$15,800,000, while sales tax on refunds of gasoline tax should produce \$1,200,000. Permit fees are estimated at \$100,000.

### Franchise Tax—\$118,500,000

Revenue from the bank and corporation franchise tax will depend upon profits before federal income tax during the 1951 and 1952 calendar years. Approximately 58 percent of the tax liability incurred on last year's earnings will be paid before June 30, 1952, while 42 percent will fall into the 1952-53 Fiscal Year. Similarly, 58 percent of the tax incurred on 1952 operations will be received before June 30, 1953.

Bank and corporation franchise tax collections during 1952-53 are estimated at \$118,500,000, compared to \$115,250,000 in the current period and \$98,245,207

<sup>6</sup>In preparing revenue estimates, calendar year data are used almost exclusively in order to take full advantage of such related material as census reports, income payments, and other economic data. All estimates include assessments of additional tax, interest, and penalties as a result of the audit programs of tax administering agencies. Calendar year estimates are apportioned to fiscal years on the basis of ratios during recent years.

<sup>7</sup>The correlation equation: Taxable sales equal —.885 plus .788 times spendable resources. As used in this formula, spendable resources include civilian income less federal and state income taxes plus or minus the increase or decrease in short-term consumer credit, minus or plus the increase or decrease in liquid assets. Civilian income is used in order to avoid as much as possible of the distortion during the war years.

actually received in the year ending June 30, 1951. Each of these totals includes collections under the supplementary levy known as the corporation income tax.

Despite shortcomings of the sampling process indicated in the findings last year, it is the only satisfactory method of obtaining advance information on corporate profits. While a margin of error occurred in the 1950 sample, satisfactory results were obtained in the two previous years, and the sample now used has been completely revised and enlarged. Greater industrial coverage has been obtained and there is better representation of small firms. In taking the current sample, letters were sent to 577 banks and corporations operating in California, requesting an estimate of taxable earnings in 1951. Usable replies were received from 424 of these firms representing 46.7 percent of the tax base. On the basis of this information it is estimated that earnings subject to the state tax increased from \$2,655,000,000 in 1950 to \$2,705,000,000 last year—a gain of 2 percent. Since national data, which are still subject to revision, indicate a gain of 8 percent over 1950, the sample result may be somewhat low, but no sound basis exists for making a revision in the figure. Tax on this volume of earnings at the rate of 4 percent indicates a self-assessed tax of \$108,200,000 on returns to be filed in the calendar year 1952.

The dollar value of production in the Nation during the current year is expected to increase 7 percent. However, profit margins are likely to be reduced, and a proportionate gain in corporate earnings is unlikely. For this purpose, earnings of California companies have been estimated to advance 3.5 percent to reach a total of \$2,800,000,000, with a tax return of \$112,000,000 in 1953. Distribution of these two calendar year totals to fiscal years, with allowance for the additional tax on banks and financial corporations and audit assessments of \$3,800,000, results in the totals reported above.

### Personal Income Tax—\$91,500,000

Revenue from the personal income tax has been estimated by relating tax yields to income payments during the past five years and projecting these yields, basing them on estimated income payments for 1951 and 1952.

Analysis of taxable income by types show that receipts from the various sources, e.g., salaries and wages, business profits, dividends, interest, and capital gains, generally accrue to persons at different income levels and hence are taxed at different rates.<sup>8</sup> For this reason it was advisable to relate the tax attributable to income from a particular source to its counterpart in the income payment series. Other income payments, such as pensions and benefits received from social insurance, generally go to people with total income too small to affect the income tax base. The tax on capital gains, having no counterpart in the income payment series,

<sup>8</sup> Analysis of preliminary statistics for 1950 shows the following relative importance of each source in income payments, income reported for taxation, and the tax attributable to that type of income.

	1950 Civilian Income Payments	Taxable Income	Tax Assessed
Salaries and wages -----	63 %	59 %	34 %
Proprietors' income -----	17	21	27
Property income -----	12	15	27
Other income -----	8	5	12
Net capital gains -----	--	--	--
	100 %	100 %	100 %

must be estimated separately. Following the example of other taxing jurisdictions, the tax from this type of income has been related to changes in stock prices.

The following table presents the estimates of income payments upon which the forecast of personal income tax revenue has been based.

	Civilian Income (In Millions)		
	1950	1951	1952
Salaries and wages -----	\$11,514	\$13,522	\$14,525
Proprietors' income -----	3,122	3,282	3,400
Property income -----	2,206	2,317	2,335
Other income -----	1,407	1,215	1,215
Total -----	\$18,249	\$20,336	\$21,475

That part of the tax which can be attributed to net capital gain has been estimated to increase from \$8,850,000 paid last year, to \$10,000,000 for the current year, largely because of the high security price levels which prevailed during 1951. These markets have shown some weakness in the last few months, and consequently the tax to be derived from capital gains was reduced to \$7,500,000 for 1953.

Estimates from the various income sources have been combined with audit adjustments and converted to fiscal year collections. Revenue for 1952-53 is forecast at \$91,500,000, compared to \$88,100,000 estimated for 1951-52 and \$75,890,972 actually collected in 1950-51.

### Insurance Tax—\$29,765,000

Collections under the state tax on insurance premiums have shown a gradual increase over a period of several years, reflecting growth in business activity, higher values, increases in some premium rates, and population gains. The budget estimate of revenue from this source is based upon information obtained from a sample of 116 insurance companies accounting for 69 percent of the tax base. Past records show a high degree of reliability in these reports.

Premiums subject to the state tax increased 17.3 percent last year, to reach a total of \$1,312,000,000. The gross tax on this volume—to be assessed in 1952—will be \$30,830,000, and approximately \$200,000 will be received from ocean marine insurance profits. Deductions for local property taxes paid on principal business offices in California are estimated at \$1,265,000, leaving net receipts of \$29,765,000. Corresponding totals for the current year and for 1950-51 are \$25,280,860 and \$23,043,305, respectively.

Payment from the State Compensation Insurance Fund in lieu of tax is estimated at \$554,153 in 1952-53, compared to \$451,100 this year and \$403,318 in 1950-51.

### Inheritance and Gift Taxes—\$26,600,000

The hazards of estimating inheritance tax receipts are readily apparent from the nature of this levy. Amounts received by the State depend upon the number of deaths, the value of property formerly held by the decedents, the location of that property, the manner in which it is distributed among the heirs or to charity, and the time required to effect a settlement. A number of large estates are now in process of liquidation. However, inquiry has revealed that in each case bequests to charity or charitable foundations are likely to be large, and these amounts may not be subject to state tax. The estimates here presented are not predicated on large or unusual tax settlements during 1952-53 in the cases now pending.

Inheritance tax collections bear a general relationship to security prices. When stock quotations are high, tax receipts are likely to be relatively large. It can be reasoned, therefore, that improvement in security prices over the last three years should sustain a high tax yield. Receipts from the inheritance tax are now running at the average level of \$1,900,000 per month, and this amount was increased to slightly more than \$2,000,000 per month in projecting the estimate for next year—a total of \$25,000,000. Revenue in the current year is expected to be \$24,000,000, and actual receipts in 1950-51 were \$21,691,622.

Gift tax payments are forecast at \$1,600,000 in 1952-53, compared with \$1,500,000 in the current period and \$1,979,397 during the last completed fiscal year. In this instance, the reduction is entirely a concession to the fact that one large gift two years ago raised the 1950-51 total substantially above the sums recorded earlier.

### **Alcohol Beverage Taxes—\$19,740,000**

Estimates of revenue from the distilled spirits excise tax and the companion levies on beer and wine have been prepared entirely on the basis of apparent consumption *per adult* in the State's population. Apparent consumption of distilled spirits has varied widely during recent years, due to supply problems and to transient populations. During World War II the ratio rose to 3.06 gallons per adult, compared with 2.14 gallons before the war. Since 1946 the average has been 2.42, with 2.50 gallons recorded last year. This ratio has been increased to 2.52 in 1952 and 2.55 gallons in 1953, in projecting tax receipts for the current and ensuing fiscal years. Beer consumption has averaged 22.8 gallons per adult since the war. The ratio was 22.2 gallons last year and has been carried at 23.0 and 23.6 gallons in the current calendar year and 1953, respectively. Under legislation adopted in 1951, sale of beer on military posts is exempt from state tax. Wine consumption has shown little significant change. Utilization of dry wine last year amounted to .95 gallon per adult, sweet wine 1.73, and sparkling wine .05 gallon. The revenue estimates allow for a slight increase in the use of sweet and sparkling wines, and a fractional decline in dry varieties. Comparative collections are shown in the table below:

	<i>Actual</i> 1950-51	<i>Estimated</i> 1951-52	<i>Estimated</i> 1952-53
Distilled spirits.....	\$16,094,404	\$14,900,000	\$15,700,000
Beer and wine.....	3,795,650	3,845,000	4,040,000
Totals .....	\$19,890,054	\$18,745,000	\$19,740,000

### **Private Car Tax—\$1,095,000**

The number of railroad cars owned by companies other than railroads and operated in this State has shown a decline during the last two years, but the tax rate has increased. A reversal of both these trends is expected next year. Revenue from this tax, which is levied in lieu of local property taxes, is expected to reach \$1,095,000 next fiscal year, against a current total of \$1,088,700, and \$890,800 in 1950-51.

### **Other General Fund Revenues—\$28,440,360**

The principal item of miscellaneous income to the General Fund is interest on investments, which is expected to total \$8,067,649 next fiscal year. This rep-

resents a gain of approximately \$1.2 million over the current year, and \$300,000 more than in 1950-51. A total of \$2,662,750 will be transferred from motor vehicle license fees to meet highway bond interest and redemption. Horseracing fees will produce \$2,042,888 for general purposes, while \$15,650,573 will be received in the form of fees and other charges by operating departments of the State. The latter amount represents a slight decline from earlier years, chiefly as a result of a drop in college enrollments.

### **THE SPECIAL FUNDS <sup>9</sup>**

Approximately one-third of all state governmental revenues accrue to special funds, and by provision of the State Constitution or the statutes this money may be used only for specific purposes. The largest group of special fund levies are those in connection with the ownership and operation of motor vehicles—the fuel taxes, registration and weight fees, the motor vehicle license fee imposed in lieu of local property taxes on motor vehicles, the tax on gross receipts of companies transporting persons and property for hire over state highways, drivers' licenses, and other minor charges. In total, these are estimated to return \$308 million in 1952-53, or 86 percent of the special fund total.

The second largest source of special fund income is the license fee levied in connection with horseracing, measured chiefly by the volume of betting. This is followed by liquor license fees, collected by the State and returned to local governments for expenditure. Departmental revenues from special charges are estimated to be \$21.9 million. Of these, the largest contributions are those made by sportsmen for fishing and hunting licenses, amounting to \$5.4 million. Details on departmental revenues for special purposes are shown for the three years covered by this budget under the heading "Special Funds" in Schedule 2.

### **Almost 6,000,000 Vehicles in 1953**

Fee-paid registrations of cars, trucks, motorcycles, and trailers last year reached a total of 5,303,524 units. This represented a gain of 6.6 percent over the previous peak and 70 percent more than were on the highways at the end of World War II. Although production of new vehicles will be reduced sharply next year, the national output will be still large enough to provide this State with more than the 285,000 new cars sold here in 1948. In addition, registrations will be increased by migration, and by a draft upon the inventory of vehicles on used car lots. Controls over motor vehicle production are expected to be relaxed somewhat in 1953, which should bring a larger number of new units next year. For purposes of the budget estimates, fee-paid registrations of 5,600,000 are projected for 1952 and 5,895,000 by the end of 1953.

Current registration and weight fees were established in 1947, and averages have stabilized within a very narrow range during the last few years. Average fees of \$6.38 for cars and light trucks, \$35 for heavy

<sup>9</sup> Trust funds, such as contributions to the various retirement plans; bond funds, such as receipts from the sale of school building bonds; sinking funds for bond interest and redemption; working revolving funds; utility funds, such as the Veterans Farm and Home Building Fund of 1943; and assessment funds, are not government cost funds and are not included in the general category of special funds. State payments to any of these non-cost funds are, of course, regarded as an expenditure and reported as such.

trucks, \$6.45 for motorcycles, and \$16 for trailers were used in making the current estimates of revenue from this source. All amounts include penalties for late registrations and the surcharge on out-of-state cars registered for the first time in California.

Estimates of motor vehicle license fees are based upon vehicle registrations. Average fees have increased materially as a large number of new and higher priced vehicles have been added to the tax base. Vehicle license fees during 1951 averaged \$11.25 per unit, compared with \$9.95 a year earlier and \$8.70 in 1949. A decline in the number of new vehicles sold this year and next should result in a relatively stable average of \$11.34 for the current period and \$11.28 for 1953. Receipts from drivers' licenses will decline slightly this year as a result of a periodic wave in the renewal pattern. Transfer fees and other charges are expected to remain relatively unchanged. A summary of amounts estimated from each source in millions of dollars is given below:

<i>Motor Vehicle Fees</i>			
	<i>1950-51 actual</i>	<i>1951-52 estimated</i>	<i>1952-53 estimated</i>
Registration and weight----	\$52.2	\$55.9	\$59.4
License (in lieu) fees *-----	60.0	64.1	65.9
Drivers' licenses -----	3.2	3.0	3.0
Transfer fees and penalties--	2.2	2.4	2.5
Other revenues -----	0.1	0.2	0.2
<b>Totals -----</b>	<b>\$117.7</b>	<b>\$125.6</b>	<b>\$131.0</b>

\* Includes approximately \$2.7 million in each year transferred to the General Fund for interest and redemption on highway bonds. See Schedule 2 for precise amounts.

### Motor Vehicle Fuel Taxes—\$168,000,000

Two levies contribute revenue to the Motor Vehicle Fuel Fund—the gasoline tax, which is estimated to produce \$160 million during the next fiscal year, and the use fuel tax, budgeted for a total of \$8 million. Consumption of motor vehicle fuel per vehicle registered in California has declined moderately during recent years. One reason for this, undoubtedly, is the trend toward more than one vehicle per family. With an added car, there is not a proportionate rise in the miles traveled, and the average per vehicle declines. Other factors may be increased efficiency of engines now on the road, and better highways. Variation in the amount of tourist travel causes some change in the annual ratios. Just after the war, gasoline consumption amounted to 701 gallons per vehicle registered. Two years later the average declined to 653.4 gallons, and by 1950-51 it was 634.5 gallons per vehicle. Projections for 1951-52 and 1952-53 contemplate a further drop to 631 and 627 gallons, respectively.<sup>10</sup> Diesel consumption per vehicle has followed a declining trend similar to that shown in the case of gasoline; however, there has been a sharp increase in the number of units using this type of fuel, and a more marked growth in total revenues.

Comparative revenues in millions of dollars for the three budget years are:

<i>Motor Vehicle Fuel Taxes</i>			
	<i>1950-51 actual</i>	<i>1951-52 estimated</i>	<i>1952-53 estimated</i>
Gasoline -----	\$144.0	\$153.0	\$160.0
Diesel fuel -----	5.9	7.1	8.0
<b>Totals -----</b>	<b>\$149.9</b>	<b>\$160.1</b>	<b>\$168.0</b>

<sup>10</sup> Gasoline consumption is actually estimated on the basis of car-equivalents, in which automobiles, trucks, motorcycles, and trailers are equated in terms of fuel used. Cars, trucks, motorcycles, and trailers exempt from registrations are included in the total. Diesel units and one trailer per diesel vehicle are excluded.

### Motor Transportation Tax—\$11,735,000

Experience has shown a close correlation between the volume of spending by California civilians and the gross receipts of highway transportation companies. With spendable resources of \$17.2 billion in 1951 and \$17.7 billion in 1952, gross receipts of these taxpayers can be estimated at \$433 million in the current fiscal year and \$467 million in 1952-53. The 3 percent tax will result in gross assessments of \$13 million this year and \$14 million in the coming fiscal period. Against these amounts, operators will claim an offset in the amount of one-third of the motor vehicle weight fees paid in connection with their taxable operations, or approximately \$2.1 million for 1951-52 and \$2.3 million in 1952-53. Net revenues are therefore estimated at \$11.7 million in the coming year, compared with \$10.9 million in 1951-52. In each year approximately \$35,000 will be paid in permit fees. Tax receipts in 1950-51 amounted to \$10,160,033, and permit fees totalled \$34,305.

### Horseracing Fees—\$16,973,000

Betting in the pari-mutuel pools at California horse-races during 1952-53 is estimated to total \$300 million, compared with \$331 million indicated this year and \$289 million in 1950-51. Out of each pool operated, the State takes as its license fee 4 percent of the first \$10 million, 5 percent of the next \$10 million, and 6 percent of all pools in excess of \$20 million. In addition, the State receives all "breakage"<sup>11</sup> in pools over \$27 million, all unclaimed pari-mutuel tickets, and license fees paid by owners, jockeys and trainers. Receipts from these sources during the three years covered by this budget are shown in the table below, in thousands:

<i>Horseracing Fees</i>			
	<i>1950-51 actual</i>	<i>1951-52 estimated</i>	<i>1952-53 estimated</i>
Pari-mutuel pools -----	\$15,215	\$17,081	\$15,709
Breakage -----	890	861	897
Unclaimed pari-mutuel tickets--	229	387	337
License fees -----	22	30	30
Other receipts -----	12	—	—
<b>Totals -----</b>	<b>\$16,368</b>	<b>\$18,359</b>	<b>\$16,973</b>

The decline in receipts from parimutuel pools between 1951-52 and 1952-53 is due chiefly to the fact that two Western Harness meets will be conducted in the former year and none in the latter.

The sums of \$3.9 million in 1950-51, \$2.2 million in 1951-52, and \$2 million in 1952-53, included in the above table, accrue to the General Fund.

### Liquor License Fees—\$8,115,000

Receipts from liquor license fees next year are estimated at \$8,115,000, compared with \$8,090,000 currently and \$8,106,155 in 1950-51. Variations in amounts received from this source are largely the result of differences in dollar volume of liquor sold.

### RECENT TAX TRENDS

State tax revenue per \$100 of income received by the people of California is lower today than during prewar years. Under the estimates presented here, tax receipts from all sources in 1951-52 will amount to \$4.83 per one hundred dollars of income received by

<sup>11</sup> Defined in the Business and Professions Code, Sec. 19485.1, as "... the odd cents by which the amount payable as to each dollar waged ... exceeds a multiple of five cents ..."

the people of California last year, and this ratio will drop to \$4.78 next fiscal year.<sup>12</sup> This compares with an average of \$4.86 in the five prewar years and a high of \$5.09 in 1950-51, when two waves of scare buying inflated the ratio at least ten cents.

Basically, the state tax structure has not been changed in the last 16 years. With two general exceptions, the tax rates which now produce more than a billion dollars annually yielded only \$250 million 12 years ago. This phenomenal growth without an increase in the burden of taxes in relation to income is further proof of the direct relationship between taxes and the aggregate volume of business activity in the State. The two exceptions are in opposite directions, so far as burden is concerned. The state income tax at the present time is lighter than it was prewar: exemptions are \$1,000 higher for both individuals and families, and the maximum tax rate is now 6 percent on taxable income in excess of \$25,000 compared to 15 percent above \$250,000 prior to 1944. In contrast to this relief, motor vehicle taxes were increased substantially in 1947, as part of an effort to solve State and local highway problems. The motor vehicle fuel tax was raised 50 percent (from 3 cents to 4.5 cents per gallon); registration fees were doubled, weight fees

were increased almost 100 percent and a driver's license fee was imposed. These two changes did not offset each other, however. The added motor vehicle revenue exceeded the reduction in personal income tax by a wide margin.

State tax payments for support of general governmental activities next year will be 5 percent below prewar in relation to income of individuals. Receipts of \$3.27 per \$100 of individual income are 16 cents under the prewar average. In addition to the personal income tax reduction, this change is the result of a shifting within the tax system. Certain levies formerly used for general support are now dedicated to special activities. For example, the motor vehicle transportation tax was deposited in the General Fund until the law was changed in 1947. This money is now used for highway construction and maintenance. The State formerly received a share of liquor license fees which now goes entirely to cities and counties. There has been a similar shift in motor vehicle license fee receipts. All told, approximately \$30,000,000 of current revenue which formerly went to the General Fund is now specifically earmarked for special purposes. This transfer accounts for almost the entire 16 cent drop in the ratio between General Fund taxes and citizen income.

A summary of income payments to individuals in California, state tax collections, per capita taxes, and tax payments per \$100 of individual income is shown in the following table.

## SUMMARY OF STATE POPULATION, INCOME OF CALIFORNIA RESIDENTS, AND STATE TAX COLLECTIONS

*Excluding Departmental and Miscellaneous Revenues*

Year	Estimated Population July 1st (Thousands)	Estimated Income of Individuals (Millions)	Income Per Capita	Fiscal Year	State Tax Collections			Taxes Per Capita			Taxes Per \$100 of Individual Income		
					General Fund (Thousands)	Special Funds (Thousands)	Total (Thousands)	General Fund	Special Funds	Total	General Fund	Special Funds	Total

\* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

Population data, 1936 through 1939, are based on United States Census Bureau estimates; population, 1940 to date, estimated by the State Department of Finance. (*Provisional Annual Estimates of the Population of California, 1940-1953*, Nov. 1951.)

Income of individuals, 1936 through 1950, from United States Department of Commerce estimates. *Survey of Current Business*, Aug. 1951. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1951 and 1952 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

## Schedule 2

## COMPARATIVE STATEMENT OF REVENUES FOR THE FISCAL YEARS 1950-51, 1951-52, AND 1952-53

Source	Page Ref-er-ence	Actual 1950-1951			Estimated 1951-1952			Estimated 1952-1953

# BUDGET DOLLARS

## REVENUE DOLLAR

## EXPENDITURE DOLLAR

**CHART 3**

# Analysis of Expenditure Requirements

1952-53 Fiscal Year

Expenditures recommended in the State Budget for the fiscal year ending June 30, 1953, total \$1,185,397,-000. This represents an increase of approximately \$82 million, or 7.4 percent, over the estimated requirements for the current year and \$179 million more than was spent in the twelve months which ended June 30, 1951.

An executive budget is a complete financial plan for the operation of government, bringing together the expenditure needs and the resources available to meet these needs.<sup>1</sup> In California, approximately two-thirds of the expenditure total represents the cost of services which are mandatory under provisions of the State Constitution or other existing law. The remaining one-third is subject to determination by the Governor in preparing his budget recommendations. These are the expenditure items incorporated into the budget bill to be considered by the State Legislature.

Like a great majority of the earlier budgets in their time, the program required for 1952-53 is the largest in the history of this State. It reflects governmental needs in a rapidly growing area during a period of price inflation. The program of services provided in this document, with the population and prices of 10 years ago could have been financed for approximately \$507 million. The \$678 million difference between this sum and the budget total measures in rough terms the impact of inflation and population growth upon the finances of California State Government.

State expenditures fall into three broad classes: (1) the cost of operating State governmental agencies and payments on debt, (2) capital outlay—the cost of building the structures, highways and facilities to be used in subsequent years, and (3) payments by the State to local units of government, including the cost of jointly financed activities, assistance in meeting the expense of local services, and distribution of revenue collected by the State for the benefit of cities and counties. During 1952-53, less than one-third of the expenditure total will be used for the current operation of State Government. Approximately one-fifth will be spent to construct buildings, highways, and other facilities needed to meet the problems of obsolescence and population growth. A little more than half the total represents assistance to local governments. Amounts budgeted for each purpose, together with the increase over the current year and the percent of the total, are shown in the following table:<sup>2</sup>

	Recommended expenditures 1952-53 (millions)	Increase over 1951-52 Amount (millions)	Per- cent	Percent of total budget
State operations -----	\$337.6	\$37.0	12.3	28.5
Capital outlay -----	222.0	5.9	2.7	18.7
Local assistance -----	625.8	39.1	6.7	52.8
Total -----	\$1,185.4	\$82.1	7.4	100.0

<sup>1</sup> Section 34 of Article IV of the Constitution provides in part: "The Governor shall, at each regular session of the Legislature, submit to the Legislature, with an explanatory message, a budget containing a complete plan and itemized statement of all proposed expenditures of the State provided by existing law or recommended by him . . . and of all estimated revenues for the ensuing fiscal year . . ."

<sup>2</sup> In all of the text tables amounts have been rounded to the nearest thousand dollars. In some instances this results in an apparent error in addition or subtraction. In all cases, however, totals are correct to the nearest thousand.

The detailed amounts making up these totals, classified according to budget organization, are shown in the table on the following page and in Schedule 3.

State government performs many and widely varied functions, ranging from agricultural development to the regulation of yacht brokers. For the most part, however, these fit into six general categories. The most important from the financial viewpoint is the support of education. A little more than one-third of all expenditures recommended for the coming year relate to that function. This includes the direct support of public schools, colleges and the University, administrative activities of the Department of Education, and amounts budgeted for the construction of buildings at educational centers. In the second large category, accounting for one-fifth of the total, are the expenditures for highways, roads, streets, traffic law enforcement, and the regulation of motor vehicles. These two classes of expense—education and highways—make up more than 56 percent of the entire expenditure budget. Third in importance are the activities in connection with social welfare and public health, accounting for 16 percent. These are followed by payments for mental hospitals, homes and correctional facilities with 10 percent and by expenditures for development and conservation of natural resources, which require 5 percent of the budget. All other expense, including the legislative, judicial, executive, general administrative, regulatory, and tax administering activities, combined with apportionments of state-collected revenue for general administration of local governments, comprise 13 percent of the expenditure total. Amounts included for each of these purposes in 1952-53 and the changes from the estimated requirements during the current, 1951-52, Fiscal Year are given in the table below:

	Recommended expenditures (millions)	Change from 1951-52 Amount (millions)	Per- cent	Percent of total budget
Education -----	\$418.6	\$58.6	16.3	35.3
Highways and vehicle regulation -----	248.4	—2.1	—0.8	21.0
Social welfare and health -----	187.3	3.1	1.7	15.8
Mental hygiene and corrections -----	117.7	12.9	12.9	9.9
Conservation of natural resources -----	57.9	1.0	1.8	4.9
All other -----	155.5	8.6	5.8	13.1
Totals -----	\$1,185.4	\$82.1	7.4	100.0

## STATE OPERATIONS

Expenditures for the operation of State Government include the cost of legislative, judicial and executive activities, the expenses of nineteen administrative departments, the support of all independent offices, boards, and commissions, and debt service. Budget recommendations for these agencies represent the estimated expense of continuing the program approved for the current fiscal year without major changes. Adjustments have been made for increases and decreases in the work load of administrative units, and at certain points, such as traffic law enforcement, clearer

Shared Revenues -----	125,000	144,068	148,019	3,951	2.7
Totals, Local Assistance -----	\$542,941	\$586,667	\$625,796	\$39,129	6.7
GRAND TOTALS, EXPENDITURES -----	\$1,006,339	\$1,103,333	\$1,185,397	\$82,064	7.4

<sup>a</sup> Amounts are not comparable, since the sums shown for 1951-52 represent only the unallocated balance of similar provisions made for salary adjustments and price increases approved in connection with the current budget.

\* Credits to the General Fund for overhead services charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown. Totals may not add, due to rounding to the nearest thousand.

recognition is given to some of the most pressing problems of government, but the basic scope of state service remains unchanged.

The program of state operations recommended in this budget involves expenditures of \$337,558,000, an increase of \$37,033,000, or 12.3 percent, over the estimated requirements for the current year. Of this amount \$333,950,000 represents the current expenses of state agencies and \$3,608,000 is required to meet interest and redemption of state bonds. Expenditures for debt service on these obligations will be paid from the reserve created in 1943 and from motor vehicle license fees specifically earmarked for highway bonds.<sup>3</sup>

The current expense total includes funds for a proposed increase in the salaries of state employees effective July 1, 1952, in accordance with findings and recommendations of the Personnel Board that adjustments are necessary to maintain state salary schedules parallel with those of private industry and other governmental jurisdictions. The sum of \$2,000,000 is included to meet probable increases in the prices of food and clothing, to be purchased for inmates of state institutions, and in the cost of equipment and supplies, while provision is made for a general emergency fund of \$1,500,000. All three of these amounts had their counterparts in the approved budget for the current fiscal year.

### *Principal Items of Expense*

Five adjustments of the data presented in the accompanying summary table have been made in analyzing the operating expense of state agencies for purposes of this presentation. (1) The \$14.2 million proposed for salary adjustments has been distributed to the various agencies by increasing salary and wage expenditures by 5 percent. (2) The \$2.0 million provided to meet price rises has been allocated on the basis of budget allowances for food, clothing, equipment, and supplies. (3) Contributions from the General Fund for employees' retirement, normally reported in lump sum, have been allotted among the departments in accordance with salary and wage payments from the General Fund. (4) Payments for debt service have been charged to the function for which the obligations were incurred, such as highways or natural resources. And (5) in some instances combinations of expenditures by different agencies have been made in terms of broad governmental functions. As a result of these changes, amounts given below differ substantially from the expenditures reported in the summary table and in the budget schedules, but in many respects the adjusted data give a more complete picture of state operations than can be obtained on the strict organizational basis used for budgetary control. Two points must be emphasized: first, the distribution of the price increase fund is purely an estimate of the possible utilization of this money and is not an additional appropriation for the support of any agency. Second, the total of all expenditures for state operations, \$337,558,000 is identical with the amount shown for this purpose in the budget summaries.

<sup>3</sup> Interest and redemption payments on school building bonds issued for the benefit of distressed school districts are shown as assistance to local governments.

### *Education—\$80,340,000*

The largest item of expense in State operations is incurred in connection with support of educational institutions, administrative activities of the Department of Education, and operation of the State Library. Expenditures for this purpose during 1952-53 are budgeted at \$80,340,000, compared with \$69,761,000 currently and \$60,472,000 in 1950-51. Among the important factors contributing to this increase have been the new state colleges and special schools established during recent years, expansion in the courses of study available at several institutions, and emphasis upon graduate work and research, particularly at the University of California.

More than one-half of all payments in this field concern state support of the university, and half of the increase shown for next year are reflected in this appropriation. Expenditures for the university in the coming year are expected to reach \$52,675,000 or \$6,516,000 above the estimated total for 1951-52. Although enrollment is expected to decline moderately, corresponding reductions cannot be made in the university's expenditures without diluting the quality of the educational program provided. In most phases of this work, a drop in number of students may be reflected in proportionately smaller classes, but not in a proportionately smaller number of courses offered in the established curriculum. With the new medical school on the Los Angeles campus, new colleges of letters and science at Riverside and Davis, and extensions in other professional fields, actually the reverse will be true next year. Roughly, one-third of the increase shown for the university is attributable to new and extended activities. The remainder may be traced to merit increases and promotions of personnel, increased cost of maintaining plant and equipment, and a proposed augmenting of state support to compensate for a decline of approximately \$517,000 in other income available to the university.

Support of state colleges in the amount of \$16,972,000 is proposed for next year, an increase of \$2,237,000 over the current period. Expanding enrollments at the two new educational centers in the Los Angeles area and one in Sacramento contribute heavily to this growth, while continued emphasis on the training of teachers to fill critical shortages in the public school system necessitates increases in the expenditure programs of the older institutions. Expenses in connection with a shift to the new campuses at Fresno and San Francisco temporarily inflate the expenses of these colleges. Completion of new dormitories at California Polytechnic College will allow a return to capacity enrollment, after a year of shortage in student housing when the army resumed control of accommodations at Camp San Luis Obispo.

Among the chief developments at the special schools are the provision for the initial enrollment at the new residential institution for the deaf at Riverside and completion of additional facilities at the School for the Deaf in Berkeley. An increase in expenses of the Oakland Orientation Center for the Adult Blind—a residential institution—is offset by a decline in activities at the Blind Center in Oakland, under legislation adopted last year.

A summary of all current expense for education is given in the following table:

	(In thousands of dollars)			Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Amount	Pct.
Department of Education	\$3,612	\$3,963	\$4,765	\$802	20.2
State colleges	14,103	14,735	16,972	2,237	15.2
Technical colleges	2,332	2,402	2,970	568	23.7
Special schools *	2,151	2,343	2,779	435	18.6
University	38,121	46,159	52,675	6,516	14.1
Other	153	159	180	20	12.7
Totals	\$60,472	\$69,761	\$80,340	\$10,579	15.2

\* Including centers for the blind.

### Mental Hygiene and Corrections, \$75,427,000

Payments for support of mental hygiene and correctional activities constitute the second important class of state expenditures. The aggregate for these purposes in 1952-53 is \$75,427,000—an increase of \$8,743,000 over the estimated amount for the present fiscal year. More than two-thirds of the total will be used for support of mental hospitals and other work in the field of mental hygiene. Less than one-third will be expended for corrections, including the maintenance of prisons, correctional schools, and parole supervision.

The impact of higher salaries and price inflation is particularly heavy in the budgets for institutions. Of the \$14,244,000 provided for salary increases, \$3,794,000 will go into the expenditure totals for these agencies next year, while almost one-half of the \$2,000,000 requested to protect the State in the event of further inflation may ultimately be allotted to institutional budgets. The two factors of higher salaries and price emergency fund account for more than half the \$8,743,000 increase in expenditures for mental hygiene and corrections shown in the table below.

The Department of Mental Hygiene is the largest operating agency of the State Government in point of current expense, with total expenditures of \$54,034,000 proposed for next year, a gain of \$6,681,000 over the current year total. Since the close of World War II, primary emphasis has been placed upon the prevention of mental disorders and the rehabilitation of patients in the State's mental hospitals. Trends in this direction have been particularly apparent during recent years, with the creation of additional local clinics, the adoption of new treatments, and medical research into the causes and treatment of mental illness. The results of these activities are clearly reflected in the proposed budget for the coming year. For the first time in more than two decades the current increase in mental patients is only nominal, and an even smaller growth is anticipated next year.

Evidence of success in this basic attack upon such a deep-seated social problem has prompted a further moderate expansion in the program for mental hygiene. Provision is made for an improved level of care through the addition of 1,029 new positions, chiefly in professional and technical capacities. New units scheduled to open next year include receiving and treatment buildings at the Napa and Stockton hospitals. A new diagnostic and preadmission service is proposed at Pacific Colony and Sonoma State Home for the mentally defective. An alcoholic research project is to be undertaken at Agnews, and a survey of the outpatient clinic program is recommended.

The increase of \$2,062,000 in expenditures for correctional institutions, to reach a total of \$21,393,000 during 1952-53, reflects primarily the growth in the number of inmates and a more complete schedule of operations in the new facilities now being placed in service. Population of penal and reform institutions is estimated to average 14,383 during the coming fiscal year, an increase of 568 over the present total. Except for the shifting of population and increase in staff which arises largely from the occupancy of new quarters, the budget for corrections in 1952-53 represents a continuation of the current approved program and a consolidation of the improvements effected during recent years.

State expenditures for mental hygiene and corrections are summarized in the table below.

	(In thousands of dollars)			Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Amount	Pct.
Mental hygiene	\$39,356	\$47,354	\$54,034	\$6,681	14.1
Corrections	16,511	19,330	21,393	2,062	10.7
Totals	\$55,868	\$66,684	\$75,427	\$8,743	13.1

### Highways, Traffic Law Enforcement and Regulation of Motor Vehicles, \$62,516,000

During the coming fiscal year the State Government will spend \$62,516,000 for services to motorists. This total includes the planning, administering, and maintaining of highways, enforcement of traffic laws, and the regulation of motor vehicles. It does not include highway construction, for which a sum almost twice as large is scheduled for expenditure.

By far the major item of interest in highway expenditures is the proposal to expand the highway patrol as one approach to the problem of traffic accidents. Until congestion of traffic arteries can be eliminated and safety facilities provided, reliance must be placed upon greater vigilance and stricter law enforcement. The budget proposes the addition of 232 positions to the strength of the highway patrol to provide a more adequate degree of traffic regulation. The cost of this improvement will be approximately \$1,300,000.

Changes in the budget of the Department of Motor Vehicles arise primarily as a result of the anticipated move into new and larger quarters. Expenditures for maintenance and operation of buildings account for approximately one-quarter of the increase in the current expense of this department. Other changes reflect the greater work load anticipated as a result of further growth in both the number of vehicles and the number of vehicle operators.

Virtually all of the increase in current expense for state highways relates to maintenance, which must be increased as the program of new and modern highways is pressed forward.

Operating expense by the three agencies involved in serving highway needs may be summarized as follows:

	(In thousands of dollars)			Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Amount	Pct.
Traffic law enforcement	\$10,397	\$12,011	\$14,461	\$2,450	20.4
Regulation of motor vehicles	10,094	11,788	13,409	1,621	13.8
State highways	31,103	33,244	34,646	1,401	4.2
Totals	\$51,594	\$57,043	\$62,516	\$5,472	9.6

## Conservation and Development of Natural Resources, \$42,939,000

This classification brings under one heading the activities carried on in several governmental agencies all directed toward improved utilization of the State's natural resources. It embraces the work of the Departments of Agriculture, Fish and Game, and Natural Resources, the Division of Water Resources and related sections in the Department of Public Works, the Reclamation Board, and the Division of Fairs and Expositions in the Department of Finance. In the aggregate, these agencies will expend \$42,939,000 on various phases of resource conservation and development during the coming year—\$3,969,000, or 10.2 percent, more than will be spent in these activities during 1951-52.

The largest and most diversified of these operating units is the Department of Natural Resources which administers state beaches and parks, protects forest and brush areas, supervises mining and oil field activity, and assists in the formation of soil conservation districts. In total, more than \$16,257,000 will be spent on this work during 1952-53. Except for minor additions to personnel in forestry, beach and park operations, and rising payments to counties and the United States Forest Service for fire protection on lands of state responsibility, the proposed budget provides merely for a continuation of present approved programs.

Legislation adopted last year established the former Division of Fish and Game as an independent department of State Government. This agency is charged with the responsibility of formulating policies, preserving wild life, controlling predatory animals, conducting research, and enforcing fish and game laws, including the regulation of commercial fisheries. Maintenance of the present level of operations during the next fiscal period will involve expenditures of \$6,801,000. Virtually all of the \$399,000 increase over the current total represents the proposed higher salary level and State's share of expenses incurred in connection with game management projects conducted jointly with the Federal Government.

A parallel situation exists in the budget of the State Department of Agriculture. Expenditures proposed have been held strictly within the limits of the program approved for the current year. Totals are shown in the table below.

The major change in expenditures for the development of water resources is the provision of \$800,000 to finance necessary preliminary work in connection with the development of the Feather River Project, authorized by Chapter 1441, Statutes of 1951.

Expenditures for agricultural fairs and expositions under jurisdiction of the State are budgeted at \$5,624,000 next year, an increase of 7.8 percent over the current total. Additional funds are provided for district agricultural associations, under provisions of law governing the distribution of horse racing revenue.

The following data summarize the current expense for conservation and development of natural resources.

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52	
				Amount	Pct.
Agriculture .....	\$8,501	\$9,695	\$10,027	\$331	3.4
Fish and game .....	5,143	6,403	6,801	399	6.2
Beaches and parks .....	2,322	2,555	2,777	222	8.7
Forestry .....	10,351	10,864	12,218	1,355	12.5
Mining, gas, and oil .....	788	860	911	51	5.9

Other .....	216	274	351	77	28.1
Totals .....	\$34,762	\$38,970	\$42,939	\$3,969	10.2

## Social Welfare and Public Health, \$19,417,000

Activities brought together under the heading of welfare and health include administration of public assistance, regulation of health, aid to veterans and promotion of welfare among the workers in industry. With the exception of the last two functions, this is a field in which most of the expenditures are made through cities and counties and are reported as local assistance. Amounts shown as current expense represent only the cost of State supervision of jointly financed programs.

Here, again, the program of expenditures totaling \$19,417,000 for next year contains no important deviations from that now in operation. The increase of 4 percent represents almost entirely salary adjustments and the accompanying increase in contributions to the employees' retirement plan. Assistance to veterans who are completing their education is expected to continue the moderate decline shown for the first time this fiscal year. An apparent decline in expenditures by the Department of Public Health for crippled children is, in fact, the result of transferring certain therapist positions to the local assistance classification. The work will actually go on as now established.

In some aspects, operations of the Department of Industrial Relations must parallel changes in economic activity and employment. For this reason adjustments are proposed to intensify the work on accident prevention and safety, and the adjudication of cases arising under the workmen's compensation insurance law.

Expenditures recommended for support of State agencies during 1952-53 are summarized below:

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52	
				Amount	Pct.
Industrial relations .....	\$4,307	\$4,933	\$5,523	\$590	12.0
Public health .....	4,316	5,167	5,282	115	2.2
Social welfare .....	1,920	2,015	2,255	240	11.9
Veterans affairs .....	6,406	6,440	6,294	-146	-2.3
Other .....	30	66	64	-2	-3.0
Totals .....	\$16,978	\$18,620	\$19,417	\$797	4.3

## Fiscal Affairs, \$26,324,000

Financial affairs, involving the collection of state revenue, auditing of tax returns, business management, control over and auditing of expenditures, and the custody of state funds are divided among six state agencies.<sup>4</sup> Total expenditures of \$26,324,000 are recom-

<sup>4</sup> The Department of Motor Vehicles, classified in the broad group of highways and motor vehicles, collects registration and weight fees, license (in lieu) fees, drivers' license fees and other motor vehicle charges. The Department of Insurance receives reports essential to the administration of the insurance premiums tax, and virtually all of the regulatory agencies collect fees incidental to their other activities. Expenditures for these purposes are excluded from the totals shown for fiscal affairs.

mended for 1952-53, an increase of \$2,242,000 over the corresponding amount required in the current year.

Minor changes, both increases and decreases, are shown in the recommendations for these agencies, most of which are generated by improved business practices. There are, however, three factors contributing to a net increase: (1) Expenditures for support of the Division of Building and Grounds will increase as new state-owned office space becomes available. This item alone accounts for approximately \$400,000 of the increase shown for the Department of Finance. (2) Additional emphasis upon auditing and further expansion of centralized disbursements will add \$180,000 to the current expense of operating the State Controller's Office. (3) Leases and equipment obtained in connection with state administration of aged and blind aid, under the short-lived constitutional amendment of 1948, are being liquidated by the Finance Department. A decline in revenue from sales of equipment, which is an offset against this expense, has the effect of contributing \$115,000 to the budget increase.

A summary of current expense for fiscal affairs follows:

	(In thousands of dollars)				
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52 Amount	Pct.
Control and Management:					
Board of Control-----	\$17	\$22	\$23	\$1	7.7
Controller <sup>a</sup> -----	1,360	1,473	1,674	201	13.6
Department of Finance <sup>b</sup> -----	4,574	5,415	6,287	872	16.1
Treasurer-----	261	295	301	6	2.0
Subtotal-----	\$6,212	\$7,205	\$8,285	\$1,080	15.0
Tax Collection:					
Board of Equalization-----	\$11,970	\$13,161	\$14,051	\$890	6.8
Controller <sup>c</sup> -----	982	1,058	1,145	87	8.3
Franchise Tax Board-----	2,580	3,201	3,400	199	6.2
Subtotal-----	\$15,532	\$17,420	\$18,596	\$1,176	6.8
Total, Fiscal Affairs-----	\$21,744	\$24,625	\$26,882	\$2,256	9.2
Less: Adjustments *-----	675	544	553	14	2.6
Net Totals-----	\$21,069	\$24,081	\$26,324	\$2,242	8.9

<sup>a</sup> Excluding tax collection divisions of the Controller's Office.

<sup>b</sup> Excluding the Division of Fairs and Expositions (see Conservation of Natural Resources).

<sup>c</sup> Tax collection divisions only.

\* Credits to the General Fund for overhead services charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown.

## Other Expense, \$30,596,000

Legislative, judicial, executive, general administrative,<sup>5</sup> and regulatory activities are grouped under the heading of miscellaneous expense for purposes of this analysis. Principal contributions to the total are made by the regulatory bodies, such as the Public Utilities Commission, the six offices dealing with the general subjects of banking and investment,<sup>6</sup> and the 28 boards, bureaus, and commissions regulating the professions and vocations.<sup>7</sup> Expenditures of these regulatory agencies are estimated to be \$9,561,000 during 1952-53, under the budget recommendations—almost one-third of the miscellaneous expense total.

The principal increase involved is the provision for augmentation of revolving funds in the amount of \$2,000,000. This sum is required to operate at current high price levels such activities as purchasing, manufacturing operations of the blind, prison industries, and purchase of ballot paper. Although classified as an ex-

penditure, the addition is actually a transfer to special accounts to finance expenditures elsewhere reported. It should also be noted that legislative expense in 1952-53 is not strictly comparable with the present year. Allowance is made for the longer regular session next year, as compared with the short budget session to be held in March, 1952.

A summary of the principal items comprising other expense is given in the following table:

	(In thousands of dollars)			Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Amount	Pct.
Legislative-----	\$3,381	\$2,661	\$3,051	\$391	14.7
Judicial-----	1,164	1,344	1,467	124	9.2
Executive and civil defense-----	989	2,061	2,014	-47	-2.3
General administrative-----	2,002	2,074	2,340	267	12.9
Regulatory-----	7,921	8,868	9,561	693	7.8
Other <sup>a</sup> -----	7,535	8,668	11,391	2,723	31.4
Reserve for contingencies <sup>b</sup> -----	—	400	1,500	1,100	275.0
Totals-----	\$22,992	\$26,075	\$31,325	\$5,249	20.1
Less: Adjustments *-----	680	710	728	18	2.5
Net Totals-----	\$22,312	\$25,365	\$30,596	\$5,232	20.6

<sup>a</sup> Including the Departments of Justice and Military Affairs, Public Works other than expenditures for highways and water resources, and miscellaneous expenses.

<sup>b</sup> The amount shown for 1951-52 represents the unallocated balance of the \$1,500,000 emergency fund provided for the current year. The \$1,500,000 given for 1952-53 is the total emergency fund requested for the coming fiscal year.

\* Credits to the General Fund for overhead services charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown.

## CAPITAL OUTLAY

With the exception of projects deferred by legislative action, the State's postwar building program, as now authorized, is drawing to completion. As a result of a sharp increase in building costs and continued population growth, the original program fails to satisfy current needs despite modifications during recent years.<sup>8</sup> In order to meet these problems of inflation and growth, the 1952-53 Budget contains recommendations for a substantial amount of construction at mental hospitals, homes, correctional institutions, educational centers, and other sites of concentrated governmental activity. In contrast with the original program which necessarily was pointed toward meeting the deficiencies of the past occasioned by a depression and war, the budget proposals are directed at the present and toward sound planning for the future. Funds are included in the budgets of each department for preparation of preliminary plans for new major construction projects so that the scope and better estimates of costs can be determined prior to the appropriation of funds for working drawings and construction.

Capital outlay expenditures budgeted for 1952-53 total \$222,043,000, or an increase of \$5,902,000 over estimated expenditures of the current fiscal year. Of this total, \$108,117,000 relates to the construction of highway facilities, flood control, and reclamation. These are continuing projects, carried on essentially to the limit of available resources and, for the most part, fixed by statute. Highway construction alone will involve expenditures of \$107 million, approximately \$11 million less than during the current year, due to a reduction in unexpended balances carried forward from earlier periods. The remainder, \$113,926,000, is the program for property acquisition, structures, and equipment which is subject to the determination of the Governor and the Legislature. The proposed program

<sup>8</sup> The index of construction costs in California has increased 102 percent since 1943; 53 percent since 1946; and 16 percent since 1948. Population on July 1, 1953, is estimated to be 11,800,000, an increase of 40 percent since 1943 and 23.6 percent since 1946.

for these purposes in the ensuing year represents an increase of \$17 million, or 17.6 percent from the current year and \$30 million more than was expended in 1950-51.

A summary is shown below.

(In thousands of dollars)					
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52 Amount	Pct.
Highways and vehicle regulation -----	\$115,789	\$118,868	\$107,699	—\$11,169	—9.4
Mental hygiene and corrections -----	21,692	37,420	41,534	4,114	11.0
Education -----	39,476	21,891	35,412	13,521	61.8
Conservation of natural resources -----	9,695	12,059	10,908	—1,151	—9.5
Social welfare and health -----	7,608	2,957	2,642	—315	—10.7
All other -----	6,083	22,947	23,849	902	3.9
Totals -----	\$200,343	\$216,142	\$222,043	\$5,902	2.7

For the most part the new building construction contemplated in this program will be financed by utilizing a part of the existing General Fund surplus. A transfer of \$86,574,000 to the Capital Outlay and Savings Fund, together with unappropriated balances in this fund, will provide \$97,701,000 of the total required. Capital outlay for civilian defense and acquisition of certain forest lands, totaling \$4,618,000, will be met by direct General Fund appropriation, while \$119,724,000 will be paid from special funds, chiefly for highway construction, fairs, and projects relating to the colleges of agriculture at the University, California Polytechnic, and Fresno State.

**Mental Hygiene and Corrections, \$41,534,000**

With the exception of highways, the principal budget items for capital outlay relate to expansion of facilities at state mental hospitals, prisons, and correctional schools. Major projects at the mental institutions include a juvenile unit at Camarillo, replacement of wards at Mendocino, Napa, Patton, Stockton, and Sonoma, and additions at Pacific Colony, Porterville and the Napa tubercular ward. In the field of corrections, the budget provides more than \$5 million for the new medical facility at Vacaville, plus other amounts for additional cell buildings at Chino, development of the Deuel Vocational Institution, and improvements at Folsom, San Quentin, and Soledad. The program recommended for the Youth Authority will expand school capacity at Paso Robles, Los Guilucos, and the Southern California Reception Center, rebuild the Ventura School at a new location, and replace inferior structures at Preston, and the Fred C. Nelles School.

Amounts budgeted for construction at mental and correctional institutions are shown below.

(In thousands of dollars)					
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52 Amount	Pct.
Mental hygiene -----	\$11,900	\$23,136	\$22,035	—\$1,101	—4.8
Corrections:					
Adult facilities -----	6,693	8,167	11,651	3,484	42.7
Youth Authority -----	3,099	6,117	7,848	1,731	28.3
Totals -----	\$21,692	\$37,420	\$41,534	\$4,114	11.0

**Education, \$35,412,000**

The thirty-five million dollars budgeted for construction at educational centers in 1952-53 is almost equally divided between the university and the colleges. The university program includes major projects on all of its sites, with emphasis upon buildings in Los Angeles and

the new campus at Santa Barbara. Among the colleges, particular attention is given to the new institutions at Long Beach and Sacramento, and the transfer of Fresno State College to its new location. Replacement of temporary buildings is scheduled at the San Luis Obispo campus of California Polytechnic College, and development will start on the Kellogg campus. A new gymnasium and swimming pool is planned at the School for the Deaf in Berkeley.

Expenditures are classified by principal types of institutions in the following table.

(In thousands of dollars)					
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52 Amount	Pct.
State colleges -----	\$20,141	\$9,016	\$12,944	\$3,927	43.6
Technical colleges -----	1,880	1,079	4,525	3,446	319.2
Special schools * -----	4,608	425	741	317	74.6
University -----	12,848	11,371	16,955	5,584	49.1
Other -----	—	—	247	247	—
Totals -----	\$39,476	\$21,891	\$35,412	\$13,521	61.8

\* Including centers for the blind.

**Conservation and Development of Natural Resources, \$10,908,000**

Conservation and development of natural resources has received increasing attention during recent years. Wildlife conservation, development of beach and park areas, and the protection of forests and watersheds have taken on added importance as the population of the State has grown. Programs comprising this long-term development are continued in the budget recommendations for 1952-53.

In the field of fish and game conservation expenditures totalling \$4 million are proposed for the acquisition of waterfowl feeding areas and the construction of fish hatcheries. Purchases of new beach and park areas are budgeted at \$880,000, and \$1,300,000 is requested for improvements in these recreational areas. Acquisition of forest lands, construction of fire control stations, and improvement at forestry work camps make up the \$1,400,000 proposed for forest conservation.

Expenditures for agricultural fairs and expositions in the amount of \$1,600,000 relate entirely to the capital outlay allocations provided by law in the distribution of horseracing license fees. Requests totalling \$638,000 are made for plant quarantine stations and laboratories operated by the Department of Agriculture and minor construction at the poultry improvement project.

Expenditures classified by principal functions are given below.

(In thousands of dollars)					
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Change from 1951-52 Amount	Pct.
Agriculture -----	\$444	\$243	\$638	\$395	162.4
Fish and game -----	1,412	2,733	4,301	1,567	57.3
Beaches and parks -----	2,320	4,570	2,217	—2,353	—51.5
Forestry -----	2,448	1,398	1,361	—37	—2.6
Water resources -----	1,304	1,223	750	—473	—38.7
Fairs and expositions -----	1,764	1,891	1,637	—254	—13.4
Other -----	3	—	4	4	—
Totals -----	\$9,695	\$12,059	\$10,908	—\$1,151	—9.5

**Social Welfare and Health, \$2,642,000**

Items falling into this category are \$1,034,000 for the purchase of sites and construction of buildings to be occupied by the Department of Employment at various locations throughout the State, and \$1,608,000 for improvements at the Veterans Home—a total of

\$2,642,000. Comparable amounts in the current year and during 1950-51 are \$2,957,000 and \$7,608,000, respectively.

### All Other, \$23,849,000

Totals for all other capital outlay items are seriously distorted by unallocated sums of \$13,230,000 in the current year and \$13,000,000 in 1952-53. These amounts are necessary to meet differences between estimated and contract prices of projects in the program as a whole and to cover unforeseen contingencies. Other major amounts included in the miscellaneous total are the \$2,000,000 for construction of an office building at Sacramento, \$800,000 for purchase of building sites in San Jose, Santa Barbara, and San Diego, and \$2,600,000 for the renovation of existing state buildings, especially in connection with removals to new quarters. A summary of miscellaneous outlay requirements is tabulated below.

	(In thousands of dollars)				Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Proposed 1952-53	Amount	Pct.

\* Primarily general office buildings, appropriation to be made to Department of Finance.

† Chiefly amounts necessary to meet increased prices of construction projects shown under other classifications.

## LOCAL ASSISTANCE

State assistance to local units of government is provided in the form of subventions and allocations of revenue from taxes levied wholly or partly for the benefit of cities and counties. Of the \$625,800,000 estimated for local assistance next year, 76 percent represents subventions and 24 percent is shared revenue. Payments fall into the six broad functional categories discussed above, with education of primary importance, followed by social welfare and public health, roads and streets, and support of general government. Payments for conservation of natural resources are of relatively minor importance. Subventions for mental hygiene and corrections are negligible in relation to the total. Amounts budgeted for each purpose in 1952-53 are shown below:

	Budgeted expenditures (millions)	Change from 1951-52 Amount (millions)	Percent of total assistance	Percent of total assistance
Education -----	\$302.9	\$34.5	12.9	48.4
Social welfare -----	151.3	1.3	0.9	24.2
Public health -----	13.9	1.3	10.3	2.2
Roads and streets -----	78.2	3.6	4.8	12.5
Conservation of resources	4.0	—1.9	—31.5	0.7
Corrections -----	0.7	—	—	0.1
All other -----	74.7	0.2	0.3	11.9
Totals -----	\$625.8	\$39.1	6.7	100.0

### Subventions for Education, \$302,900,000

State payments for the support of public schools and related activities are estimated to reach a new record of \$302,863,000 during 1952-53, an increase of \$34,530,000 over the amount required in the current year, which in its turn is a new peak, by a margin of \$26,000,000. The underlying cause of such rapid growth is the entrance into the public school systems of the children born in 1946. This wave of youngsters entered kindergarten classes in 1951, producing a 35 percent increase over the previous year. It will roll on through

the school system for more than a decade, followed in a year or two by slightly smaller classes, but destined to reach another peak when the 250,000 babies born last year enter school in 1956.

Total enrollment in elementary schools, high schools, and junior colleges on October 31, 1951, was 2,259,160, of which 341,471 were in classes for adults and 13,651 were special students in regular classes. This represented an increase of 6.6 percent over the corresponding date of the previous year. Graded enrollment in regular classes, kindergarten through grade 14, totaled 1,875,138—an increase of 144,035 or 8.3 percent over 1950. Details of average daily attendance, which determines the State's payments for school support, are shown in the local assistance section of the budget.

Apportionments for school support, required by existing law, are estimated to total \$258,638,000 in 1952-53. A special appropriation of \$12,000,000 is recommended to augment this sum, to be distributed to the less wealthy districts as part of the program for equalizing school costs.

Legislation enacted in 1951, placing school apportionments on a current basis, is a second factor contributing to the \$26,000,000 additional cost of schools during 1951-52. Heretofore an increase in state support lagged a year behind an increase in attendance, except in the most rapidly growing districts.

Another element adding to the State's total payment for education is the debt service charge on school building bonds approved by the voters in 1949. Interest and redemption on these obligations during 1952-53 will amount to \$8,330,000. Receipts from local districts are estimated at \$2,881,000, leaving a net expense of \$5,449,000 to be carried by State Government.

Contributions to the Teachers' Retirement System in the next fiscal year will require approximately \$18,522,000—an increase of \$2,132,000 over the total for 1951-52. The expense of providing free textbooks is expected to decline slightly, occasioned chiefly by the large expenditure for this purpose in the current year, while fractional declines are anticipated in subventions for child care centers and vocational education. Federal grants for vocational education are expected to increase \$228,000.<sup>9</sup>

Comparative subventions for education are:

	(In thousands of dollars)				Change from 1951-52	
	Actual 1950-51	Estimated 1951-52	Estimated 1952-53	Amount	Pct.	
School support -----	\$215,256	\$241,090	\$270,638	\$29,549	12.3	
Teachers' retirement -----	16,650	16,390	18,522	2,132	13.0	
Child care centers -----	4,540	5,370	5,361	—9	—0.2	
Vocational education -----	363	331	306	—25	—7.4	
Free textbooks -----	2,336	2,782	2,587	—195	—7.0

Totals -----	\$242,093	\$268,333	\$302,863	\$34,530	12.9	

\* Special appropriation approved in 1949 to provide necessary housing and equipment for the education of cerebral palsied children.

† Special appropriations enacted in 1947 and 1948 to provide for school building construction in distressed districts. It is estimated that returns from allotments previously made will exceed new allocations during 1952-53.

### Social Welfare, \$151,329,000

After many years of continued growth, subventions for social welfare, including payments for old age security, assistance to the blind, and aid to needy children, are expected to show a remarkable

<sup>9</sup> Expenditures from federal funds are not included in the budget totals.

degree of stability in the period covered by this budget. An improved labor market which keeps older workers gainfully employed and provides work opportunities for responsible relatives is the chief reason for this change. Additional factors, so far as state expenditures are concerned, are the increase in average payments under the federal old age and survivors insurance law and the legislation adopted in 1951 with respect to the payment of aid to needy children.

Recent trends in the case loads under the aged, blind, and children's aid programs have been similar to those shown in the early months of World War II. At that time a stability in number of cases during the early months of the war was followed by a moderate decline in aged aid and a sharp drop in the program of assistance to children. Since the present defense effort is far less pressing than the intense war activity of the earlier period, aged and blind case loads have been estimated to remain relatively unchanged during 1952-53. The number of children's aid cases is expected to decline, but allowance has been made for a slight increase in average payments in the coming fiscal year. Estimates of case loads in 1952-53 show an average of 276,575 recipients of old age security, 12,125 receiving blind aid, and 131,300 in the program of aid to needy children. The latter amount represents a decrease of 6,016 from the estimated average for the current year. Expenditure requirements are summarized in the following tabulation.

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Estimated 1952-53	Change from 1951-52	
				Amount	Pct.
Old age security.....	\$109,626	\$106,672	\$107,134	\$462	0.4
Security for the blind....	5,350	5,590	5,867	277	5.0

† Medical care of aged and blind after the first two months of confinement in county hospitals. Payments are in lieu of assistance to the individuals.

\* State reimbursement to counties for the expense of licensing and inspecting boarding homes for aged and children, and for administrative expense of the adoption program and cost of caring for the children.

## Public Health, \$13,942,000

Historically, subventions for public health have been among the most rapidly growing of state expenditure items. Less than a decade ago payments were limited to the program of tuberculosis subsidies at a cost of approximately \$500,000 annually. In the coming fiscal year, provision is made for assistance in the operation of five programs, costing \$13,942,000. The principal items of increase next year are aid to crippled children, payments for support of local health departments, and assistance in the care and treatment of persons suffering from tuberculosis. Amounts are as follows:

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Estimated 1952-53	Change from 1951-52	
				Amount	Pct.
Local health departments...	\$2,712	\$2,751	\$3,094	\$343	12.5

Totals .....	\$10,663	\$12,635	\$13,942	\$1,307	10.3

\* Including \$302,694 shown under the State Operations in previous years.

## Roads and Streets, \$78,208,000

State apportionments to local governments for roads and streets represent city and county shares of the motor vehicle fuel tax and the counties' share of registration fees. By statutory provision, cities receive an amount equal to five-eighths of a cent per gallon of fuel taxed, while the allotment to counties is equal to one and three-eighths cents per gallon. In addition, county governments receive a share of motor vehicle registration and weight fees. Amounts to be apportioned during 1952-53 are expected to increase moderately, as a result of the higher tax collections anticipated next year. The following data summarize the estimated changes during the budget period.

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Estimated 1952-53	Change from 1951-52	
				Amount	Pct.
For County Roads:

Registration fees .....	7,086	7,804	8,354	550	7.0
Subtotals .....	\$49,612	\$53,738	\$56,379	\$2,641	4.9
For City Streets:					
Fuel tax .....	19,330	20,879	21,829	951	4.6
Totals .....	\$68,941	\$74,616	\$78,208	\$3,592	4.8

## Conservation of Natural Resources, \$4,046,000

Principal item of expenditure in this classification is the aid to county agricultural fairs provided by the statute governing distribution of horse racing revenue. Apportionments during 1952-53 are estimated to be \$2,470,000, a decrease of \$528,000 from the current year, due to a reduction in accumulated balances available for capital outlay. State assistance to counties for agricultural commissioner salaries and allocations for flood control comprise the other payments in this group.

(In thousands of dollars)

	Actual 1950-51	Estimated 1951-52	Estimated 1952-53	Change from 1951-52	
				Amount	Pct.
Aid to fairs.....	\$2,287	\$2,998	\$2,470	—\$528	—17.6

Totals .....	\$5,187	\$5,904	\$4,046	—\$1,857	—31.5

\* 2,550 percent.

## Other Assistance, \$74,717,000

This miscellaneous group of subventions and shared revenues comprises payments by the State for the general support of local government. It includes apportionments of motor vehicle license fee receipts, collected in lieu of local property taxes, liquor license fees, minor amounts of unrefunded aircraft fuel tax available for airports, and a number of general purpose subventions. Vehicle license fee apportionments of \$61,401,000 will be divided equally between cities and counties. Liquor license fee apportionments, estimated at \$8,110,000, will be divided \$6,508,000 to cities and \$1,602,000 to county governments. Apportionments for public works represent essentially the final expenditures from the postwar construction fund established for the benefit of local governments in 1946.

(In thousands of dollars)

DEBT SERVICE.....	\$6,863,122	-----	-----	-----	-----	-----	-----	-----	-----	\$3,707,598
RESERVE FOR CONTINGENCIES.....	\$3,500,000	-----	-----	\$1,035,842	-\$3,435,842	-----	-----	-----	-----	\$1,100,000
TOTALS, State Operations Budget.....	\$308,133,266	-\$2,296,026	\$2,814,574	\$1,311,863	-\$42,348	-\$3,088,753	-\$1,361,125	-\$46,771	-\$4,899,328	\$300,525,352

a Increase in estimated expenditures from legislative contingent funds.

b Employees' retirement contribution was underestimated.

c Flood damage repairs is transferred to the local assistance budget for public works.

d Debt service on public school building bonds is transferred to the local assistance budget for education.

e The change in the capital outlay program is due to the timing of construction. The highway program was increased because additional revenues were available. The civil defense program has been delayed.

f The decrease is due to decrease in case load of needy aged and children.

g Increase due increased revenues from motor vehicle license fees.

## Schedule 11

**STATEMENT OF BONDED DEBT OF THE STATE OF CALIFORNIA**  
**- AS OF NOVEMBER 30, 1951**

This statement does not include bonds issued under authority of state instrumentalities, such as the Toll Bridge Authority, Water Project Authority, Board of State Harbor Commissioners, World Trade Center Authority, and state colleges and the University of California, which bonds are not general obligations of the State.

Name of issue	Rate of interest	Date of maturity	Amount authorized	Amount unsold	Redemption to November 30, 1951	Amount outstanding November 30, 1951	Amounts in sinking funds for payment of principal November 30, 1951
<b>GENERAL OBLIGATION BONDS</b>							
<b>GENERAL FUND</b>							
Sacramento State Buildings of 1913 <sup>1</sup> -----	4%	1965	\$3,000,000	-----	-----	\$3,000,000	\$3,000,000
San Francisco State Buildings of 1913 <sup>1</sup> -----	4%	1916-65	1,000,000	-----	\$720,000	280,000	280,000
State University Buildings of 1915 <sup>1</sup> -----	4½%	1921-65	1,800,000	-----	1,240,000	560,000	560,000
State Buildings and University Buildings of 1925 <sup>1</sup> -----	4-4½%	1932-65	8,500,000	-----	5,000,000	3,500,000	3,500,000
California State Parks of 1927 <sup>1</sup> -----	2½-4½%	1934-57	6,000,000	-----	4,500,000	1,500,000	1,500,000
California Tenth Olympiad of 1927-----	4½%	1932-71	1,000,000	-----	500,000	500,000	500,000
First Highway of 1909-----	4%	1917-61	18,000,000	-----	14,000,000	4,000,000	-----
Second Highway of 1915-----	4½%	1923-62	15,000,000	-----	10,875,000	4,125,000	-----
Third Highway of 1919-----	4¼-5¾%	1926-65	40,000,000	-----	26,000,000	14,000,000	-----
State School Building of 1949-----	1-4½%	1952-76	250,000,000	\$100,000,000	-----	150,000,000	-----
Totals, General Obligation Bonds-----			\$344,300,000	\$100,000,000	\$62,835,000	\$181,465,000	\$9,340,000
<b>SELF-LIQUIDATING BONDS<sup>2</sup></b>							
<b>SAN FRANCISCO HARBOR IMPROVEMENT FUND</b>							
San Francisco Harbor Improvement of 1909 <sup>5</sup> -----	4%	1985	\$9,000,000	-----	\$5,073,000	\$3,927,000	\$75,635
San Francisco Harbor Improvement of 1913 <sup>5</sup> -----	4%	1989	10,000,000	\$550,000	-----	9,450,000	3,936,508
San Francisco Harbor Improvement of 1929 <sup>7</sup> -----	1½-3¼%	1952-76	10,000,000	1,500,000	-----	8,500,000	116,652

Veterans' Welfare of 1933-----	2¼-3%	1937-56	30,000,000	-----	26,130,000	3,870,000	-----
Veterans' Welfare of 1943-----	1¼%	1947-66	30,000,000	-----	6,200,000	23,800,000	-----
Veterans' Welfare of 1946-----	2-2½%	1949-71	100,000,000	-----	5,610,000	94,390,000	-----
Veterans' Welfare of 1949-----	1½-4%	1952-71	100,000,000	\$25,000,000	-----	75,000,000	-----
Totals, Veterans' Welfare Bonds-----			\$280,000,000	\$25,000,000	\$55,333,000	\$199,667,000	-----
TOTALS, SELF-LIQUIDATING BONDS-----			\$310,000,000	\$27,197,000	\$60,797,000	\$222,006,000	\$4,144,391
TOTALS, ALL BONDS-----			\$654,300,000	\$127,197,000	\$123,632,000	\$403,471,000	\$13,484,391
Less: Amounts in Sinking Funds, November 30, 1951, Available for Payment of Principal-----						13,484,391	-----
NET BONDED DEBT-----						\$389,986,609	-----

<sup>1</sup> Chapter 611, Statutes 1943, and Chapter 1492, Statutes 1945, appropriated \$26,239,738.75 to the Bond Sinking Fund of 1943 for the purpose of paying the principal and interest on these issues to final maturity.

<sup>2</sup> In addition there is \$28,313 in the Olympic Bond Fund and \$4,069,375 in the Bond Sinking Fund of 1943 which is available for payment of interest.

<sup>3</sup> The servicing of these bonds is primarily the obligation of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund; however, they are in last analysis general obligation bonds.

<sup>4</sup> In addition there is \$263,888 in the Seawall Sinking Funds and \$7,700 in the India Basin Sinking Fund of 1909 which is available for payment of interest.

<sup>5</sup> Callable on or after January 2, 1951, in the amount available in the sinking fund.

<sup>6</sup> Callable on or after January 2, 1955, in the amount available in the sinking fund.

<sup>7</sup> \$500,000 callable on or after March 1, 1971.

<sup>8</sup> Callable on or after January 2, 1941, in the amount available in the sinking fund.

# Salaries and Wages

## **Position Titles**

In the detailed departmental and agency budgets, positions included in the state civil service have been set forth under the official class titles established therefor by the Personnel Board. Positions exempt from civil service have been listed by their departmental titles, as set forth on the official roster of employees maintained by the Personnel Board, or as maintained by the State Controller under the central pay installation.

## **Positions Now Authorized**

In general, the positions included under this heading are those which were established as of July 1, 1951, together with those for which funds were provided in the 1951-52 Fiscal Year Budget or otherwise authorized as of that date and authorized revisions thereof. Amounts shown for positions now authorized represent actual salary payments for 1950-51 and estimated salary payments during 1951-52 and 1952-53, assuming full year employment, unless the position is estimated to be established materially later than July 1, 1951. In such cases only the cost from date of establishment is shown.

Replacement of positions at a higher level either (a) upon completion of a training period or (b) after temporarily "down grading" are included under this heading. Such transactions are indicated by showing both class titles on the same line, with a salary range of the minimum salary of the lower class and the maximum of the higher class. Examples: (a) administrative trainee-junior staff technician, \$255-358, (b) junior-intermediate clerk, \$190-255.

Continuation during 1952-53 of positions authorized temporarily until June 30, 1952, are included under "Positions Now Authorized." These positions may be identified by an explanation in parentheses indicating the extent of the continuation, such as: (extended to December 31, 1952) or (extended to permanent).

## **Proposed New Positions**

Proposed positions for the budget year which have not yet been established or authorized have been listed under this heading. Proposed increases in time of part-time positions are also listed under this heading, if the increase amounts to one-half time or more; otherwise the position is shown under "Positions Now Authorized" on the increased time basis.

Proposed new positions include upward replacement of positions only to extent that they involve major organizational changes.

## **Estimated Salary Savings**

Unless indicated to the contrary by experience and anticipated conditions, a lump sum deduction is made

from each group total of salaries and wages in anticipation of savings which are estimated to accrue because of temporarily vacant positions, and the lower entrance rates of salary at which replacement personnel are paid.

The amounts of such estimated savings may not correspond to the number of positions deducted because of adjustments to the latter for positions authorized to start after July 1. The amounts shown opposite such positions are for the estimated costs for the period of occupancy only and, therefore, there is no money savings to be anticipated.

## **Number of Positions**

Filled positions in 1950-51 are counted to the nearest tenth of full-time and full-year employment, except for members of boards and commissions, temporary help, etc.

Authorized positions for 1951-52 and 1952-53 are counted to the nearest tenth of full time. Full-time positions authorized to start later than July 1st are counted as full positions, but the totals are adjusted for the unused time by a deduction under estimated salary savings.

Where more than one part-time position of the same class appears under a single function, the number of separate part-time positions is indicated opposite the word "Individuals." Such items and all other items enclosed in parentheses in the number of positions columns are excluded from position totals.

## **Salary Range**

Rates of pay listed under this heading represent salary ranges established by the State Personnel Board for civil service classifications, or fixed by the appointing authority and approved by the Director of Finance for each class of exempt position.

The amounts shown indicate (1) the minimum rate and (2) the maximum rate. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate payable to an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board on July 25, 1947, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than \$10. This plan is used also for many salaries fixed for exempt positions. A table of salary ranges in the state service is included at the end of this section. Thus, \$220-268 indicates a monthly salary range having steps of \$220-\$231-\$243-\$255-\$268. Salary ranges for instructional positions in the state colleges and in other state agencies are set forth below.

## Schedule of Usual Salary Ranges in the State Service \*

Range No.	Steps					Range No.	Steps				
9 -----	\$140	\$150	\$160	\$170	—	31 -----	\$436	\$458	\$481	\$505	\$530

### EXTENT OF PROFESSIONAL PREPARATION

- CLASS I** Persons whose academic or professional preparation is deemed equivalent to four years beyond high school graduation or holders of recognized Bachelor's degrees.
- CLASS II** Persons whose academic or professional preparation is deemed equivalent to five years beyond high school graduation or holders of recognized Master's degrees.
- CLASS III** Persons whose academic or professional preparation is deemed equivalent to six years beyond high school graduation.
- CLASS IV** Persons whose academic or professional preparation is deemed equivalent to seven years beyond high school graduation or holders of recognized Doctor's degrees.

<sup>a</sup> Based on salaries effective January 1, 1951.

<sup>b</sup> Limited to persons holding this class and rank prior to adoption of salary schedule—therefore maximum only is paid.

<sup>c</sup> Budgetary limitations on appointment to each rank are 15% to 20% for Instructor, 25% to 35% Assistant Professor, 20% to 25% Associate Professor, and 25% to 35% for Professor, of total authorized teaching positions.

# Salary Schedule for Instructional Positions—Other State Agencies

(Ranges and Criteria of Application for Teachers)

Range	Steps				
A -----	\$268	\$281	\$295	\$310	\$325
B -----	281	295	310	325	341
C -----	295	310	325	341	358
D -----	310	325	341	358	376
E -----	325	341	358	376	395
F -----	341	358	376	395	415

CRITERIA FOR RANGE DETERMINATION		ACADEMIC (Preparation)	VOCATIONAL (Preparation)
Range A	Emergency or special credential, without bachelor's degree.		—
Range B	Bachelor's degree or regular elementary junior high, or kindergarten-primary credential.		—
Range C	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential: plus 12 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential.		Three years experience as journeyman craftsman.
Range D	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential: plus 24 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential or regular general secondary credential.		Qualification for special secondary vocational Class A Credential in T and I and PS Education.

## Merit Salary Adjustments

Subject to availability of funds, Section 18856 of the Government Code requires that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in which his service rating is equal to or above a reasonable minimum, which has been fixed by the Personnel Board as "Standard."

Provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions. Inasmuch as turnover of personnel generally results in replacement at a lower step in the salary range, the amount budgeted for salary adjustment opposite each position is offset by a lump sum deduction for downward adjustments included in the deduction for "estimated salary savings."

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

## Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.

2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty and responsibility of the work.

3. Conditions of work in the class.

4. The adequacy of existing appropriations which may be used for salary increase purposes.

The rates of pay of a group of approximately 1,000 laborers, workmen, and mechanics in the state service are established at the hourly wage rates negotiated with private contractors in the county in which they are employed. They receive all the collateral benefits, such as premium pay for night work and overtime received by employees in private industry and, in addition, they receive the added state benefits of vacation and sick leave with pay, plus 5 cents and 10 cents an hour increase after one and two years' employment with the State.

The salary ranges shown are, in general, those in effect on November 3, 1951, and salaries and wages expenditures for both the 1951-52 and 1952-53 Fiscal Years reflect rates of pay then in effect. Statutory salaries are provided for at rates inclusive of enactment by the 1951 Legislature (Chapter 1613, Statutory Salary Equalization Plan, and other special enactments).

Further anticipated special salary range revisions by the Personnel Board, between November 3, 1951, and July 1, 1952, for 1951-52 and the cost of continuing these adjustments during 1952-53 is included under the heading "Provision for Salary Increases."

11					<b>(23.6%)</b>
12	<b>GENERAL ANALYSIS</b>				
13	<i>Number of positions-----</i>	<i>47.3</i>	<i>49.3</i>	<i>49.3</i>	
14	The increase of \$65,014 in net appropriation is caused primarily by the increase in the number of days in the legislative session. The				
15	1950-51 Fiscal Year is a more comparable year with the 1952-53 Fiscal Year. Provision is made to purchase five electric type				
16	writers to replace old worn out machines. Provision is also made to purchase additional books to keep the present library in a current				
17	condition.				
18	The amount of estimated reimbursements to be received from the Code Commission is based on furnishing approximately the same amount				
19	of services as in the 1950-51 Fiscal Year.

## GENERAL ANALYSIS

The decrease in the proposed budget reflects an estimate of the amount of work to be performed by the Legislative Counsel Bureau in accordance with experience during the 1950-51 Fiscal Year. The original program of the Code Commission should be substantially complete in 1953. The legislative program should be completed by December 1, 1952. Thereafter and during the Session, some work will be performed, but not to the extent during the interim. The amount of work should be nearly the equivalent to that performed during the past year.

## JUDICIAL COUNCIL

The Judicial Council surveys the condition of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. It also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.

## Governor's Office

## OFFICE OF CIVIL DEFENSE

Pursuant to Chapter 1, Division 7, Military and Veterans Code, as amended (Civil Defense Act of 1950) the Governor has assigned the duties thereunder to personnel in his office, known and referred to as the Office of Civil Defense. This office is responsible for coordinating the plan and program for the civil defense of the State.

## GENERAL ANALYSIS

20	Number of positions	55	139	161	22
21	Provision is made for bringing the staff to the minimum operating level as planned in January, 1951.				
22	<b>SALARIES AND WAGES:</b> A nursing consultant position is provided to plan and organize nursing activities, to coordinate activities between nursing groups and regional operational medical and health services.				
23	Five additional positions are required for the Division of Radiological Services to bring the staff of that division to its minimum operating level.				
24	One additional position is provided for the Division of Accounting to relieve the accounting officer of many routine duties, and provide additional assistance for maintaining adequate property records on the large volume of technical equipment and supplies to be acquired.				
25	Two additional positions and a temporary help allotment are provided for the clerical pool to carry the additional work load anticipated to result from the proposed new positions and the filling of currently authorized vacant positions. Personnel for the vacant positions are being employed as rapidly as they can be recruited.				
26	It is anticipated that technical positions will be filled and that only normal vacancies resulting from turnover will result during the budget year.				
27	<b>OPERATING EXPENSES:</b> The increase is due principally to items that have been financed from Other Current Expenses and Capital Outlay appropriations during the 1951-52 Fiscal Year. These items are of a recurring nature and therefore are budgeted as support expenditures for the 1952-53 Fiscal Year. Other increases result from the additional filled positions anticipated in the budget year.				
28	<b>EQUIPMENT:</b> Provision is made for replacement of the hand-driven mailing machine with an electric model; furniture and equipment for the new positions; two additional dictating machines for division chiefs; filing equipment; film and projection equipment; and map and charting equipment.				
29	<b>REIMBURSEMENTS:</b> This item results from the reassignment of building space to the Department of Mental Hygiene. The space is now under lease to the Office of Civil Defense which pays the rent and is reimbursed by the Department of Mental Hygiene. The lease expires March 31, 1952.

## CONTINGENT EXPENSES

## Analysis

Provision is made for completing the program of screening civil defense volunteers through a contractual arrangement with the Department of Justice for processing the fingerprints. This program was originally budgeted for completion in the 1951-52 Fiscal Year at a cost of \$100,000; however, due to a delay in starting it is estimated that only one-half of the program will be completed during the current year.

## STATE EMPLOYEES' RETIREMENT SYSTEM

The Board of Administration, State Employees' Retirement System, administers the State Employees' Retirement System and the Legislators' Retirement System. This involves determination of membership, computation, collection, and recording of employer contributions and member contributions, service and compensation; the computation and payment of withdrawals of member contributions and death and retirement benefits; the investment of funds; the preparation of periodic and special valuations; the preparation of annual and special reports. Members of the State Employees' Retirement System consist of state employees and employees of approximately 310 local governmental jurisdictions participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

The board also is charged with the recording of payroll deductions for state employees who request deductions for the purchase of United States Defense Savings Bonds; and the registering and issuance of these bonds to employees.

## ADMINISTRATION

## Analysis

**SALARIES AND WAGES:** The increase of \$14,408, is due to six proposed new positions, five of which are required for increased work load and a compensation claims adjuster because of increased work load and the reallocation of work load from the consulting actuary and assistant actuary. A portion of the cost of these new positions is offset by a reduction in temporary help which is possible due to nonrecurring activities and additions to the permanent staff.

**OPERATING EXPENSES:** The increase of \$2,910 is due to increases in work load and prices.

**EQUIPMENT:** The amount of \$22,102 provides for additional safe files for expansion of membership and accounting records and increases the present complement of files which is inadequate to house current records; equipment for the proposed new positions; and replacement of furniture, a typewriter, and a wax cylinder shaving machine.

**REIMBURSEMENTS:** The increase of \$31,310 is due to the estimated increase in contracting public agency members plus the increase in the unit cost per member for administrative expenses. Provision is made for an anticipated increase in the unit charge.

<sup>a</sup> Composed of savings in salaries and wages, \$4,017; operating expenses, \$1,935; equipment, \$73; and excess reimbursements, \$4,420.

U. S. DEFENSE SAVINGS BONDS							
Analysis							
This unit records the funds deducted from salaries of state officers and employees for the purchase of U. S. Defense Savings Bonds. It purchases bonds from the United States Federal Reserve Bank, registers and issues such bonds to the purchaser in accordance with State Board of Control rules and the provisions of Section 20122 of the Government Code.							
SALARIES AND WAGES: The increase of \$6,298 is provided to process an estimated \$5,000 monthly pay roll deductions. The estimated vacancies in the five authorized positions in 1951-52 are due to the smaller volume of work load resulting from the delay in activating and publicizing the program.							
OPERATING EXPENSES: The increase of \$287 is due to the anticipated work load increase.							
SALARIES AND WAGES:							
Senior account clerk -----	—	1	1	\$255-310	\$3,060	\$3,216

## GENERAL ANALYSIS

The principal item of expenditure is \$25,000 which is the same amount that has been paid each year since 1948-49 for a contract with the Council of State Governments.

The Council of State Governments is a research and service agency serving the over-all legislative, administrative, and judicial agencies of State Government such as state legislatures, the Governors' Conference, the Conference of State Chief Justices, the National Associations of Attorneys General, Secretaries of State, budget officers, purchasing officials, etc.

## BOARD

## Analysis

This division includes the members of the State Personnel Board and the hearing officer with their clerical staff. The board adopts rules creates classes, establishes pay ranges, hears appeals from disciplinary actions, and formulates general policies.

**SALARIES AND WAGES:** The increase of \$2,500 is due to the change in the salary of the board members by Chapter 1613, Statutes of 1951, which became effective October 1, 1951.

**OPERATING EXPENSES:** The slight increase is due to anticipated price increases.

**EQUIPMENT:** Provision is made for miscellaneous items in the amount of \$150.

13	CLASSIFICATION							
14	Analysis							
15	This division classifies positions in accordance with duties performed and maintains a roster of all state employees.							
16	SALARIES AND WAGES: The increase is due to a proposed new assistant personnel technician position required for additional work load as indicated by the continuing increase in the number of civil service employees.							
17	OPERATING EXPENSES: The increase is due to anticipated price increases.							
18	EQUIPMENT: Provision is made for replacement of worn out furniture and typewriters at a cost of \$1,063; additional furniture for the new position in the amount of \$219; files for expansion of records in the roster section, \$2,084; and \$150 for miscellaneous equipment items.

18	EXAMINING AND RECRUITING							
19	Analysis							
20	This division recruits and examines qualified personnel for state service; maintains employment lists; and conducts certification and placement activities.							
21	OPERATING EXPENSES: The increase of \$21,882 is due to additional recruitment printing, advertising, and postage in the amount of \$8,900 which is necessitated by the increasing difficulty being experienced in filling positions throughout state service; \$4,000 for the purchase of examination material which was furnished previously by the Department of Public Health; \$3,500 additional rent for examination rooms as a result of Chapter 617, Statutes of 1951, which provides that the governing board of any school district may charge for the use of school facilities, an amount sufficient to cover the cost of supplies, utilities and salaries necessitated by such use; and price increases.							
22	EQUIPMENT: Provision is made for replacement of worn out furniture, typewriters and dictating equipment at a cost of \$1,885; new dictating equipment for the San Francisco office at a cost of \$702; additional filing equipment and a typewriter for the Recruitment Section in the amount of \$1,072.

45	OFFICE SERVICES						
46							
47	Analysis						
48							
49	This division performs clerical work; processes applications, arranges, administers, scores, and processes examinations; establishes						
50	eligible lists and maintains statistical data.						
51							
52	OPERATING EXPENSES: The net decrease of \$479 is due to the elimination of rent on a microfilm reader which is budgeted to be						
53	purchased in 1952-53 (with previous rental charges applied on the purchase price); reduction in traveling expenses due to com-						
54	pletion of the examination proctor training program in 1951-52; reduction in printing and office expense because of savings to						
55	result from the contact printer budgeted under equipment. The above savings are partially offset by price increases.						
56							
57	EQUIPMENT: Provision is made for replacement of worn out furniture and typewriters in the amount of \$1,730; additional files to						
58	increase the retention period from two to four years for examination applications, at a cost of \$2,300; a contact printer, \$225; a						
59	microfilm reader at a net cost of \$404 (total selling price \$745, less \$341 rental credit paid in current year); additional files for						
60	expansion in the amount of \$736; and other miscellaneous items, \$877.						
61

1	<b>TRAINING</b>						
2	<b>Analysis</b>						
3	This division coordinates training activities for the various state agencies.						
4	<b>SALARIES AND WAGES:</b> The increase of \$5,172 is due primarily to the proposed new associate personnel technician position. This position is proposed for the purpose of directing the training of supervisors in the state civil service through a series of conferences to be held in several locations throughout the State.						
5	<b>OPERATING EXPENSES:</b> The increase of \$792 is due to the new position and price increases.						
6	<b>EQUIPMENT:</b> Provision is made for replacement of one drop center desk at a cost of \$185; additional books and films, \$260; a tape recorder, \$225; furniture for the new position, \$219; and \$50 for miscellaneous equipment items.

36	<b>COOPERATIVE PERSONNEL SERVICES</b>						
37	<b>Analysis</b>						
38	The operations of this division are governed by the requests of local agencies for personnel services which are performed on a contractual basis by which the cost of such services is repaid to the State. The total cost is to be reimbursed and therefore no increase in the net appropriation is required for this function.						
39	<b>OPERATING EXPENSES:</b> The increase of \$530 is due to price increases.						
40	<b>EQUIPMENT:</b> Provision is made for replacement of a worn-out typewriter, \$142; additional files for expansion, \$603; and miscellaneous equipment items, \$160.						
41	<b>REIMBURSEMENTS:</b> The amount estimated to be collected exceeds the budgeted expenditures because certain overhead items, which constitute an indirect cost, must be collected, although such items are not budgeted as direct expense of this function.

## GENERAL ANALYSIS

23	Number of positions—General Fund-----	35.5	36.3	38.3	2
24	Number of positions—Collection Agency Fund-----	5	5	5	-

This budget provides generally for continuation of the existing level of service except for the establishment and operation of a record preservation laboratory at a cost of \$19,676.

Work load is expected to continue at approximately the same volume as indicated by the following data.

WORK LOAD	ACTUAL 1948-49	ACTUAL 1949-50	ACTUAL 1950-51	ESTIMATED 1951-52	ESTIMATED 1952-53

## ADMINISTRATION

## Analysis

**SALARIES AND WAGES:** Increase of \$5,689 results from the following: \$2,750 increase in funds for the hiring of election clerks required in connection with the primary and general elections in 1952. The remainder of the increase represents \$2,280 for one proposed new junior clerk position to care for the increased work load and activity in the Archives Section, and a small reduction in salary savings.

**OPERATING EXPENSES:** Increase of \$2,201 due to price or rate increases in: (1) office expense (\$462); (2) printing expense (\$2,032) price increases plus increase in amount of election printing; (3) telephone and telegraph (\$103); (4) postage (\$660); (5) automotive expense (\$72) increase in estimated mileage; (6) other minor amounts due to price increases. These increases are offset by the following decreases: (1) (\$600) non-recurring expense of office move; (2) photocopying (\$50) and (3) trade-mark file guides (\$600) are nonrecurring expenses.

**EQUIPMENT:** Amount proposed \$2,189 includes: (1) replacement of two typewriters at a cost of \$234; (2) purchase of 15 3-drawer legal files at a cost of \$1,455 for corporation records—normal growth of files; (3) legal books at a cost of \$300; (4) miscellaneous items at a cost of \$200.

**REIMBURSEMENTS:** It is estimated that charges to other state agencies for photostat services will remain at \$7,500, the level experienced during 1950-51.

58								
59								
60	CENTRAL RECORDS DEPOSITORY							
61								
62	Analysis							
63								
64	This bureau was established in accordance with the provisions of Section 12260 of the Government Code for the receipt and custody of							
65	all records required or permitted by law to be deposited in the office of the Secretary of State.							
66								
67	The principal item provided in this function is the records preservation laboratory including the salary of one position, supplies,							
68	services and equipment for a total cost of \$19,676. This proposed expenditure is justified on the basis that there are many valuable							
69	state records which are rapidly deteriorating and which must be preserved for posterity. This equipment will insure that these							
70	records will not deteriorate further.							
71								
72	SALARIES AND WAGES: The decrease of \$1,046 is due to the following: Decrease of \$4,600 in temporary help, offset by one pro-							
73	posed new junior chemist position at a cost of \$3,540 required to operate the records preservation laboratory which is included in							
74	the equipment requested.							
75								
76	OPERATING EXPENSES: The increase of \$1,138 is due to the following: (1) Traveling increase of \$500 for chemist's trip east; (2)							
77	record preservation laboratory supplies, \$1,500; and (3) other minor increases due to price increases partially offset by (1)							
78	decrease in rental of microfilming equipment, \$510, resulting from purchase of unit; (2) decrease in freight, cartage, and express							
79	(\$100) for nonrecurring move of records from vault in capitol building to Central Records Depository.							
80								
81	EQUIPMENT: The proposed \$15,606 includes (1) purchase of an additional microfilming unit at a cost of \$1,270, due to expansion of							
82	microfilming program; (2) record preservation laboratory equipment at a total cost of \$14,136; and (3) miscellaneous items at a							
83	cost of \$200.							
84

1	<b>COLLECTION AGENCY DIVISION</b>				
2					
3					
4	<b>Analysis</b>				
5					
6	This division licenses and supervises collection agencies in accordance with the provisions of the Collection Agencies Act, Act 1460 of				
7	the General Laws of California.				
8					
9	<b>SALARIES AND WAGES:</b> The increase of \$194, is caused by minor adjustments.				
10					
11	<b>OPERATING EXPENSES:</b> The decrease of \$518 is attributed principally to a \$730 reduction in printing expense because the Collec-				
12	tion Agency Law will not be printed in the budget year, and is offset by minor increases in other items totaling \$212 due to				
13	anticipated price increases.				
14					
15	<b>EQUIPMENT:</b> The proposed amount of \$212 includes the replacement of one typewriter at a cost of \$112, and miscellaneous items at				
16	a cost of \$100.

## DEPARTMENT OF AGRICULTURE

Administers and enforces the provisions of the Agricultural Code and related statutes. These laws call for regulatory and service activities dealing with the protection of plantings and livestock from infectious diseases, pest animals, weeds and injurious insects, and with aids to insure the marketing of quality agricultural products. In this broad field of activity the department cooperates extensively with the United States Department of Agriculture on the one hand and with county agricultural services on the other. The General Fund finances activities which are of general public benefit and the Department of Agriculture Fund finances other activities for which the beneficiaries are charged.

Headquarters Office at Sacramento

1	<b>GRAPE LEAF SKELETONIZER ERADICATION</b>						
2	<b>Analysis</b>						
3							
4	The decreases in the current year and in the budget year are due to carryover of insecticides on hand and not needed in such extensive applications; and due to less requirements in field equipment items, because of the change in procedure from an eradication to a holding or delaying program pending the development of biological control measures.						
5

1	<b>ORIENTAL AND OTHER FRUIT FLY SURVEY AND</b>						
2	<b>HOST TESTS</b>						
3							
4							
5	<b>Analysis</b>						
6							
7	A reduction in survey effort is permitted by favorable biological control in the Hawaiian Islands which minimizes the danger of intro-						
8	duction to the mainland. Further survey will be restricted to the summer months in the coastal areas of Santa Barbara County						
9	south of the Mexican border and to the immediate vicinity of airports and maritime ports receiving direct plane and ship arrivals						
10	from the islands, excepting that county agricultural commissioners will be supplied with traps and lures for such survey as they						
11	wish to undertake at the county level.

38	<b>CHERRY FRUIT FLY ERADICATION</b>						
39							
40	<b>Analysis</b>						
41							
42	An incipient infestation of cherry fruit fly found in domestic cherries at two points along the Klamath River 50 miles west of Yreka and						
43	in adjacent Scott Valley in Siskiyou County is being brought under suppressive measures as a special project. This is a major pest						
44	of cultivated cherries in certain eastern states and in the northwest; a crop which shows an average annual return to California						
45	growers close to \$10,000,000. This project was initiated under general entomology during the past year but is considered of such						
46	extent that it is being set up as a special project for the current and budget years.

DEPARTMENT OF AGRICULTURE—Continued

General Fund Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1							
2	BUREAU OF PLANT QUARANTINE						
3							
4	Analysis						
5							
6	This bureau enforces state and federal plant quarantine laws, rules and regulations, maintains maritime inspection stations at San						
7	Francisco, San Pedro and San Diego; and 18 border agricultural inspection stations on the principal interstate highways. Mari-						
8	time shipping is holding steady but border travel shows a 20% increase by actual count during the first seven months of 1951						
9	over the same period a year ago.						
10	One new supervising plant quarantine inspector is recommended to effect coordination and provide closer supervision of quarantine						
11	enforcement work being performed by the county agricultural commissioners. Delays in shipments due to lack of knowledge of quar-						
12	antine regulations and procedures should be minimized.						
13	Two junior plant quarantine inspectors are recommended, in lieu of an equivalent amount of seasonal help at Lake Tahoe and Yermo						
14	stations.						
15

35	<b>BUREAU OF PLANT PATHOLOGY</b>						
36							
37	<b>Analysis</b>						
38							
39	The work of the Bureau of Plant Pathology concerns the detection, control, suppression, eradication, and prevention of the introduction						
40	and spread of serious and destructive plant diseases. The bureau deals with infectious and contagious diseases of plants as distin-						
41	guished from insect pests. The diseases caused by plant viruses and by plant parasitic nematodes in particular have added greatly						
42	in recent years to the need for constant vigilance and action for the protection of our agricultural and horticultural industries						
43	against plant diseases. The program for this function in the budget year is planned on substantially the same basis as for the cur-						
44	rent year.

49	<b>BUREAU OF RODENT AND WEED CONTROL AND SEED INSPECTION</b>						
50	<b>Analysis</b>						
51	This program is concerned with the eradication and control of noxious weeds and poisonous plants where found to be detrimental to agriculture or livestock; the control of field rodents to reduce the destruction of crops and the control of rodents which are known to harbor disease transmissible to humans; also seed inspection work for the enforcement of the California Seed Law and in cooperation with the Federal Government for the enforcement of the Federal Seed Act. The program for this function in the budget year is planned on substantially the same basis as for the current year. The main portion of the increase is for additional laboratory equipment and replacement of automobiles.

1	PREDATORY ANIMAL CONTROL						
2							
3							
4	Analysis						
5							
6	This program is concerned with the control of wild predatory animals such as coyotes, bobcats, mountain lions and bears for the pro-						
7	tection of sheep, cattle, poultry, and certain types of crops. It is a three-way activity in cooperation with the Federal Govern-						
8	ment, various counties and the State. The budget is predicated upon a continuation of the existing level of service.						
9

41							
42	SPRAY RESIDUE AND INJURIOUS MATERIALS						
43	ENFORCEMENT						
44							
45	Analysis						
46							
47	This function enforces provisions of the Agricultural Code which protect consumers from poisonous spray residue on fresh and dried						
48	fruits and vegetables. Also it administers regulations concerning the use and application of injurious materials, which is a rela-						
49	tively new function added to the Agricultural Code by Chapter 1295, Statutes of 1949.						
50	One new field supervisor, agricultural pest control work is recommended for this new function in the San Joaquin Valley where there						
51	is inadequate coverage at present. Violation complaints must be handled promptly as postponement can result in loss of evidence.						
52							
53	SALARIES AND WAGES				SALARY RANGE

28	<b>BUREAU OF LIVESTOCK DISEASE CONTROL</b>						
29	<b>Analysis</b>						
30	This function is concerned with the control of infectious and contagious diseases of livestock and poultry; the operation of the state-wide bovine brucellosis and bovine tuberculosis programs; the operation of diagnostic laboratories at Sacramento, San Gabriel, Petaluma, Turlock, and, during the current year commencing October 1, 1951, a new laboratory at Fresno.						
31	One new intermediate typist-clerk is recommended to handle increased clerical work for the increasing number of calves vaccinated and cattle tested.						
32	One laboratory helper is recommended for washing glassware and laboratory equipment at the San Gabriel laboratory, where the number of specimens examined has increased.

1	GENERAL MARKETING SERVICE						
2	Analysis						
3	This service consists of the following: (1) assistance in the solution of marketing problems of agricultural groups which are not organ-						
4	ized under formal marketing laws; (2) assistance to new industries in formulating and obtaining marketing programs under the						
5	general marketing laws; and (3) administration of the marketing programs formulated under general marketing laws. The General						
6	Fund is reimbursed for all expenditures for the latter two types of services from deposits received and assessments collected. Two						
7	new positions are recommended; one of auditor II and one of intermediate stenographer-clerk. These positions are requested to						
8	handle the increased work load resulting from the formulation of additional marketing programs, the enlargement by amendmen-						
9	of existing programs, and requests from other industries for assistance in formulating and obtaining marketing programs.

1	<b>BUREAU OF MARKET NEWS</b>						
2	<b>Analysis</b>						
3							
4							
5							
6	The Bureau of Market News operates in California as the Federal-State Market News Service. Daily reports are published on the						
7	marketing of agricultural commodities in intrastate, interstate and foreign markets, containing data on prices, market conditions,						
8	demand, supply, truck and carlot movements, truck unloads, cold storage holdings and other related information. Commodity						
9	groups included in this service are fresh fruits and vegetables; livestock and dressed meats; dairy and poultry products; hay, grain						
10	and feedstuffs; dried fruits, bulk wine, honey, dried edible beans, and other miscellaneous products. Included in operating ex-						
11	penses and equipment is provision for the continuing program of modernization and mechanization of the Market News Service						
12	radiotelegraph network. This mechanization program provides for the changeover during a four-year period of a manually oper-						
13	ated system. The last legislature at the request of the Tokay grape industry augmented the Bureau's budget for the current year						
14	to provide a seasonal office at Lodi. This extension is based on the fact that the producing area is removed a significant distance						
15	for existing market news facilities and that the product is too specialized to benefit from market news provided for all grapes.						
16

		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	<b>BUREAU OF WEIGHTS AND MEASURES</b>						
2	<b>Analysis</b>						
3	This bureau licenses and regulates the operations of public weighmasters, and supervises and renders technical assistance to county sealers of weights and measures.						
4	One additional position of Weighing and Measuring Equipment Inspector plus related operating expenses and testing equipment is recommended for testing of liquified petroleum gas measuring devices. Although this is primarily a county responsibility, the expense of the testing equipment, etc., as compared to the number of measuring devices in any one county precludes most individual counties from doing the testing.

20							
21	DIVISION OF PLANT INDUSTRY						
22	NURSERY SERVICE						
23	Analysis						
24	This service is charged with the regulation of the movement of nursery stock to prevent the distribution of pests; the licensing of per-						
25	sons engaged in the nursery business; and the registry and certification of trees and plants as to freedom from pests. The decrease						
26	from the current year is principally because the biennial directory of nurserymen is published and distributed only in alternate						
27	years. A supplement of new licensees only will be published in the budget year.						
28

1	BUREAU OF FIELD CROPS						
2							
3							
4	Analysis						
5							
6	This bureau is charged with inspection and registration of public grain warehouses for insect control purposes, enforcement of the						
7	proper labeling of commercial feeding stuffs through inspection and analysis, optional licensing, bonding and inspection of ware-						
8	houses storing agricultural products, and inspection and grade certification under U. S. standards, upon application, of such field						
9	crops as grain, flaxseed, rice (rough and milled), beans, peas, hay, and hops. No change is contemplated in operations from the						
10	current year except the addition of one auditor, grade II, for audit of self-assessed tax which becomes effective July 1, 1952,						
11	under Chapter 115, Statutes of 1951; and one junior typist-clerk in lieu of temporary help due to increased grain inspections						
12	at Stockton.

1	BUREAU OF MILK CONTROL						
2							
3							
4	Analysis						
5							
6	This bureau administers and enforces the laws relating to the establishment of the price for fluid milk which distributors pay to pro-						
7	ducers and minimum wholesale and minimum retail prices. There are 34 separate marketing areas in the State where producer						
8	and resale prices are established. The bureau also licenses and bonds market milk distributors, establishes minimum refrigeration						
9	rental schedules, and enforces the unfair trade practice provisions as they relate to the dairy industry.						
10	No change in program is contemplated.

14	CANNING TOMATO INSPECTION						
15	Analysis						
16	This service involves the compulsory inspection of all loads of canning tomatoes received by processors and delivered by growers. This activity is governed by the tonnage of tomatoes marketed by growers to canneries. In 1951-52 it is estimated about 2,500,000 tons will be inspected; however, in 1952-53 a return to a normal inspection of about 1,000,000 tons is anticipated. Equipment includes \$4,500 for 150 tables for more efficient use of color-meters allowed by Chapter 66, Statutes of 1951.

25	SHIPPING POINT INSPECTION						
26	Analysis						
27	This bureau, in cooperation with the United States Department of Agriculture, makes inspections and issues federal-state certificates covering pack, size, quality, condition and grade of fruits, nuts, and vegetables based on U. S. Standards or other recognized standards. This service is furnished on requests of shippers or other financially interested parties and the income and expenditures are governed by the volume of products offered for inspection. It is contemplated that the activities will continue at approximately the same level as the current year.

## DEPARTMENT OF CORRECTIONS

The department has been established to integrate and correlate the correctional activities of the State. It is responsible for the administrative control and operation of all state institutions for adult felons. The department also inspects prisons and jails and makes recommendations on plans and specifications of facilities costing \$1,500 or more.

## GENERAL ANALYSIS

Number of positions ----- 46.8 50 57

The increase is primarily due to three proposed new positions, a program of microfilming inmate records and temporary help and expenses necessary to complete the final report of the commission on organized crime.

<sup>a</sup> These expenditures reported in Board of Corrections budget prior to the 1951-52 Fiscal Year.

<sup>b</sup> Composed of savings in salaries and wages, \$2,906; operating expenses, \$5,799; equipment, \$144; and loss in reimbursements, \$133.

<sup>c</sup> Composed of savings in operating expenses, \$3,827.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1							
2	<b>ADMINISTRATION</b>						
3							
4	The administration staff supervises and coordinates the following functions: (1) accounting, budgets and business management, (2)						
5	personnel and in-service training of employees, (3) maintenance and upkeep of plant, and construction, (4) feeding and nutrition,						
6	(5) custody and treatment, (6) prison industries, (7) compilation and dissemination of crime study data.						
7							
8	<b>Analysis</b>						
9							
10	<b>SALARIES AND WAGES:</b> The increase of \$35,183 is primarily due to the following proposed new positions:						
11	1 Semisenior accountant						\$4,296
12	This position will provide assistance to the departmental accounting officer by doing much of the routine						
13	tasks in the office so that the accounting officer can make more field trips to help the individual institutions						
14	with their accounting problems.						
15	1 Intermediate typist-clerk						2,520
16	This position will render clerical assistance in the personnel section. The personnel of the department and						
17	related documentation has increased greatly over the past several years without any increase in the clerical						
18	personnel in this section.						
19	1 Chief prison records officer						5,496
20	This position will head up the centralized inmate record section currently supervised by the Chief of the						
21	Bureau of Statistics, Department of Justice.						
22	In addition the following positions are to be transferred to Departmental Administration from the Adult						
23	Authority effective July 1, 1952:						
24	1 Supervising clerk I (to record section)						\$4,060
25	2 Intermediate file clerks (to record section)						5,722
26	1 Intermediate clerk (to record section)						2,952
27	1 Junior clerk (to general office)						2,430
28	Also, temporary help in the amount of \$1,260, equal to a position of intermediate typist-clerk for six months,						
29	has been allowed in the records section. A position of intermediate typist-clerk was allowed for one year						
30	only in 1951-52 but due to delays in inaugurating the microfilm program the position is required for another						
31	six months to complete this work.						
32	Temporary help in the amount of \$7,125 is included for the crime commission to complete its work and pub-						
33	lish a report by December 31, 1952.						
34							
35	<b>OPERATING EXPENSES:</b> The increase of \$9,500 is due principally to increased prices and provision for the proposed new posi-						
36	tions. In addition \$4,630 is provided for expenses of the Commission on Organized Crime to terminate its activities and publish a						
37	formal report, and for microfilm supplies.						
38							
39	<b>EQUIPMENT:</b> The total of \$5,434 is an increase of \$563 over the \$4,871 allowed in 1951-52. A microfilm camera and film cabinet,						
40	\$1,400, is the major item of equipment.						
41							
42	<b>SALARIES AND WAGES</b>						
43	Executive:				SALARY RANGE		
44	Director	1	1	1	\$1,167	\$13,625	\$14,000

## Department of Corrections

## MEDICAL FACILITY

This institution cares for and treats inmates that are mentally ill, including psychopaths and sex offenders, and those suffering from chronic diseases.

The permanent site will be at Vacaville in Solano County.

Temporarily located at Terminal Island in the Los Angeles Harbor

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>SUMMARY AND</b>				
2	<b>RECONCILIATION WITH APPROPRIATIONS</b>				
3	<b>General Fund</b>				
4	<b>SUPPORT</b>

6	Allocations from Salary Increase Fund	15,032	72,195	-	
7	Allocations from Price Increase Fund	-	52,656	-	
8	Allocations from Emergency Fund	46,021	87,613	-	
9					
10	Total Available	\$773,597	\$1,115,011	\$1,256,514	
11	Unexpended balance, estimated savings	-3,772 <sup>a</sup>	-	-	
12					
13	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$769,825</b>	<b>\$1,115,011</b>	<b>\$1,256,514</b>	<b>\$141,503</b>
14					<b>(12.7%)</b>
15	<b>OTHER CURRENT EXPENSES</b>				
16	Initial Operating Inventories:				
17	Allocation from Emergency Fund	-	\$19,800	-	—\$19,800
18					
19	<b>TOTAL EXPENDITURES</b>	<b>\$769,825</b>	<b>\$1,134,811</b>	<b>\$1,256,514</b>	<b>\$121,703</b>
20					<b>(10.7%)</b>
21	<b>GENERAL ANALYSIS</b>				
22					
23	<i>Number of positions</i>	<i>143.5</i>	<i>182.5</i>	<i>200</i>	<i>17.5</i>
24					
25	<b>POPULATION AND UNIT COSTS</b>				
26	Average inmate population	540	963	1,000	37
27					(3.8%)
28	Cost per inmate	\$1,379	\$1,158	\$1,257	\$99
29					(8.5%)
30	The increase is due primarily to the addition of 18 proposed new positions, found necessary for operations after another year of experience in this new institution, decreased salary savings because of fewer new positions, and a minor increase in average daily population.				
31					
32	<b>SALARIES AND WAGES:</b> The increase of \$128,434 is due principally to the following proposed new positions, and a decrease in salary savings. Salary savings in 1951-52 are high due to the fact that all positions were authorized as of July 1, 1951, but there was delay in filling the authorized positions and in fully activating the facility.				
33					
34	1 Storekeeper I				\$3,216
35	This position will assist the present storekeeper in the receipt and storage of supplies, many of them drugs and chemicals. The physical arrangement of the institution aggravates the problem of delivery as a great many deliveries are made outside the security area and the storeroom must now be closed during times of delivery.				
36	All prisons except the two smallest have more than one person for this operation.				
37	1 Supervising Cook II				3,900
38	This position will allow relief for the food manager and culinary staff in the main kitchen, which is operated 12 hours a day every day of the year and will be responsible for the preparation of special diet meals.				
39	1 Meat Cutter				3,060
40	This position will supervise and instruct in the cutting of carcass meat by inmates and also provide partial relief for existing culinary employees. In institutions preparing and serving more than 500 regular meals a meat cutter is required where inmate instruction is also involved.				
41	8 Correctional officer				25,628
42	Five positions will provide custodial coverage, including relief, on the second shift in wings A, B, and D, where 268 acute patients are housed on several floors. Supervision of feeding, bathing, recreation, and other housekeeping activities require more than a medical technical assistant on duty during this shift.				
43	Three positions, including relief, will add to the present two officers handling inmate, vehicular, and visiting escort, inspections, inmate canteen and sick lines, etc. Other large institutions have more than five positions for this purpose.				
44	5 Medical technical assistants				16,860
45	These positions will allow double coverage on the night shift in wards 1, 2, 3, 4, each of which contains 50 mixed neurotics, aged and crippled, and worker inmates and an increase to three in the coverage on the day and evening shifts for the same wards. This additional coverage is required to prevent disciplinary infractions where employees leave the wards to obtain drugs and medications and for other reasons.				
46	1 Senior sociologist				4,740
47	1 Senior clinical psychologist				5,232
48	These positions will provide assistance in the intensive group and individual psychotherapy programs which are carried on at this institution for the various types of physically and mentally handicapped inmates received and housed therein.				
49					
50	<b>OPERATING EXPENSES:</b> The increase of \$20,538 is due to increased feeding costs for the increased population and other increased prices.				
51					
52	<b>EQUIPMENT:</b> The total of \$6,472 is an increase of \$3,422 over the \$3,050 authorized in the 1951-52 Fiscal Year. No unusual items are included.				
53					
54	<b>REIMBURSEMENTS:</b> The major portion of the \$10,891 increase is due to an increase in the number of recalcitrant tuberculars from 12 in 1951-52 to 18 in 1952-53, maintained for the Department of Public Health.				
55					
56	<sup>a</sup> Composed of savings in salaries and wages, \$6,438; operating expenses, \$16,035; equipment, \$282; and loss in reimbursements, \$18,983				
57

**Department of Corrections**  
**INSTITUTION FOR MEN, CHINO**

A minimum custody facility for adult offenders who are expected to profit from agricultural and vocational training. An extensive ranch is operated on a 2,600-acre tract of land. A diagnostic clinic and reception center began operations in December, 1951, processing new offenders from Southern California. A new federal forest camp was activated during the 1950-51 Fiscal Year to be operated in conjunction with the institution.

Located near Chino, San Bernardino County

<sup>b</sup> Composed of savings in operating expenses, \$944.

<sup>c</sup> These inmates are fed, housed, and otherwise cared for at the Institution for Men.

<sup>d</sup> Excluding cost of operating diagnostic clinic.

## Department of Corrections

## INSTITUTION FOR MEN, CHINO—Continued

## GENERAL ANALYSIS—Continued

The increase is due primarily to an increase in the average population due to the operation of the diagnostic clinic at capacity a full year for the first time and increased prices.

A permanent federal forest camp was established in the 1950-51 Fiscal Year to be operated in conjunction with the institution.

**SALARIES AND WAGES:** The increase of \$58,838 is due for the most part to the following proposed new positions:

3 Assistant supervising institution cooks ..... \$10,116  
These positions will provide 14 hour, seven days a week, coverage in the four dining rooms and sub-kitchens of the diagnostic clinic.

5 Correctional officers ..... 16,080  
These positions will provide coverage on the following posts in the diagnostic clinic:

One to act as a utility officer on the 4 p.m. to midnight shift when there is considerable inmate movement.

Two to man the guard towers at the east and west ends of the clinic, overlooking the recreation yards, during the daylight shift, seven days a week.

One to supervise inmates about the school rooms and vocational shops on the day shift. Will take inmate count, check and search inmates.

One to act as supervisor of a work crew in and about the administration area of the clinic.

The relief for these positions is provided by a reduction in relief provided for posts now authorized.

1 Prison records officer I ..... 3,540  
This position will assist the present institutional records officer in processing and maintaining the records of all inmates in the institution and the reception center. This position will replace inmates and a parole officer II.

2 Medical technical assistants ..... 6,744  
These positions will provide eight-hour coverage, seven days a week, in the reception center, assist the doctor with sick lines, drugs, medical reports, and will supervise inmates in the laboratory in the doctor's absence.

1 Dentist ..... 5,772  
This position, on a reimbursement basis, will provide half-time service for the Institution for Women. The half-time for the Institution for Men is necessary because of the increased reception center population.

0.5 Optometrist ..... 3,000  
This additional position is partially offset by a reduction in operating expenses. The increase in services is due to the increased population at the reception center.

1 Intermediate typist-clerk ..... 2,520  
This position will provide clerical assistance to the chief prison camp supervisor who supervises one federal and four state forestry camps. Similar service is provided in the San Quentin and Soledad camp programs.

1 Vocational counselor ..... 4,740  
To process the estimated number of inmates through the diagnostic clinic, another professional position is needed on a work load basis. This position will provide additional necessary professional staff.

1 Senior stenographer-clerk ..... 3,060  
This position will provide clerical assistance to the associate warden, chief psychiatrist and chief custodial officer at the diagnostic clinic.

In addition to the proposed new positions one high school teacher has been transferred from the Deuel Vocational Institution for orientation work at the reception center.

**OPERATING EXPENSES:** The increase of \$105,104 is generally due to price increases and increased population at the reception center.

**EQUIPMENT:** The total of \$53,403 is an increase of \$3,789 over the amount of \$49,614 provided in the 1951-52 Fiscal Year. Major items include a chassis for the replacement of a fire truck \$2,200, replacement of four automobiles, \$3,375, replacement of five trucks, \$12,068, and an additional refrigerator at one of the forest camps, \$1,976.

10	Unexpended balance, estimated savings	-16,162 <sup>a</sup>	-8,911 <sup>b</sup>	-	
11	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$2,266,496</b>	<b>\$2,293,552</b>	<b>\$2,243,676</b>	<b>-\$49,876</b> <b>(-2.2%)</b>

## GENERAL ANALYSIS

Number of positions	336.7	317.9	325.9	8
<b>POPULATION AND UNIT COST</b>				
Average inmate population	2,738	2,459	2,100	-359 (-14.6%)
Cost per inmate <sup>c</sup>	\$814	\$915	\$1,048	\$133 (14.5%)
The policy of reducing overcrowding is continued through the budget year. The decreases in expenditures reflect this decrease in population, partially offset by higher prices and eight proposed new positions.				

**SALARIES AND WAGES:** The decrease of \$5,187 is due to farming operations being transferred to correctional industries effective January 1, 1952, and no expenditures for salaries and wages for farming are included in the support budget in 1952-53. In 1951-52, overtime due to work on the Folsom Dam in the amount of \$21,220 is budgeted. This will not recur in 1952-53. These decreases are partially offset by the following proposed new positions:

1 Assistant supervising institution cook	\$3,347
This position will provide part-time technical supervision over the separate kitchens at the ranch (140 inmates) and the hospital (200 inmates) where a total of 1,020 meals are served each day.	
7 Correctional officers	22,512
Seven correctional officers were deleted by the Legislature in the 1951-52 Fiscal Year on the basis of the ratio of officers to inmates. These proposed positions will restore the positions actually deleted by the prison in 1951-52 on a post assignment basis and are urgently needed. The positions to be restored will cover the following posts:	
One to act as state agent returning parole violators to prison.	
One to supervise inmates working as a general labor crew on Department of Public Works projects.	
One to man the officers and guards gun cage post Number 112, supervising the maximum security area eight hours a day.	
One to supervise the labor gang outside the walls maintaining the drainage ditches.	
One to supervise the inmates in the trades building to search for contraband and maintain discipline.	
Two for relief of the above new positions and to make up a 0.27 man-year deficit in the relief of existing positions.	

**OPERATING EXPENSES:** The decrease of \$63,164 is due mainly to the decreasing population and the reduction in farming operations, due to the fact that the farm is operated by correctional industries effective January 1, 1952.

**EQUIPMENT:** The total of \$66,620 is an increase of \$4,968 over the \$61,652 allowed in 1951-52. Major items of equipment include replacement of a bulldozer, \$9,000, and replacement of blankets, \$8,112.

**REIMBURSEMENTS:** Services performed on an overtime basis by employees of Folsom Prison for the United States Bureau of Reclamation during the 1951-52 Fiscal Year in the amount of \$21,220 will not recur during 1952-53.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53

<sup>d</sup> Farming operations were transferred to correctional industries on January 1, 1952. The industries will furnish \$32,559 of foodstuffs to Folsom without charge to make up the difference in value between the local production consumed and the cost of production during the last six months of 1952-53 and eliminate Emergency Fund financing. This amount will be offset against the liability to the General Fund on industries accounts for the value of equipment and other assets taken over by the latter at time of transfer.

## Department of Corrections

## STATE PRISON AT SAN QUENTIN

A prison for inmates requiring medium and maximum custody. Until December, 1951, this institution will serve as Department of Corrections' central receiving unit for adult male offenders from the entire State. After December, 1951, only Northern California offenders will be received at this prison. Offenders from Southern California will be received at the new diagnostic clinic at the Institution for Men, Chino. Five temporary federal and three permanent state forestry camps, and two road camps are operated in conjunction with this institution. Academic and vocational training are available. An extensive industrial plant is also in operation.

Located near San Rafael, Marin County

<sup>a</sup> Composed of savings in salaries and wages, \$20,142; operating expenses, \$6,971; equipment, \$4,240; inmate pay-work projects, \$2,974; and loss in reimbursements, \$18,451.

<sup>b</sup> Composed of savings in salaries and wages, \$14,036.

<sup>c</sup> These inmates are fed, housed, and otherwise cared for at San Quentin Prison.

<sup>d</sup> Excluding cost of operating diagnostic clinic.

## Department of Corrections

## STATE PRISON AT SAN QUENTIN—Continued

## GENERAL ANALYSIS—Continued

In general operations are continued on the same level as in 1951-52. Population estimates are higher than originally estimated in 1951-52, because of delayed openings of facilities in other institutions. Increases in expenditures reflect increased prices in operating expenses and 15 proposed new positions.

The operation of the farm has been transferred to correctional industries as of January 1, 1952.

The forestry camp program, both federal and state, continues at the same level as in 1951-52. The camp supervision personnel has been augmented in 1951-52 to provide more adequate supervision to this activity. Ten camps housing 510 inmates are involved in all.

The positions added in 1951-52 and extended to June 30, 1953, include the following:

1 Parole officer II	\$5,254
It has been found advantageous to parole or discharge men directly from the forest camps rather than return them to the institution for a time prior to release. This position performs the necessary pre-parole work in the various camps.	
1 Intermediate account clerk	2,662
This position performs the additional accounting work necessitated by the operation of camps.	
1 Prison camp supervisor II	5,064
This position is an additional supervisory position to act as an assistant chief prison camp supervisor in covering the 10 camps operated out of San Quentin in widely scattered locations in Northern California.	
0.7 Correctional officer (truck driver)	6,825
Due to the widely separated location of the camps an additional truck driver is necessary to transport inmates and supplies to the various camps when the federal camps are in operation.	
The expenses of the state and federal forest camps, including the camp supervision, are completely reimbursed by the State Division of Forestry or the U. S. Forest Service. If the federal forest camp program is discontinued the expenses for camp supervision would likewise be curtailed.	

**SALARIES AND WAGES:** The increase of \$49,463 is due principally to the following proposed new positions:

1 Bookkeeping machine operator	\$2,640
The addition of this position will allow the institution to inaugurate and maintain a stores accounting system which is strongly recommended for this large institution.	
9 Correctional officers	28,944
These positions will provide the necessary coverage on a post assignment basis for the following purposes: Seven positions were deleted by the Legislature in 1951-52 on the basis of a ratio of correctional officers to inmates. It is considered necessary to man certain basic posts regardless of an increase or decrease in the number of inmates. The posts requested to be covered are considered essential to the operation of the institution built to house 2,700 inmates and cannot be reduced merely by a decrease in the amount of overcrowding. Two full-time positions or four half-time positions are needed to supervise bathing, barbering, clothing distribution, and assist in the count, in the various cell blocks. Previously the bathing had been done in a central bathhouse but now each cell block has its own bathing facilities which must be supervised.	
3 Medical technical assistants	10,116
These positions will assist in processing the sick line, perform clinical laboratory work, take X-rays, supervise working inmates, and supervise three 50-bed wards of acute, subacute, and chronic patients, during the day and evening shifts. The present one correctional officer per shift cannot perform all of these necessary functions.	
1 Physical therapist II	3,900
Modern medicine places an ever greater emphasis on the use of physical therapy to relieve chronic conditions. This position will plan and operate a program of all types of physical therapy, instructing and supervising the inmate helpers in hydrotherapy, electrotherapy, corrective exercises, and massage.	
1 Water and sewage plant supervisor	3,900
A new and intricate sewage disposal system has been constructed at San Quentin. This position will be responsible for and supervise inmates in the operation of sewage plant as well as the fresh and salt water reservoirs.	

**OPERATING EXPENSES:** The decrease of \$46,265 is due mainly to a decrease in average population of the institution partially offset by increased costs of commodities.

**EQUIPMENT:** The total of \$94,625 is a decrease of \$1,593 under the total of \$96,218 allowed in the 1951-52 Fiscal Year.

Major items of equipment include an additional caster in the print shop, \$1,500; replacement kitchen equipment, \$8,786; replacement blankets and mattresses, \$15,045; a replacement concrete mixer, \$3,000; a replacement lathe, \$1,000; a replacement shaper, \$3,500; an additional motor grader, \$3,000; replacement automotive equipment, \$24,600, including a fire engine; and an additional auxiliary fire engine, \$2,300.

‡ Farming operations were transferred to correctional industries on January 1, 1952. The industries will furnish \$24,040 of foodstuffs to San Quentin without charge to make up the difference in value between the local production consumed and the cost of production during the last six months of 1952-53, and thus eliminate emergency fund financing. This amount will be offset against the liability to the General Fund on industries' accounts for the value of equipment and other assets taken over by the latter at time of transfer.

## Department of Corrections

## STATE PRISON AT SOLEDAD

medium security institution for prisoners of the more stable type who can be utilized with profit to the State and benefit to themselves in agricultural, vocational, and other work programs.  
Two temporary Federal Forest Camps are operated in conjunction with this institution.

Located near Soledad, Monterey County

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52

39	<b>GENERAL ANALYSIS</b>				
40					
41	<i>Number of positions</i> -----	<i>165.8</i>	<i>231.8</i>	<i>321.3</i>	<i>89.5</i>
42					
43	<b>POPULATION AND UNIT COSTS</b>				
44	Institution Operations:				
45	Average inmate population -----	684	900	1,844	944
46					(104.9%)
47	Cost per inmate -----	\$1,245	\$1,402	\$1,033	—\$369
48					(—26.3%)
49	Federal Forestry Camp Operations:				
50	Average inmate population -----	28	82	82	—
51	Cost per inmate (excluding inmate pay and emergency fire				
52	fighting) -----	\$958	\$1,051	\$1,070	\$19
53					(1.8%)
54	State Forestry Camp Operations:				
55	Average inmate population -----	116	120	120	—
56	Cost per inmate (excluding inmate pay and emergency fire				
57	fighting) -----	\$938	\$1,085	\$1,089	\$4
58					(0.4%)

The increase of \$634,086 is due primarily to the increased population, 17.5 proposed new positions, increased prices, and full year operation of the new institution.

The camp program was enlarged in 1951-52 to include two additional federal forest camps. Personnel complements and operations are similar to those conducted at San Quentin and Chino. The entire costs of camp operations are reimbursed by the United States Forest Service and the State Division of Forestry.

Farming operations were transferred to correctional industries as of July 1, 1951.

<sup>a</sup> Composed of savings in salaries and wages, \$2,876; operating expenses, \$658; equipment, \$1,878; inmate pay-work projects, \$4,455; and excess reimbursements, \$16,337.

<sup>b</sup> Composed of savings in salaries and wages, \$209,936; operating expenses, \$26; equipment, \$2,324.

## STATE PRISON AT SOLEDAD—Continued

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>GENERAL ANALYSIS—Continued</b>				
2					
3					
4	<b>SALARIES AND WAGES:</b> The increase of \$300,951 is partially due to the following proposed new positions:				
5	1 Accountant-auditor I -----				\$3,540
6	This position will lend technical assistance to the accounting officer in the increasingly complex problems				
7	brought on by operating two institutions, four forestry camps, and the increased industrial activity.				
8	Such a position is now provided in other large prisons.				
9	1 Intermediate typist-clerk -----				2,520
10	This position will help in the personnel section where but one employee is now employed to maintain				
11	records and process documents for over 300 full-time positions.				
12	2 Assistant supervising institution cooks -----				6,744
13	These two positions would provide a minimum staffing to cover the following assignments:				
14	Permanent Institution:				
15	Inmates' kitchen—sixteen hours per day, seven days per week.				
16	Employees' kitchen—eight hours per day, seven days per week.				
17	Temporary Institution:				
18	Inmate kitchen—sixteen hours per day, seven days per week.				
19	Other:				
20	Butcher—eight hours per day, five days per week.				
21	Baker—eight hours per day, six days per week.				
22	Food manager—eight hours per day, seven days per week.				
23	One such position would also be in charge of the feeding operations at the temporary institution under the				
24	food manager's general direction.				
25	1 Correctional officer -----				3,216
26	This position will assist the laundry supervisor and provide vacation and sick leave relief for that position.				
27	This would bring the staff in the laundry to two men which is the same as in the other prisons and is				
28	vitaly necessary for the continuous operation of a large prison laundry.				
29	8 Correctional officers -----				22,512
30	These positions will be assigned to posts as follows:				
31	Two (effective January 1, 1953) to man towers 8 and 9 overlooking the new industrial area during the				
32	day shift. An industrial program should be activated by that date.				
33	One to supervise the recreation yard on the 8 a.m. to 4 p.m. shift. Yard supervision over idle men has				
34	been found very necessary.				
35	Four to supervise maintenance work crews which can be profitably employed with the expanded population				
36	and plant.				
37	One to relieve the above positions.				
38	1 Medical technical assistant -----				3,372
39	This position will supervise the operation of the X-ray unit and the drug storage room, both of which				
40	require responsible supervision and together can justify one full-time position.				
41	1 Assistant supervisor of recreation -----				3,216
42	This position will supervise the athletic and recreational activities at the farm unit (temporary facility).				
43	The otherwise leisure time of approximately 400 inmates justifies this position.				
44	0.5 Locksmith (one-half time) -----				1,860
45	This position will care for and maintain the many intricate locks at the new institution.				
46	2 Stationary firemen -----				6,432
47	These positions, with the presently authorized firemen positions, will provide civil service personnel respon-				
48	sibility in the boiler room coverage for 10 to 12 hours a day, 365 days per year, at both the permanent				
49	and temporary institutions.				
50	The decrease in estimated salary savings reflects full-year establishment of 150 new positions authorized in the 1951-52 Fiscal Year to				
51	staff the new institution, but not filled until later in the year because of delayed completion of the new institution.				
52					
53	<b>OPERATING EXPENSES:</b> The increase of \$361,567 is due to a large population increase reflecting the first full-year operation				
54	of the new permanent institution and price increases.				
55					
56	<b>EQUIPMENT:</b> The total of \$7,948 is a decrease of \$2,438 from the \$10,386 allowed in the 1951-52 budget. The major item of equip-				
57	ment provides for the replacement of a dishwashing machine, \$3,250.

## DEUEL VOCATIONAL INSTITUTION

A medium security institution of the intermediate reformatory type to house young offenders who are unsuitable for the program at Preston School of Industry. An extensive educational and vocational training program has been inaugurated. A work camp at the permanent institution site at Tracy will be opened on January 1, 1953 to prepare the new facility for occupancy on July 1, 1953.

Temporarily located near Lancaster, Los Angeles County

18	<b>GENERAL ANALYSIS</b>				
19	Number of positions -----	186.3	175	199	24
20	<b>POPULATION AND UNIT COSTS</b>				
21	Institution Operations:				
22	Average inmate population:				
23	Institution -----	467	531	555	24 (4.5%)
24	Diagnostic clinic <sup>c</sup> -----	89	24	-	-24 (-27%)
25	Total -----	556	555	555	-
26	Cost per inmate <sup>d</sup> -----	\$1,746	\$1,850	\$1,900	\$50 (2.7%)
27	The increase in expenditures is due in general to the establishment and operation on January 1, 1953, of a work camp on the site of the new institution at Tracy in order to prepare the latter for opening in 1953-54 through use of inmate labor.				
28	<b>SALARIES AND WAGES: The increase of \$25,096 is due mainly to the following proposed new positions:</b>				
29	1 Accountant-auditor I -----				\$3,540
30	This position will help perform technical accounting work connected with the operation and maintenance of the work camp at Tracy and the opening of the new institution, including the processing of the large number of initial equipment purchases for the new institution at Tracy.				
31	2 Correctional sergeants -----				7,440
32	These positions will provide seven-day-a-week supervision of the kitchen and dining rooms which are an acute custodial problem, and will also furnish relief for existing posts supervised by sergeants.				
33	3 Correctional officers -----				9,648
34	These positions will provide two-shift (3.30 p.m. to 7.30 a.m.) seven-day-a-week coverage in the minimum security cottage area. Twelve cottages housing 144 boys are involved. It is in this area that most of the disturbances in the institution are centered.				
35	1 Correctional lieutenant (effective January 1, 1953) -----				2,148
36	1 Correction sergeant (effective January 1, 1953) -----				1,860
37	11 Correctional officers (effective January 1, 1953) -----				17,688
38	1 Storekeeper II (effective January 1, 1953) -----				1,860
39	1 Intermediate account clerk (effective January 1, 1953 and expires June 30, 1953) -----				1,530
40	1 Supervising cook I (effective January 1, 1953, expires June 30, 1953) -----				1,686
41	1 Chief engineer I (effective January 1, 1953) -----				2,046
42	1 Plumber foreman (effective May 1, 1953) -----				682
43	1 Electrician foreman (effective May 1, 1953) -----				716
44	1 Water and sewage plant supervisor (effective January 1, 1953) -----				1,950
45	1 Supervising groundsman (effective January 1, 1953) -----				1,770
46	These positions will establish and operate the work camp on the new site at Tracy performing cleanup work, landscaping, and other duties necessary prior to occupancy. Twenty-four hour, seven-day a week custodial coverage, plus operation of six work crews is provided for the 100 inmates by the 11 correctional officers.				

<sup>a</sup> Composed of savings in salaries and wages, \$22,102; operating expenses, \$18,438; equipment, \$1,919; and loss in reimbursements, \$4,386.

<sup>b</sup> Composed of savings in salaries and wages, \$12,983.

<sup>c</sup> These inmates are housed, fed, and otherwise cared for at the institution.

<sup>d</sup> Exclusive of the cost of operating the diagnostic clinic and of rent paid to the Federal Government.

1	GENERAL ANALYSIS—Continued							
2								
3								
4	OPERATING EXPENSES: The increase of \$21,280 is due to increased costs of commodities and the operation of the 100-man work							
5	camp at Tracy.							
6								
7	EQUIPMENT: The total of \$19,322 is an increase of \$12,335 over the \$6,987 allowed in 1951-52. An additional truck, \$4,500, the							
8	replacement of two automobiles, \$2,400, and \$2,500 for equipment at the Tracy work camp are the major items of equipment.

## Department of Corrections

## INSTITUTION FOR WOMEN

receives and houses all female felons committed to prison. Academic and limited vocational training is available. The institution will be located near Tehachapi, Kern County until November, 1952, when the new institution will be opened at Corona, San Bernardino County.

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52

25					
26	Number of positions-----	50.7	57.5	79.5	22
27					
28	<b>POPULATION AND UNIT COSTS</b>				
29	Average inmate population-----	334	374	386	12
30					<b>(3.2%)</b>
31	Cost per inmate-----	\$1,176	\$1,170	\$1,250	\$80
32					<b>(6.8%)</b>
33					
34	The proposed budget reflects the transfer of this institution from Tehachapi to a new site at Corona in November, 1952. The increase in expenditures reflects the occupancy of the new institution in a more favorable employment situation than at Tehachapi which precluded the employment of persons necessary to properly supervise and operate the institution. Additional positions are provided for Corona to give adequate staffing for the new institution.				
35					
36					
37					
38	<b>SALARIES AND WAGES:</b> The increase of \$54,720 is accounted for primarily by the following proposed new positions (all of the new positions are scheduled to be effective November 1, 1952, unless otherwise indicated):				
39	1 Senior stenographer-clerk-----				\$2,040
40	This position will provide stenographic assistance for the business and accounting office which is now staffed entirely with inmates.				
41	1 Bookkeeping machine operator-----				1,760
42	This position will activate a stores accounting system at this institution which has been without one to date.				
43	1 Supervisor of custody and training (effective July 1, 1952)-----				4,092
44	This position will be in charge of the training and operation of the custodial staff and will be in charge of the institution in the absence of the superintendent and assistant superintendent. The latter position heads up the educational program.				
45	1 Intermediate stenographer-clerk-----				1,760
46	This position will render clerical assistance to the classification and medical departments. At present there is one free person partially performing these functions but with the better organized program planned for this institution additional help will be required.				
47	1 Senior stenographer-clerk-----				2,040
48	This position will provide stenographic assistance to the assistant superintendent and the supervisor of custody and training. This will allow four free clerks for the entire institution.				
49	0.5 Psychiatrist-----				2,840
50	This position will provide psychiatric service at the institution now performed under contract. Operating expenses have been reduced to reflect the establishment of this position.				
51	1 Senior physician and surgeon-----				5,152
52	Medical services are now provided under service agreements. This position will replace the contractual services and operating expenses have been so reduced.				
53	1 Educational interne-----				1,520
54	This position will assist in the classification section, preparing case histories and summaries, testing and conducting research projects.				
55	12 Supervisor-counselors-----				25,728
56	The staffing of the new institution will cover the following posts:				
57	Three 100-inmate cottages with double coverage on morning and afternoon shifts and single coverage on the night shift in each cottage—total of 15 officers.				
58	Single coverage in hospital and segregation for two shifts each day—total of two officers.				
59	Double coverage, one shift a day on mail censoring—total of two officers.				
60	Single coverage three shifts in control room—total of three officers.				
61	Single coverage two shifts in yard—total of two officers.				
62	Single coverage one shift, housekeeping and staff kitchen in administration building—total of one officer.				
63	Single coverage on one shift in bakery—total of one officer.				
64	A total of 26 posts must be covered and relief must be provided. This amounts to approximately 16 relief positions or a total of 42 supervisor-counselors required. There are now 30 positions authorized. Twelve positions are proposed.

a Composed of savings in salaries and wages, \$35,270; operating expenses, \$888; equipment, \$2,786; and loss in reimbursements, \$1,522.

b Composed of savings in salaries and wages, \$13,508.

## Department of Corrections

## INSTITUTION FOR WOMEN—Continued

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>GENERAL ANALYSIS—Continued</b>				
2	<b>SALARIES AND WAGES—Continued</b>				
3	4 Stationary firemen				\$8,576
4	The institution at Corona will have a central heating system whereas the cottages at Tehachapi had individual heating systems. These positions will provide 24 hour, seven day a week coverage in the boiler room where high pressure boilers will be operated. These boilers cannot properly be tended by inmates as in a men's institution.				
5	1 Electrician				2,480
6	This position will be a part of the minimum maintenance staff at the new institution which has an extensive electrical system, including much equipment, lines and electrically controlled locks.				
7	1 Correctional officer				2,144
8	This position will do general hauling, delivery, and maintenance work as well as assisting in apprehending escapees and transporting inmates.				
9	1 Supervising groundsman (expires June 30, 1953)				2,360
10	This position will supervise the initial planting and care of the rather extensive grounds at Corona. The need for continuance of this position will be resurveyed in the 1953-54 budget.				
11	<b>Abolished Positions:</b>				
12	3 Correctional officers (expire October 31, 1952).				
13	These positions will not be needed at Corona because of the different custodial arrangement of the new institution.				
14	1 Head farmer (expires October 31, 1952).				
15	No farm as such will be operated at Corona and this position will no longer be required.				
16	<b>OPERATING EXPENSES:</b> The decrease of \$10,221 is primarily due to decreases in medical, dental, and psychiatric contractual services offset in part by population and price increases. Contractual services with Chino for a one-half time dentist have been included.				
17	<b>EQUIPMENT:</b> The total of \$4,944 is a decrease of \$292 from the amount provided in the 1951-52 Fiscal Year. Replacement of one motor vehicle, \$1,375, is the major item of equipment.				
18	<b>OTHER CURRENT EXPENSES:</b> The amount of \$30,000 is required to move the institution from Tehachapi to Corona and to maintain both institutions during the time of moving.

## Department of Corrections

## ADULT AUTHORITY

This is the paroling agency for adult male prisoners of the State. As such, it issues and revokes paroles, fixes and refixes terms of imprisonment, classifies and determines punishment of prisoners. The Bureau of Paroles supervises all adult male parolees within the State.

Main Office at Sacramento

## ADMINISTRATION

## Analysis

This division fixes the terms of imprisonment, issues paroles and supervises the activities of the Bureau of Paroles.

**SALARIES AND WAGES:** The increase of \$10,772 is due primarily to the fact that the two new members of the Adult Authority will be in office for a full year for the first time.

**OPERATING EXPENSES:** The decrease of \$320 is composed of a decrease in office expenses of \$845 due to development of procedures for the interstate compact on parolees and a nonrecurring item of furniture refinishing in 1951-52 that are not present in 1952-53. In addition printing expenses decrease by \$791 due to the reprint of a booklet on the Philosophy of the Adult Authority in 1951-52. These decreases are partially offset by increases in other operating expenses.

**EQUIPMENT:** The total of \$3,867 is a decrease of \$557 from the total of \$4,424 allowed in 1951-52.

22	<b>BUREAU OF PAROLES</b>						
23	<b>Analysis</b>						
24	This bureau supervises all adult male parolees in the State.						
25	SALARIES AND WAGES: The increase of \$14,302 is due primarily to the fact that new parole officers' positions allowed in 1951-52 will be employed for a full year in 1952-53 for the first time, and the following proposed new positions offset by the transfer of five positions.						
26	Proposed New Positions:						
27	1 Parole officer II (effective August 1, 1952) .....						\$3,938
28	2 Parole officers I (one effective October 1, 1952 and one effective May 1, 1953) .....						3,575
29	These positions will maintain a ratio of one parole officer to each 60 parolees based on estimated parole population and in accordance with a level of service previously approved.						
30	1 Intermediate stenographer-clerk (effective August 1, 1952) .....						2,420
31	This position will provide the necessary stenographic services to the proposed new parole officers						
32	Positions to Be Transferred to Departmental Administration Effective July 1, 1952:						
33	1 Supervising clerk I (to record section) .....						4,060
34	2 Intermediate file clerks (to record section) .....						5,722
35	1 Intermediate clerk (to record section) .....						2,952
36	1 Junior clerk (to general office) .....						2,430
37	OPERATING EXPENSES: The increase of \$11,260 is due to the increased number of parolees and thereby increased activities of the bureau, including \$4,000 additional for advances for tools to parolees.						
38	EQUIPMENT: The total of \$14,458 is a decrease of \$14,801 from the total of \$29,259 allowed in the 1951-52 Fiscal Year. Three additional automobiles and office equipment for four proposed new positions are the major items.						
39	REIMBURSEMENTS: The total of \$5,540 is an increase of \$3,140 over the total of \$2,400 estimated for the 1951-52 Fiscal Year. This increase is due primarily to the provision for a 75% recovery of advances for tools of \$4,000 made to parolees.						
40	<b>SALARIES AND WAGES</b>						
41	Chief state parole officer .....	1	1	1	SALARY RANGE

## Department of Corrections

## BOARD OF TRUSTEES—INSTITUTION FOR WOMEN

The Board of Trustees is the Women's Parole Board. The board also acts in an advisory capacity to the Director of Corrections in the management of the women's institution.

Offices at Los Angeles and San Francisco

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>SUMMARY AND</b>				
2	<b>RECONCILIATION WITH APPROPRIATIONS</b>				
3	<b>General Fund</b>				
4	<b>SUPPORT</b>				
5	Budget Act appropriation	\$51,374	\$55,659	\$65,735	
6	Allocations from Emergency Fund	—	3,110	—	
7	Allocations from Salary Increase Fund	291	2,817	—	
8	Total Available	\$51,665	\$61,586	\$65,735	
9	Unexpended balance, estimated savings	—1,729 <sup>a</sup>	—47 <sup>b</sup>	—	
10	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$49,936</b>	<b>\$61,539</b>	<b>\$65,735</b>	<b>\$4,196</b> <b>(6.8%)</b>
11	<b>GENERAL ANALYSIS</b>				
12	Number of positions	7	8	8	—
13	<b>PAROLE RATIOS</b>				
14	Average number of paroles supervised	202	222	248	26 (11.7%)
15	Average number of parole officers	3	3.7	4	0.3 (8.1%)
16	Average ratio per parole officer	67	60	62	2 (3.3%)
17	In general, the increase in expenditures is due to the increase in parole population.				
18	<b>SALARIES AND WAGES:</b> The increase of \$3,613 is primarily due to the full year cost of a women's parole officer position established for only part of the 1951-52 Fiscal Year and the following:				
19	Board members (additional meeting day)				\$1,500
20	An increase from seven to eight meeting days per month is required because of an increase in inmate movement (received and released) from 292 in 1949-50 to an estimated 327 in 1952-53 (approximately 10 percent increase). The board fixes sentences and paroles and takes special actions on institutional and parole problem cases. In addition, it exercises supervision over the four parole officers.				
21	<b>OPERATING EXPENSES:</b> Increase of \$1,515 is generally due to the increased parole population, increased board meeting days and price increases.				
22	<b>EQUIPMENT:</b> The total of \$1,125 represents a decrease of \$907. The major item is the replacement of an automobile, \$1,025.

## Department of Corrections

## YOUTH AUTHORITY

The Youth Authority has the responsibility for classification, segregation, and parole of all young offenders committed to it. It exercises over-all supervision of the various correctional facilities for young offenders including custody and rehabilitation. It also administers the parole program.

Consultant services are provided to judges, probation officers, juvenile halls, and law enforcement bureaus. Regular inspections of county-operated camps are made and standards set for payment of subsidies. Advisory services are rendered to community agencies interested in youth welfare and delinquency prevention.

26	AUTHORITY					
27	The Youth Authority, as such, consists of three members appointed by the Governor, subject to confirmation by the Senate. One mem-					
28	ber is appointed as director, and also serves as chairman of the authority. The three-member authority is charged by law with					
29	the responsibility for the classification, segregation and parole of persons committed to the authority. These functions cannot be					
30	delegated by it to, nor exercised, nor performed by, any individual member. All other powers, duties, and functions granted to or					
31	imposed upon the authority by any provision of law are exercised and performed by the director of the Youth Authority staff.					
32						
33	Analysis					
34						
35	SALARIES AND WAGES: The increase of \$1,000 is due to a full year at increased salary ranges granted in 1951 for members.					
36						
37	OPERATING EXPENSES: The nominal increase is due to increased cost of automobile operation.					
38						
39	EQUIPMENT: No change.

64						
65	DIVISION OF ADMINISTRATION					
66						
67	This division provides central control and unified management of the business operations of the several divisions and facilities. It is					
68	responsible for fiscal, accounting, and personnel control. The office of the clerk of the authority is also part of this division and acts					
69	as a clearing center for contacts with the courts, maintains central case files, and records minutes of all authority meetings.					
70	At the present time the accounting office maintains the bookkeeping records for Los Guilucos, Fricot, forestry camps, trust funds, board-					
71	ing homes, and payments to counties. When the northern clinic is opened the records will be maintained in this office; however, the					
72	records of Los Guilucos will be moved to the institution.					
73						
74	Analysis					
75						
76	SALARIES AND WAGES: In general the increase in salaries and wages of \$1,997 is due to one proposed new position partially offset					
77	by increased salary savings.					
78	Proposed New Positions:					
79	1 Junior staff technician (to expire June 30, 1953)-----					\$3,720
80	This position is to fill the need for administrative assistance to the director and the administrative officer					
81	caused by the recent growth of the Youth Authority program. The position will be reviewed again for the					
82	1953-54 Budget to determine its ultimate place in the organization. Two educational internes under Division					
83	of Diagnosis and Classification have been abolished to finance this position.					
84

2	Analysis—Continued						
3							
4							
5							
6	OPERATING EXPENSES: The increase of \$14,516 is due in general to increased parole and institutional populations and increased costs related thereto. 1952-53 printing includes \$1,100 for new standard medical forms and \$2,300 for Youth Authority biennial report.						
7							
8							
9	EQUIPMENT: The total of \$24,621 is a decrease of \$4,022 from 1951-52. Additional file cabinets, \$655, for increased population records, is the largest item.

YOUTH AUTHORITY—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	DIVISION OF FIELD SERVICES—Continued						
2	Bureau of Paroles						
3							
4							
5	The Bureau of Paroles is responsible for the proper placement of youths in public schools or in work, following their training in one of						
6	the schools or camps of the Authority. Each youth remains under supervision of a parole officer during the period of his gradual						
7	readjustment to normal community life. The staff is organized on a regional basis under central administration and keeps in close						
8	touch with the youths until their final discharge.						
9							
10	Analysis						
11							
12	SALARIES AND WAGES: The increase of \$33,465 is accounted for generally by the following:						
13	Proposed New Positions:						
14	1 Supervising placement officer						\$4,980
15	1 Placement officer II (effective Nov. 1, 1952)						2,506
16	2 Placement officers I (effective March 1, 1952 and June 1, 1952)						1,625
17	1 Intermediate stenographer-clerk (effective March 1, 1952)						880
18	These positions are necessary to maintain the existing level of service for the increased parole population						
19	and to continue the case load at 69 parolees to each officer.						
20	1 Intermediate account clerk						2,520
21	This position will provide clerical assistance in the Los Angeles office in processing fiscal records passing						
22	through that office.						
23	The balance of this increase is largely due to the extension for 12 months in 1952-53 of positions established on a staggered basis during						
24	1951-52.						
25							
26	OPERATING EXPENSES: Increases of \$5,006 are due to increased parole population, additional positions and increased prices.						
27							
28	EQUIPMENT: Total of \$17,606 is a decrease of \$1,346 and is due in general to additional equipment for the proposed new positions. Four						
29	automobiles and six desks and chairs are the major items of new equipment while eight automobiles are requested as replacements.						
30

DIVISION OF DIAGNOSIS AND CLASSIFICATION

This division is responsible for making a complete clinical study of each youth at the time of commitment to the authority, to aid th  
rehabilitation and parole processes. The youths are examined for intelligence, education, social, occupational, and psychological  
factors. This information assists both the youths to understand their own problems, and the authority to place them in the school  
or camp best suited for their retraining. The main diagnostic clinic is temporarily located at the Preston School of Industry. Serv  
ices of division psychologists are available to all Youth Authority facilities.

Analysis

OPERATING EXPENSES: The increase of \$408 is due to price increases and the provision for one trip for inspection of diagnosti  
facilities in the East prior to the opening of reception centers in California.

EQUIPMENT: The replacement of office equipment accounts for the increase of \$370 over 1951-52.

DIVISION OF TRAINING AND TREATMENT

This division supervises the Youth Authority schools and camps and is responsible for constant re-evaluation and development of pro  
grams within those facilities to speed up the rehabilitation process and increase its efficiency. The authority receives recommendation  
from the schools and camps concerning paroles and transfers of the wards. There are now two schools for girls, four for boys and  
three forestry camps in operation. Assignment of wards to the individual schools and camps is made on the basis of findings of  
the diagnostic clinic and upon information received from the committing court or probation department of the county in which the  
court has jurisdiction.

Analysis

SALARIES AND WAGES: The increase of \$3,980 is due to the addition of one proposed new position partly offset by increased salary  
savings.

Proposed New Position:

1 Institutional food administrator II-----	\$4,740
--	---------

This position will assist the present departmental food administrator in operating the feeding program for  
the Youth Authority, Departments of Education and Veterans Affairs, consisting of 14 institutions and  
schools and three camps. Present service is limited because of the large number of facilities to be served.  
The reimbursable services rendered by the present food administrator to the Department of Education and  
the Department of Veterans Affairs will be increased to render badly needed services to the latter depart-  
ments.

OPERATING EXPENSES: The increase of \$235 is due to added travel for the new food administrator.

## Department of Corrections—Youth Authority

## FORESTRY CAMPS FOR BOYS

correctional facilities for boys in the 17 to 21 age group. On-the-job training in fire prevention and suppression, and other work are carried on under the direction of the Division of Forestry. The Youth Authority carries on a program of education, recreation and religious training.  
The Whitmore Camp is to be closed permanently in January, 1952. An additional spike camp is to be opened at Blaisingame and operated out of Coarsegold.

Pine Grove Camp is located 10 miles north of Jackson, Amador County.  
Ben Lomond Camp is located 10 miles northeast of Santa Cruz, Santa Cruz County.  
Whitmore Camp is located 38 miles east of Redding, Shasta County.  
Coarsegold Camp is located 35 miles east of Fresno, Fresno County.

24					
25	<b>NET TOTAL EXPENDITURES</b> -----	-	-	-	
26					
27					
28	<b>GENERAL ANALYSIS</b>				
29					
30	Number of positions -----	76.3	75.6	66.8	-8.8
31					
32	<b>POPULATION AND UNIT COSTS</b>				
33	Average Inmate Population:				
34	Pine Grove Camp -----	71	83	90	7
35	Whitmore Camp -----	65	32	-	-32
36	Coarsegold Camp -----	85	105	125	20
37	Ben Lomond Camp -----	57	65	70	5
38					
39	Totals, All Camps -----	278	285	285	-
40	Average Cost per Inmate (Excluding Inmate Pay) -----	\$1,716	\$1,802	\$1,744	-\$58
41					(-3.2%)
42	The decrease is generally due to the closing of the Whitmore Camp and the redistribution of population.				
43					
44	<b>SALARIES AND WAGES:</b> The closing of Whitmore has reduced salaries and wages in the net amount of \$47,333.				
45	Proposed New Positions (Total for Three Camps):				
46	2 Intermediate typist-clerks -----				\$5,040
47	(One half-time each at Ben Lomond and Pine Grove, one full-time at Coarsegold.) To provide necessary				
48	clerical assistance at the camps and relieve the superintendent and assistant head boys' group supervisor of				
49	clerical detail. Full-time position at Coarsegold required because of larger population and three spike camps.				
50					
51	<b>OPERATING EXPENSES:</b> Decrease of \$2,730 is due to the closing of Whitmore Camp partially offset by price increases.				
52					
53	<b>EQUIPMENT:</b> Total of \$12,048 represents an increase of \$241. Major items include replacement of laundry equipment at Pine Grove,				
54	\$1,325, replacement of cooking equipment at Pine Grove, \$1,133, replacement of an automobile for camp supervision, \$950, and				
55	replacement of automobile at Ben Lomond, \$1,790.				
56					
57	a An advance from the Division of Forestry appropriation for the payment of camp operations pending receipt of reimbursements. The				
58	advance is not included in over-all budget totals. The Division of Forestry budget includes all expenditures for this activity.

## FRICOT RANCH SCHOOL FOR BOYS

A minimum security correctional school for boys in the 8 to 15 age group. The school program embraces academic and prevocational instruction, and limited agricultural and work projects.

Located 11 miles east of San Andreas, Calaveras County

15					
16					
17					
18					
19					
20	Number of positions	40.4	44.4	52.4	8
21					
22	<b>POPULATION AND UNIT COSTS</b>				
23	Average pupil population	105	140	140	—
24	Average cost per pupil	\$1,953	\$1,846	\$2,035	\$189
25					<b>(10.2%)</b>

**SALARIES AND WAGES:** The increase of \$26,333 is due in general to the following proposed new positions:

26					
27	1 Dining room assistant				\$2,280
28	This position is to provide adequate supervision over the wards' serving and cleaning operations of the				
29	dining rooms.				
30	4 Boys' group supervisors				12,864
31	These positions are to provide double custodial coverage during activity hours seven days a week, when				
32	boys are not in classes or on work projects. Experience has demonstrated that one supervisor per 50-boy				
33	cottage is inadequate during these periods.				
34	1 Youth Authority teacher				3,216
35	This position is to provide a teacher for an anticipated increase in the average daily attendance in classes.				
36	At present an average of only 82.3 wards or 60 percent of population is attending, which is below Youth				
37	Authority average. This will allow an average daily attendance of 97.3 or 69.5 percent in 1952-53.				
38	1 Carpenter				3,720
39	1 Painter				3,720
40	These positions are to provide proper and required maintenance on new and existing buildings. At present				
41	only two positions are available, other than one truck driver and one ditch tender, which is inadequate con-				
42	sidering the investment in buildings and in comparison with other schools.				
43	Temporary help (water ditch repairs)				500
44	For emergency repairs to the ditch which carries the water supply to the institution, particularly during				
45	the winter months to avert serious damage during inclement weather.				

**OPERATING EXPENSES:** Increase of \$3,515 due to price increases and occupancy of additional buildings.

**EQUIPMENT:** Total of \$2,730 is a decrease of \$1,033. No major items of equipment are included.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53

13								
14	TOTAL EXPENDITURES FOR SUPPORT -----	\$660,877	\$721,222	\$724,076	\$2,854 (0.4%)			
15								
16								
17	GENERAL ANALYSIS							
18								
19								
20	Number of positions -----	137.5	136	136.8	0.8			
21								
22	POPULATION AND UNIT COSTS							
23	Average pupil population -----	307	310	310	-			
24	Cost per pupil -----	\$2,157	\$2,326	\$2,336	\$10 (0.4%)			
25								
26	In general increases in expenditures and per capita costs are based on price increases in operating expenses, additional equipment							
27	and proposed new positions.							
28								
29	SALARIES AND WAGES: The increase of \$6,600 in salaries and wages is due primarily to two proposed new positions.							
30	Proposed New Positions:							
31	1 Supervising cook I -----				\$3,372			
32	This position is to provide full relief for the supervising cook II and other culinary employees on a 7-day							
33	per week basis, and will be responsible for the meat cutting operations.							
34	1 Instructor in general shop -----				\$3,216			
35	This position is to teach a new class in general shop. An institution printer is being deleted and this posi-							
36	tion is proposed in lieu of that one. The new class will provide general shop instruction, more appropriate							
37	for pre-vocational training for boys in this age group.							
38								
39	OPERATING EXPENSES: The increase of \$1,860 is due generally to price increases.							
40								
41	EQUIPMENT: The total of \$13,524 represents a decrease of \$4,126 from the 1951-52 fiscal year. The major items of equipment are							
42	for the purpose of establishing the new course in general shop practices, \$3,270.							
43

## Department of Corrections—Youth Authority

## PASO ROBLES SCHOOL FOR BOYS

A correctional school for boys in the 14 to 16 age group. The program is primarily prevocational and academic education. Limited agricultural instruction is also given.

Located near Paso Robles, San Luis Obispo County

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>SUMMARY AND</b>				
2	<b>RECONCILIATION WITH APPROPRIATIONS</b>				
3	<b>General Fund</b>				
4	<b>SUPPORT</b>				
5	Budget Act appropriation	\$266,100	\$281,573	\$312,896	
6	Allocations from Salary Increase Fund	5,999	19,600	-	
7	Allocations from Price Increase Fund	13,892	6,885	-	
8	Total Available	\$285,991	\$308,058	\$312,896	
9	Unexpended balance, estimated savings	-12,455 <sup>a</sup>	-7,331 <sup>b</sup>	-	
10	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$273,536</b>	<b>\$300,727</b>	<b>\$312,896</b>	<b>\$12,169</b> (4%)
11	<b>GENERAL ANALYSIS</b>				
12	Number of positions	54.2	53.7	57.7	4
13	<b>POPULATION AND UNIT COSTS</b>				
14	Average pupil population	137	135	135	-
15	Cost per pupil	\$1,996	\$2,228	\$2,318	\$90 (4%)
16	New construction originally scheduled for completion in the 1952-53 Fiscal Year has been delayed so that occupancy is not reflected in this budget. Per capita cost increases are generally due to price increases and additional positions at the present institution.				
17	<b>SALARIES AND WAGES: The increase of \$12,121 is due mainly to the following proposed new positions:</b>				
18	2 Boys group supervisors				\$6,432
19	These positions will provide double supervisory coverage seven days a week during the afternoon and the evening activity hours in the discipline unit similar to that provided at other schools.				
20	1 Youth Authority teacher				3,216
21	This position will provide instruction to increased enrollment based on an approved student-teacher ratio of 15:1. It is the desire of the Youth Authority to increase activity programs among the boys while new construction is in progress.				
22	1 Groundsman and flower gardener				2,640
23	This position will provide instruction in plant propagation and will plant and maintain the shrubs and lawns included in the landscaping around the new buildings. As in the case of the above position, it should stimulate activity among the wards during the construction period.				
24	<b>OPERATING EXPENSES: The decrease of \$1,645 is primarily due to decreases in farm feed purchases because of increased locally grown feeds and decreased clothing prices.</b>				
25	<b>EQUIPMENT: The total of \$4,917 represents an increase of \$1,203 over the 1951-52 Fiscal Year. Additional and replacement fire-fighting equipment is the major source of increase.</b>				
26	<b>SUPPORT EXPENDITURES</b>	<b>NO. OF POSITIONS</b>

## GENERAL ANALYSIS

14					
15					
16					
17					
18					
19					
20					
21	Number of positions -----	257.2	257.5	258.5	1
22					
23	POPULATION AND UNIT COSTS				
24	Average Pupil Population:				
25	At school -----	536	525	525	-
26	At diagnostic clinic <sup>b</sup> -----	119	125	125	-
27	Total -----	655	650	650	-
28	Average institutional cost per pupil <sup>c</sup> -----	\$1,933	\$2,111	\$2,127	\$16 (0.8%)

The increase in per capita cost is largely due to three proposed new positions, offset by the abolishment of two positions, and increased prices in operating expense items.

SALARIES AND WAGES: The increase of \$12,452 is due primarily to the following proposed new positions:

31					
32					
33					
34					
35					
36					
37	2 Placement Officers II -----				\$8,808
38	These positions are to be established in lieu of two military instructors. They are to strengthen the classification procedures, giving more individual attention to the wards and assisting the classification committee in developing proper assignments.				
39	1 Cook (expires June 30, 1953) -----				3,216
40	This position will provide vacation and regular relief for the cooks in both the wards and employees kitchens, and will allow for the preparation of two meals per day at the farm cottage, with one meal to be prepared in the main kitchen and transported to the farm. At the time the diagnostic clinic is moved to Sacramento, the kitchen at the farm cottage will no longer be operated and this position will not be needed.				
41	Temporary help (military leave) -----				400
42	This amount is necessary to provide relief for those persons performing military duties under Section 395 of the Military and Veterans Code.				

OPERATING EXPENSES: The decrease of \$1,395 is due to the elimination of commissary privileges and reduction in dairy feed purchases, offset in part by price increases, costs of operating the new gymnasium for a full year, and increased work clothing issued to parolees.

EQUIPMENT: The total of \$20,393 is a decrease of \$1,002 from the total of \$21,395 in the 1951-52 Fiscal Year. Items of major importance are for the replacement of equipment in the bakery, totaling \$4,400, replacement of three riding horses for patrolling the fence, \$1,050, replacement of fire fighting equipment, \$1,738, and replacement of blankets, \$1,271.

<sup>a</sup> Composed of savings in salaries and wages, \$2,442; operating expenses, \$60; equipment, \$696; and excess reimbursements, \$1,969.

<sup>b</sup> These boys are fed, housed, and otherwise cared for at the Preston School of Industry.

<sup>c</sup> Excluding cost of operating the diagnostic clinic, expenditures for which are provided in the Youth Authority's departmental administration budget.

## Department of Corrections—Youth Authority

## LOS GUILUCOS SCHOOL FOR GIRLS

Correctional school for girls in the 8 to 15 age group. The program consists of academic training, domestic arts, and a rounded recreation program.

Located near Santa Rosa, Sonoma County

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>SUMMARY AND</b>				
2	<b>RECONCILIATION WITH APPROPRIATIONS</b>				
3	<b>General Fund</b>				
4	<b>SUPPORT</b>				
5	Budget Act appropriation .....	\$239,264	\$286,604	\$435,773	\$149,169
6	Allocations from Salary Increase Fund .....	2,287	20,358	—	—20,358
7	Allocations from Emergency Fund .....	6,430	—	—	—
8	Allocations from Price Increase Fund .....	—	8,135	—	—8,135
9	Total Available .....	\$247,981	\$315,097	\$435,773	\$120,676
10	Unexpended balance, estimated savings .....	—2,288 <sup>a</sup>	—2,067 <sup>b</sup>	—	2,067
11	<b>TOTAL EXPENDITURES FOR SUPPORT</b> .....	<b>\$245,693</b>	<b>\$313,030</b>	<b>\$435,773</b>	<b>\$122,743</b> (39.2%)
12	<b>GENERAL ANALYSIS</b>				
13	Number of positions .....	48.7	69.1	82.4	13.3
14	<b>POPULATION AND UNIT COSTS</b>				
15	Average pupil population .....	117	135	201	66 (48.9%)
16	Average cost per pupil .....	\$2,125	\$2,319	\$2,168	—\$151 (—6.5%)
17	The increases reflect completion of new buildings and an increase of 48.8% in average population from 135 in 1951-52 to 201 in 1952-53, necessitating additional staff.				
18	<b>SALARIES AND WAGES: The increase of \$40,811 is generally due to the following proposed new positions:</b>				
19	1 Intermediate typist-clerk .....				\$2,520
20	This position is to provide 8-hour Saturday-Sunday switchboard and information desk coverage as well as added clerical assistance in the administrative offices on three week days.				
21	1 Assistant supervising institution cook .....				3,372
22	This position will provide necessary day off coverage for the supervising cook, do the necessary meat cutting and assist in planning, directing and coordinating food administration at this institution.				
23	2 Kitchen helpers .....				4,560
24	These positions will provide coverage in the dining rooms and dishwashing area seven days a week and supervision of janitorial work in the new buildings in this area as time permits.				
25	6 Girls' group supervisors (effective August 1, 1952) .....				17,688
26	These positions will provide custodial coverage 24 hours a day, seven days a week in new dormitory. Double coverage on activity hour (afternoon-evening) shift provided as in other new 40-girl dormitories.				
27	0.3 Senior dentist .....				1,840
28	This position will provide dental care for expanded population which was formerly performed by service agreement. Operating expenses have been reduced as contract service will no longer be required.				
29	2 Youth Authority teachers .....				6,432
30	These positions will provide instruction on a teacher-student ratio of 1:15 for remedial instruction for the increased school enrollment based on increased average population of 66 girls.				
31	1 Painter .....				3,720
32	This position will provide maintenance of the increased number of buildings. Proper preventative maintenance including external and internal painting should prevent large outlays for repairs at a later date. Total staff will be in line with other schools.				
33	1 Groundsman and flower gardener .....				2,640
34	This position will provide supervision over increased landscaping and ground maintenance when new buildings are erected as well as to drive truck for pickup of supplies, hauling trash and garbage, not adequately performed at present by storekeeper.				
35	1 Institution firefighter (intermittent) .....				360
36	This position will provide seven-day coverage in the institution firehouse. This will provide seven intermittent firefighters in all.				

**OPERATING EXPENSES:** Increase of \$44,565 due to increased population and price increases.

**EQUIPMENT:** Total of \$6,229 represents an increase of \$1,225. No major items of equipment requested.

<sup>a</sup> Composed of savings in salaries and wages, \$1,370; operating expenses, \$1,005; equipment, \$716; and loss in reimbursements, \$803.

<sup>b</sup> Composed of savings in salaries and wages, \$2,067.

11	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$463,338</b>	<b>\$495,524</b>	<b>\$513,052</b>	<b>\$17,528</b> <b>(3.5%)</b>

## GENERAL ANALYSIS

Number of positions	96.5	93.1	93.6	0.4
<b>POPULATION AND UNIT COSTS</b>				
Average pupil population	181	180	180	-
Cost per pupil	\$2,587	\$2,753	\$2,850	\$97 (3.5%)

The increases in per capita costs are due generally to price increases. No increase in population nor major change in program is expected. Farming operations are to be discontinued as of June 30, 1952.

## SALARIES AND WAGES: The increase of \$10,736 is mostly accounted for by:

## Proposed New Positions:

1 Intermediate account clerk (6 months)	\$1,200
This position is to bring property and equipment records to a current basis so that they may be currently maintained by present staff. Shortage and turnover in staff during and since the war years have caused serious lag in property records and inventories.	
1 Intermediate typist-clerk (information and switchboard)	1,055
This position will provide 8-hour coverage on the information desk and telephone switchboard on weekends, in addition to providing general clerical assistance.	
1 Junior psychiatric social worker	3,540
This position is to provide full time psychiatric follow-up and observe progress from therapeutic processes to supplement the part-time services of a psychiatrist.	
1 Groundsman and flower gardener	2,772
Although the farming operations are to be discontinued, eliminating two positions, assistance is needed to care for the lawns and grounds, and to maintaining of minimum of male employees in this girls' school for reasons of security. This position will provide the needed assistance.	

## POSITIONS TO BE ABOLISHED:

—1 Vegetable gardener	—\$3,795
—1 Farmhand	—2,630
These positions will not be necessary when farming operations are discontinued.	

## OPERATING EXPENSES: Increase of \$2,778 due to price increases.

EQUIPMENT: Total of \$11,816 represents an increase of \$4,001. Major items include \$4,300 for a new bus to transport girls to recreational areas off the school grounds, and \$1,721 for replacement of old dining room and living room chairs.

## DEPARTMENT OF EDUCATION

## General Activities

performs administrative, supervisory, and advisory functions for the Public School System under the general direction of the State Board of Education. Also responsible for the administration of 10 state colleges, the California Maritime Academy, six special schools for physically handicapped children, three workshops for the blind, and the state-federal program of vocational rehabilitation. These activities are carried on through the Divisions of Departmental Administration, School Administration, Instruction, State Colleges and Teacher Education, Special Schools and Services, and Library.

29	<b>GENERAL ANALYSIS</b>				
30	Number of positions	312.2	353	367	14
31	Continuing growth of the public schools, as well as the impact of a partial wartime economy, have brought forth the need to strengthen certain activities of the Department of Education. In the Division of Public School Administration the need for analysis, evaluation, and study of school financing and related fields of school administration is being met in this budget. In the Division of Instruction provision is made for bolstering the adult and elementary education programs. In the field of rehabilitation of the newly blinded, positions are provided to continue the program adopted in 1951-52. Reductions are contemplated in Operating Expenses and Equipment totals for the budget year due to savings in rentals and decreases in the printing program.				
32	Provision is made for continuance of the Child Care Program on the same basis as in 1951-52. A survey of schoolhouse facilities in California is being conducted as a joint state-federal program, with completion of the survey anticipated by the close of the budget year.				
33	The budget for the department proper is predicated on a move to the new Education Building early in 1953, and provision is made herein for the necessary expenses incident to the move.

## DIVISION OF DEPARTMENTAL ADMINISTRATION

## Administrative Unit

Includes the office of the Superintendent of Public Instruction and other general administrative, fiscal, personnel, and legal activities.

## Analysis

An administrative assistant with clerical assistance is provided in the director's office to prepare the monthly reports to the Governor's staff and to assist in administrative details in connection with programs carried on by the department. A reduction is anticipated in Operating Expenses because of the anticipated move to the new Education Building in the middle of the budget year.

<sup>a</sup> Composed of savings in salaries and wages, \$544; operating expenses, \$51,398; equipment, \$2,483; and excess reimbursements, \$2,055.<sup>b</sup> Composed of savings in salaries and wages, \$55,078; and excess reimbursements, \$5,464.

75	School Planning						
76							
77	Assists and advises school districts and state colleges in regard to acquisition of sites and construction of school buildings.						
78							
79	Analysis						
80							
81	No change in the level of activity for this unit is contemplated in the budget year. During 1951-52 it was necessary to augment the staff						
82	of this office by two field representatives and two clerical positions to process applications and obtain funds for school districts in						
83	areas adjacent to federal installations which qualified for federal funds under Public Laws 815 and 874. These positions have been						
84	extended into the budget year to meet the continuing needs of this program.						
85

1	SUPERVISION OF CHILD CARE CENTER PROGRAM						
2							
3							
4	Includes state-level supervision, advisory services on child care and auditing of the records of Child Care Centers. Also has respon-						
5	sibility for apportionment of state funds appropriated for support of these centers.						
6							
7	Analysis						
8							
9	State support for Child Care Centers is continued by Chapter 1263, Statutes of 1951, until June 30, 1953. Aside from minor adjust-						
10	ments for salary and price increases, no change in state-level supervision is contemplated in extending this program for the budget						
11	year 1952-53.

## Department of Education

## VOCATIONAL EDUCATION

The state program for vocational education is based upon a cooperative plan between the Federal Government and the State Department of Education, under the general direction of the Commission for Vocational Education. Acceptance of the federal vocational education acts requires certain matching amounts of state funds to augment federal grants-in-aid in this field. These funds are expended for state level supervision and teacher training, with any remaining balances distributed to 300 public secondary schools as partial reimbursement for their participation in the program. The program is administered through the Bureaus of Agricultural Education, Business and Distributive Education, Homemaking Education, Trades and Industries Education, and Occupational Information and Guidance, under the Division of Instruction in the Department of Education.

62					
63	<b>GENERAL ANALYSIS</b>				
64	Number of positions-----	92.4	92	93	1
65					
66	Regular vocational education activities in 1952-53 will receive additional federal grants based upon the recently completed decennial				
67	census. The major part (\$203,978) of this \$253,248 federal increase will be used to reimburse school districts for approved voca-				
68	tional instruction. The remaining \$49,270 is budgeted to restore 1951-52 reductions in state-level supervision of the distributive				
69	education program, and meet a portion of the growing demand for expansion in peace officers training. Specialized activities				
70	in agricultural on-farm training and apprenticeship training will be curtailed to conform to decreasing veteran enrollment and comple-				
71	tion of instructional manuals for apprentices in the major trades.				
72					
73	<sup>a</sup> Does not include reimbursements to school districts maintaining approved vocational instruction. See Local Assistance Budget.				
74	<sup>b</sup> Neither federal aid revenues, nor the expenditures therefrom, are included in the over-all budget totals.				
75	<sup>c</sup> These state appropriations, together with all federal grants, are deposited in the Vocational Education Fund, from which expenditures				
76	are made.				
77

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
	50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
SUPERVISION AND TEACHER TRAINING						
Provides state-level supervision of vocational education programs in the public schools. Adequate supervision and teacher training programs are required under the federal acts, and 50 percent of the costs of this program are normally met from federal funds.						
Analysis						
Although expenditures will increase \$49,270, or 7 percent over 1951-52, this increase will be absorbed within the total Vocational Education Fund budget, with no change in the General Fund appropriation for this purpose. Restoration of distributive education positions and operating expenses, which were deleted in 1951-52 because of a cut in federal grants, will require \$27,850. Approximately \$10,000 is also budgeted to provide one traveling instructor and staff for a second institute for the Peace Officers' Training Program. Remaining increases are caused by minor price increases and a loss of approximately \$19,000 in reimbursements for services rendered the agricultural On-farm Training Program by the Bureau of Agricultural Education.

## GENERAL ANALYSIS

<i>Number of positions</i> -----	189.2	178.5	175.5	—3
----------------------------------	-------	-------	-------	----

The current fiscal year Congress passed a reduced federal appropriation. With many states increasing their participation in the program, California's share was only \$1,550,554 instead of the anticipated \$1,700,000. This reduction was accompanied by a fixed minimum for case services, and allowances of \$22,760 for special projects. The net result of this cut-back was the layoff of 10 professional and 8½ clerical positions, case service funds of \$17,340 per field worker, and a rather heavy administrative and operational cost of 42 percent of total expenditures.

Present federal-state policy is directed at shifting program emphasis from personal services towards purchased services for clients. The trend in the budget year, therefore, is to put all additional funds into case services. Following this trend, with an increase of \$432,438 in total proposed expenditures, \$420,065 has been included in case service funds, the major portion of which is for increases in purchased physical restoration and training services. With the same level of administrative and operational activities, this increase in case service funding creates a ratio of personal services to purchased services of 35 percent to 65 percent which is in conformance with federal-state policies.

<sup>a</sup> Federal aid receipts and the expenditures therefrom are not included in the over-all budget totals.

<sup>b</sup> Nonscheduled appropriation. No reversion by categories.

<sup>c</sup> Composed of savings in salaries and wages, \$27,398; operating expenses, \$187,023; equipment, \$6,758; and loss in reimbursements, \$146,456.

## Department of Education

## DIVISION OF LIBRARIES

Provides library facilities and services for state officials, legislators, employees and institutions. Maintains state-wide library service for the blind, including loans of talking book machines and volumes of raised-type reading material. Gives assistance in establishing public libraries in those parts of the State without such service, lends books not available locally, does reference work requiring materials not available in smaller libraries, collects statistics and acts as a clearing house for library information. Supervisor inspects and advises county libraries.

## GENERAL ANALYSIS

Number of positions ----- 81.6 87 93 6

Re-emphasis of the program to strengthen the county free library system and integrate many duplicating county and city library services is planned for the budget year. This project, together with the increased staff necessary to meet expanded demands for state library services, and expenses of occupying additional quarters, result in an increase of \$33,457 over 1951-52, as follows:

## SALARIES AND WAGES

## Proposed New Positions:

1 Field representative -----	\$4,980
1 Intermediate stenographer-clerk -----	2,640
1 Senior librarian -----	3,720
1 Junior librarian -----	3,216
1 Senior clerk -----	2,916
1 Intermediate clerk -----	2,520
Temporary help (0.5) -----	1,140
	<b>\$21,132</b>

The field representative and intermediate stenographer-clerk are requested to inaugurate a program of rehabilitating and strengthening a large part of the county free library system badly in need of professional and financial assistance. The senior librarian and intermediate clerk are required to meet the backlog of cataloging and clerical work in the law and legislative reference section. The junior librarian is requested to handle the exchange of government documents made available under the Library Distribution Act, and to maintain the recently-cataloged map collection in a current condition. The senior clerk is necessary to make available current periodicals and eliminate the large backlog of unprocessed work in the periodicals section. Six months of temporary help is also required for the change-over of the present charge-out system in the blind section to a more space-saving filing system.

**OPERATING EXPENSES:** Increase of \$2,707 contains a new item of \$1,000 for Library Institute to strengthen, through in-service training and workshop techniques, professional personnel in the county library system for which the State Library is responsible. Remaining increases consist of printing of library laws, costs of new positions, and price increases.

**EQUIPMENT:** A total of \$47,489 is recommended, an increase of \$4,660 over 1951-52. Principal items, aside from \$34,300 for books, are: Cardineer files for blind section (\$3,500), card catalog cases (\$1,121), microfilm files, recordak reader, and furniture.

<sup>a</sup> Student enrollment for colleges represent full-time equivalent students, which are computed on the basis of 15 semester units of instruction representing one student equivalent.

<sup>b</sup> Residential population and costs of former Training Center for the Adult Blind are shown as Oakland Orientation Center for comparative purposes.

## Department of Education

## STATE COLLEGES, TECHNICAL COLLEGES, SPECIAL SCHOOLS AND BLIND CENTERS—Continued

## STATE COLLEGES

The primary function of state colleges is the training of teachers. They may also offer courses appropriate for a general or liberal arts education; offer vocational training in such fields as business, industry, public service, homemaking, and social service; and offer the preprofessional courses needed by students who plan to transfer to universities for advanced professional study. The 1949 Legislature authorized the colleges to grant the master's degree. At present, such degrees are being limited to individuals who engage in educational service.

## Analysis

Continued emphasis on the training of teachers to fill critical shortages existing in the California public schools, together with reshaping of curricular offerings to meet regional needs, will mark the direction of state college instruction during the budget year. Major factors of change influencing most or all of the colleges during 1952-53 are:

1. Upswing in enrollments through 1951-52 into 1952-53, despite initial decreases caused by the Korean situation in 1950-51. Stronger regional attendance, and establishment of three new Reserve Officer Training Corps units during the current year have tended to bolster enrollments over 1950-51 levels, with an anticipated total of 23,075 full-time equivalent students budgeted for 1952-53. The only substantial increase is at Long Beach, where initial facilities on a new campus site will permit a controlled expansion of 515 full-time equivalent students.
2. Faculty staffing allowances, based primarily upon 1951-52 student-teacher ratios, will provide 80.5 new teaching positions to meet enrollment demands, or in specialized instances, to provide minimum course offerings for degree and credential requirements in colleges where small enrollments do not provide sufficient instructors. Student-teacher ratios are as follows:

	Student teacher ratio	
	1951-52	1952-53
Chico State College -----	18-1	Minimum courses
Fresno State College -----	18-1	18-1
Humboldt State College -----	Minimum courses	Minimum courses
Long Beach State College -----	15-1	15-1
Los Angeles State College -----	16-1	16-1
Sacramento State College -----	15-1	15-1
San Diego State College -----	19-1	19-1
San Francisco State College -----	19-1	19-1
San Jose State College -----	19-1	19-1

At Chico, enrollment of 1,250 students would provide only 70.5 teachers at the approved ratio of 18-1, while minimum course offerings and practice teaching supervision require 75 positions. With 500 students, Humboldt would have only 33.8 teachers, while minimum requirements necessitate 41.3 positions in 1952-53. This college's situation became acute in 1951-52, when it became necessary to augment teaching positions beyond the 17 to 1 ratio.

3. Operation of all college demonstration schools by the State, resulting in the transfer of laboratory school operations at Chico, Fresno, and Humboldt from school districts concerned to college support budgets. Although partial staffs existed at these colleges in this function, an additional 29.6 instructional and clerical positions have been included to replace school district personnel. Recovery of state apportionments for public school support, based upon average daily attendance of children to be educated by the colleges, is anticipated as a reimbursement from the school districts involved, to help defray first-year operating costs.
4. New facilities provided by the present college construction program will be occupied at practically all colleges during 1952-53. Long Beach has moved to its new campus during the current year, occupying temporary structures until permanent buildings are completed. Sacramento, with the addition of a few temporary facilities, will move into its initial unit of permanent buildings in 1952-53. 64.5 additional maintenance positions have been provided to operate these new facilities at all campuses, but total operating expenses have not increased materially because added costs of new buildings tend to be offset by savings in rental costs.
5. Augmentations to administrative staffing (recognized at all colleges in 1951-52) have been confined largely to new colleges where growth demands the addition of administrative personnel. A total of 7.3 positions are proposed at a cost of \$42,620.
6. Clerical and technical staffing has necessarily been provided in conjunction with professional positions, and in most colleges results in allowances to meet selective service work loads and the instructional demands of increased enrollments. Individual variations, particularly in new building operations, affect over-all staffing patterns, as explained in each college analysis.

In addition to the above factors, individual allowances in positions, specialized operations, and equipment needs are proposed at each college to meet special problems and substandard conditions. Over-all expenditures also include increases in summer session and extension functions, which are wholly offset by student fees for such purposes.

Although not affecting over-all expenditures for the colleges, the continued decline in veteran enrollment will cause a sharp shift in financing from federal payments for veterans to state General Fund support amounting to \$78,400 in 1952-53.

## TECHNICAL COLLEGES

Three technical schools are administered by the Department of Education: California Polytechnic College, which offers occupational training in agriculture, engineering and industry, plus limited courses in liberal arts; Fresno State College—Department of Agriculture, patterned after the agricultural instruction program at California Polytechnic College, but dealing principally with problems affecting the central valleys; and the California Maritime Academy, which trains officers for the Merchant Marine and the Naval Reserve. Because of their vocational nature, instructional costs and equipment allowances of these schools are greater than at the liberal arts type state college.

## Analysis

Principal change is anticipated at California Polytechnic College, where completion of major dormitory units will permit increased enrollment of 735 full-time equivalent students, and will provide 49.2 teaching positions at the approved student-teacher ratio of 15-1. Enrollment at the Fresno Department of Agriculture is expected to remain constant, but initial occupation of a new 720 acre campus will permit expansion in the fields of plant science and animal science. Enrollment at the Maritime Academy is projected to reach maximum capacity of 200 midshipmen in 1952-53 by extensive use of the training ship for living quarters. Additional staffing and operating expenses (other than teachers at California Polytechnic College) are confined to minor price adjustments and work load needs for campus development and farm operation.

## Department of Education

## STATE COLLEGES, TECHNICAL COLLEGES, SPECIAL SCHOOLS AND BLIND CENTERS—Continued

## SPECIAL SCHOOLS FOR PHYSICALLY HANDICAPPED CHILDREN

Five special schools for the education of blind, deaf, and cerebral palsied children will be in operation in the budget year. Residential care and treatment needed for the proper training of these handicapped children is provided. The two schools for the deaf and the school for the blind provide education facilities from the primary grades through high school. The schools for the deaf also give considerable vocational training. Education and medical treatment is provided for children afflicted with cerebral palsy. The average student is enrolled for a period of from 3 to 15 months and is then returned to the local district facilities for continued medical supervision and treatment, and for special education in the local district schools. Outpatient clinics are also operated in conjunction with both the Northern and Southern California cerebral palsy schools.

## Analysis

Principal changes in the programs of the special schools in the budget year have been brought about by the construction program. Completion of new facilities during the current year at the School for the Deaf at Berkeley will permit an increased residential enrollment of 52 children and 20 additional day-students providing for a total enrollment of 492 students. Partial completion of initial facilities at the California School for the Deaf, Riverside, during the next fiscal year will allow an enrollment of 50 students beginning January, 1953. The present building program will be completed by the fall of 1953, providing for an enrollment of 225 to 250 students. No major changes are proposed in the programs of the School for the Blind, Berkeley, or of the Cerebral Palsy Schools. In addition to changes caused by new facilities, a more comprehensive staffing pattern for teachers at the School for the Deaf, Berkeley, has been recognized in order to provide a student-teacher ratio for advanced students that is in line with the other levels of instruction. Previous to the budget year, classroom space has been limited so that it has not been possible to establish proper ratios. Other proposed changes are necessary because of work load or in order to provide more adequate coverage.

## ORIENTATION CENTERS FOR THE ADULT BLIND

The Oakland Orientation Center admits blind persons as residents and trainees in an intensive orientation program. The aim of this program is maximum vocational and personal rehabilitation and the preparation of blind persons for useful and remunerative employment. The program of the orientation center will be closely coordinated with the services of the Bureau of Vocational Rehabilitation, with the home teacher and field service program, and with programs for training teachers and other personnel directed toward serving the blind.

## Analysis

Legislation effective September 22, 1951, converted the Training Center for Adult Blind to the Oakland Center, California Industries for the Blind, and transferred the residential facilities to the Oakland Orientation Center. Residential facilities (now occupied by approximately 90 residents), vacated hereafter will be devoted to the use of the training program of the Oakland Orientation Center for the Blind. No change is proposed in the level of expenditures for the budget year over that authorized for the current year except to provide for full year costs.

## CALIFORNIA INDUSTRIES FOR THE BLIND

The California Industries for the Blind consist of three production centers, located in Oakland, Los Angeles, and San Diego. These centers were previously known as workshops for the blind and supply sheltered factory employment to blind and partially-sighted persons who are not able to obtain or retain jobs in private industry. Activities in the production centers are many and varied, and include such items as manufacture of brooms, mops, pillowcases, surgical drapes and wrappers, aprons, rugs, brushes, rubber mats, and leather goods, in addition to fabrication and assembly of many products on a sub-contract basis.

This program provides some training and work experience for persons who are placed in gainful employment outside the production centers, and there is coordination with the Bureau of Vocational Rehabilitation of the Department of Education for this purpose. The production center program is not to be considered, however, as one of the sequential steps for the placement of blind persons in private industry.

The educational and training activities of the workshops are a direct charge against support. The manufacturing activities are financed from working capital supplied by the Workshops for the Blind Manufacturing Fund into which the proceeds of sales of products are deposited.

## Analysis

The only major adjustment in the programs of these industrial workshops is that change brought about by legislative action which converted the Training Center for the Adult Blind to the Oakland Center, California Industries for the Blind, and transferred the residential facilities to the Oakland Orientation Center effective September 22, 1951. The new Oakland Center, California Industries for the Blind will continue with the same manufacturing operations and facilities as existed previously with no proposed change in level of operations for the budget year from that approved in the current year. The budgets of the Los Angeles Center and San Diego Center, California Industries for the Blind also propose a continuation of the 1951-52 level of activities. Increases consist of price and minor operating adjustments.

## Department of Education

## CHICO STATE COLLEGE

A four-year liberal arts college specializing in teacher training curricula. This school serves the northeastern section of the State, and provides some courses of a terminal nature to meet the junior college needs of the Chico area.

A slight upswing in enrollment to 1,250 full-time equivalent students, plus complete state operation of the campus demonstration laboratory school in the budget year, will result in increased operating costs of \$113,567, or 12.7 percent over 1951-52, as follows:

**SALARIES AND WAGES:** An increase of \$128,347, or 17.3 percent over 1951-52, results from the inclusion of 18.5 teaching and related positions to permit full state operation of the laboratory school, formerly run by the Chico School District; 5.8 new instructional positions to permit a minimum required number of course offerings at this college (3.5 positions in addition to teachers allowed on student-teacher ratio of 18-1); 4 maintenance positions to staff and maintain new facilities, and one clerical position for necessary Business Office coverage.

**OPERATING EXPENSES:** An increase of \$17,343, or 17.3 percent over 1951-52, is caused by a variety of minor increases due to price rises and instructional costs (\$8,880), additional operating costs of state-operated laboratory school (\$5,050), increased payments to master teachers (\$1,750), and added summer session expenses.

**EQUIPMENT:** A total of \$70,150, or \$11,898 over 1951-52, is composed principally of instructional equipment necessary to equip classrooms and laboratories adequately (\$46,160), library books and furniture (\$13,050), maintenance equipment for plant upkeep (\$6,735), furnishings for laboratory school (\$1,650), and renovation of office machines and furniture.

**REIMBURSEMENTS:** An increase of \$44,021 represents a one-year recovery of state apportionments for public school support from the Chico City School District for the cost of educating elementary students in the college demonstration laboratory school.

<sup>a</sup> Composed of savings in salaries and wages, \$11,094; operating expenses, \$14,261; and equipment, \$2,611.

<sup>b</sup> Composed of savings in salaries and wages, \$715; and operating expenses, \$629.

## General and Professional Departments

This unit of Fresno State College corresponds with the other liberal arts type state colleges, as compared with the function of the Department of Agriculture which more nearly resembles the instructional methods of California State Polytechnic College. Moderate enrollment increases anticipated for this unit in the budget year, coupled with occupancy of the first four buildings at this college's new campus site, will create a rather sharp upswing in operating costs over the current year. In addition, full state operation of the new campus laboratory school is contemplated in 1952-53. These factors result in an increase of \$132,568, or 8 percent over 1951-52, as follows:

**SALARIES AND WAGES:** An increase of \$113,392, or 8 percent over 1951-52, results primarily from 5.9 positions to operate the campus laboratory school, 6 maintenance positions to care for facilities at the new campus, and a chief of plant maintenance to fill a critical need for better technical supervision and planning of plant maintenance and minor construction needs. In addition, 4.5 teaching and related instructional positions have been provided to meet increased enrollment needs, and 4 administrative and clerical positions have been proposed to meet requirements of this enrollment and of two-campus operations. One clerk is also provided for selective service work load.

**OPERATING EXPENSES:** An increase of \$22,838, of 13.1 percent over 1951-52, is accounted for principally by \$6,900 increase in instructional and library operating costs, and new campus costs for telephone installation (\$2,625), moving expenses (\$4,000), utility expense (\$5,500), and building and ground maintenance (\$1,345). An additional \$1,800 is proposed for payments for master teachers' services.

**EQUIPMENT:** The total of \$99,526, an increase of \$22,003 over 1951-52, consists primarily of instructional equipment required for proper operation of classrooms and laboratories (\$51,159), and books and other library equipment (\$23,005). Maintenance equipment is \$8,235 is proposed for new campus operations and replacements, and \$14,000 is provided to purchase a 42-passenger bus for transportation between campuses.

**REIMBURSEMENTS:** An increase of \$25,665 representing a one-year recovery of state apportionments for public school support from the Clovis Elementary School District for the cost of educating elementary students in the college demonstration laboratory school.

## Department of Agriculture

Expenditures for the agricultural unit are budgeted at the same level of instructional program as the current year, but farm operations are expanded to permit initial occupation of 720 acres of farm land at the new campus site. The increase of \$30,293, or 12.7 percent over 1951-52 lies principally in the fields of plant science and animal science, where planting of fruit trees and field crops, and the development of beef, sheep, hog, and dairy departments require additional staffing and increased operational costs. Two farmhands, one chauffer for two-campus transportation, and one janitor for new buildings have been provided to meet the needs listed above. A total of \$7,518 for equipment is required, primarily for operation of new farm property.

46					—
47	Decline in enrollment has made it impossible to maintain adequate course offerings to as few as 500 full-time equivalent students at the approved student-teacher ratio of 17-1. It has therefore been necessary for the 1951-52 Fiscal Year to budget this college on the basis of sufficient staff to provide minimum curricular standards for degree and teacher's credential requirements. This pattern has been extended to the 1952-53 Fiscal Year, with slight increases in positions and operations due to occupancy of new buildings and facilities. In addition, full state operation of the campus demonstration elementary school is contemplated for the 1952-53 Fiscal Year. The above factors result in an increase over the 1951-52 Fiscal Year of \$63,955, or 10.7 percent, as follows:				
48	<b>SALARIES AND WAGES:</b> An increase of \$68,047, or 14.4 percent is caused primarily by 7.2 positions required for full state operation of the demonstration school. An additional 2.3 instructional positions are provided to meet minimum course offerings in the 1952-53 Fiscal Year, and 7.5 positions are included to staff and maintain new facilities.				
49	<b>OPERATING EXPENSES:</b> An increase of \$11,742, or 17.7 percent is accounted for mainly by added costs of maintaining new facilities (\$6,000), and necessary library operations (\$1,650). Demonstration school operations will require an additional \$1,350, and \$2,700 is provided for price increases of administrative items and instructional supplies.				
50	<b>EQUIPMENT:</b> A total of \$68,214, or \$12,363 over 1951-52, is provided to equip new or inadequate instructional facilities (\$35,000), provide needed library books (\$17,800), renovate demonstration school equipment (\$2,300), and improve maintenance equipment (\$4,484). An additional (\$8,600) is provided to modernize furniture and equipment in administrative offices.				
51	<b>REIMBURSEMENTS:</b> An increase of \$28,197 representing a one-year recovery of state apportionments for public school support from the Arcata City School District for the cost of educating elementary students in the college demonstration laboratory school.				
52	<sup>a</sup> Composed of savings in salaries and wages, \$4,285; operating expenses, \$12,909; equipment, \$3,825; and excess reimbursements, \$361.				
53	<sup>b</sup> Composed of savings in operating expenses, \$1,900.

## Department of Education

## LONG BEACH STATE COLLEGE

Two-year upper division liberal arts college with a primary function of teacher training. This school was established in the fall of 1949 in temporary quarters near the City of Long Beach, and was temporarily designated the Los Angeles-Orange County State College. On June 7, 1950, the Director of Education officially named the school the Long Beach State College, and accepted a gift of 316 acres of land from the City of Long Beach for a permanent campus site. The college is now being operated at this new location in temporary facilities, pending completion of its first permanent buildings.

Located at Long Beach

## GENERAL ANALYSIS

Number of positions -----	61.3	124	181	57
<b>ENROLLMENT AND UNIT COSTS</b>				
Regular Session:				
Enrollment (full-time equivalent students) -----	695	1,135	1,650	515 (45.4%)
Cost per student -----	\$497	\$590	\$585	—\$5 (0.8%)
Summer Session:				
Enrollment (individuals) -----	795	966	1,600	634 (65.6%)
Cost per student -----	\$32	\$41	\$45	\$4 (9.8%)

Occupancy of new temporary facilities permitted an expansion of this college's enrollment to 1,135 full-time equivalent students during the current year. Augmentation of these buildings before the budget year will allow enrollments to grow to 1,650, or an increase of 515 in 1952-53. Additional personnel and operating expenses to meet this enrollment will result in an increase over the current year of \$328,221, or 46.2 percent, as follows:

**SALARIES AND WAGES:** An increase of \$294,052, or 48.7 percent provides 36 new teaching positions at the approved student-teacher ratio of 15-1. Fourteen additional clerical and technical positions are provided to meet expanded work loads in the personnel office, business office, and instructional divisions; and three positions are included for proper library staffing to meet accreditation requirements. Four additional basic maintenance positions are provided for skeleton staffing for building and grounds upkeep. \$32,000 will also be needed to meet expanded enrollment of 634 students during summer session.

**OPERATING EXPENSES:** An increase of \$34,169, or 32.4 percent, is accounted for primarily by provision of \$11,000 for master teaching services, and instructional costs of \$13,000 based upon expanding enrollment. Increases of \$6,800 in maintenance costs of new campus operations are partially offset by a decrease of \$5,000 for formerly-occupied rented quarters. Additional minor increases in general operating expenses due to price adjustments, and growth of library operations account for the balance of this category.

<sup>a</sup> Composed of savings in salaries and wages, \$2,710; and operating expenses, \$9,593.

<sup>b</sup> Composed of savings in salaries and wages, \$25,706.

## Department of Education

## LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES

two-year upper division and graduate college with two primary functions: First, the training of students for gainful occupations in arts and sciences as related to business and industry through cooperative relationships with industry and business; second, the training of students for teaching in the public schools of California. Secondary functions of the college consist of offering courses appropriate for a liberal arts education in fields which are standard to established state colleges. The college is temporarily located on the campus of the Los Angeles City College under rental agreement with the Los Angeles City School District.

Located at Los Angeles

22	<b>TOTAL EXPENDITURES</b> -----	<b>\$1,213,861</b>	<b>\$1,391,016</b>	<b>\$1,622,382</b>	
23	<b>GENERAL ANALYSIS</b>				
24	Number of positions -----	209.7	211.5	240.5	29
25	<b>ENROLLMENT AND UNIT COSTS</b>				
26	Regular Session:				
27	Enrollment (full-time equivalent students) -----	2,308	2,400	2,700	300
28	Cost per student -----	\$500	\$550	\$574	(12.5%)
29	Summer session:				
30	Enrollment (individuals) -----	2,011	2,028	2,000	\$24
31	Cost per student -----	\$30	\$36	\$36	(4.4%)
32	Additional enrollment of 300 full-time equivalent students in the budget year is responsible for an increase of \$231,366 or 16.6% over 1951-52 as follows:				—28
33	<b>SALARIES AND WAGES:</b> An increase of \$188,224, or 17.6% provides 19 new teaching positions at the approved student-teacher ratio of 16:1. Two professional and three clerical positions are added to staff new facilities and meet backlog of initial book purchases. An additional 1.2 administrative and three clerical positions are proposed in keeping with over-all state college staffing patterns, and one new clerk is included to meet selective service requirements.				(—1.4%)
34	<b>OPERATING EXPENSES:</b> An increase of \$43,042, or 12.5% is accounted for primarily by \$22,500 increased rental costs for plant facilities at the Los Angeles City College, and \$11,700 additional cost of instructional supplies and services. Minor increases of \$2,250 for library operations, \$2,400 for master teaching services, \$2,500 for price increases, and \$2,400 for teaching services for junior college instruction make up the balance of this added cost.

SACRAMENTO STATE COLLEGE

two-year upper division liberal arts college with a primary function of teacher training, temporarily located on the campus of the Sacramento Junior College through rental agreement with the Sacramento City Unified School District. It is contemplated that the college will move to its permanent campus during the summer of 1952.

58					
59	During 1952-53, this college will move from its present rented quarters to a new campus site. Facilities available will include an adminis-				
60	tration building, a library (partial), a classroom building (partial), science buildings (partial), a cafeteria, and 13 temporary struc-				
61	tures. Operation of these new facilities, plus an anticipated increase of 100 full-time equivalent students enrolled in the budget year,				
62	result in an increase of \$163,963, or 20.5 percent over 1951-52, as follows:				
63	SALARIES AND WAGES: An increase of \$167,628, or 26 percent consists principally of 20 maintenance positions to create an initial				
64	staff to operate and maintain the buildings and grounds at the new campus, and 7.8 teachers and 6.8 related instructional positions to				
65	meet enrollment and new laboratory needs. In addition, 3 library positions are provided to replace junior college library staff now				
66	being used, 4 business office positions are included for normal staffing of this function, and 4 part-time administrative and 2 clerical				
67	positions for student personnel activities.				
68					
69	OPERATING EXPENSES: A decrease of \$3,415, or 2.2 percent under 1951-52, is accounted for by savings in rental charges of \$59,750				
70	occasioned by moving to the new campus, largely offset by increased operating costs for maintaining the new campus (\$17,500), mov-				
71	ing and transportation expenses (\$23,000), and instructional supplies and services (\$13,910).				
72					
73	<sup>a</sup> Composed of savings in salaries and wages, \$3,696; operating expenses, \$6,264; and equipment, \$718.				
74	<sup>b</sup> Composed of savings in salaries and wages, \$41,062; and operating expenses, \$20,910.

## Department of Education

## SAN DIEGO STATE COLLEGE

A four-year liberal arts college with a primary purpose of teacher training. Preparation of students for community occupational pursuits is especially important in an area particularly affected by defense industry and military expansion. A Reserve Officer Training Corps unit was established at this college in 1951-52.

39					
40	<b>GENERAL ANALYSIS</b>				
41					
42	Number of positions -----	357.6	333	349	16
43					
44	<b>ENROLLMENT AND UNIT COSTS</b>				
45	Regular Session:				
46	Enrollment (full time equivalent students) -----	3,536	3,300	3,400	100
47					(3%)
48	Cost per student -----	\$530	\$578	\$592	\$14
49					(2.4%)
50	Summer Session:				
51	Enrollment (individuals) -----	4,102	2,060	2,650	590
52					(28.6%)
53	Cost per student -----	\$34	\$48	\$42	—\$6
54					(—12.5%)
55	Extension:				
56	Enrollment (units) -----	1,629	2,598	4,383	1,785
57					(68.7%)
58	Cost per student -----	\$6	\$6	\$6	-
59					
60	An upswing in enrollment to 3,400 full-time equivalent students is anticipated for the budget year, reflecting somewhat the stabilization				
61	of defense activity, as well as growth of the newly-established R. O. T. C. unit. Occupancy of several new structures is also budgeted				
62	with permanent floor space increasing approximately 25 percent over existing buildings. These factors result in increased over-all				
63	costs of \$130,564, or 6.7 percent over 1951-52, as follows:				
64					
65	<b>SALARIES AND WAGES:</b> An increase of \$100,531, or 5.9 percent results primarily from the inclusion of 5.3 teachers and 3.4				
66	related instructional positions to meet enrollment needs, two clerical jobs to fill work load shortages in the library, two adminis-				
67	trative clerical positions for selective service requirements and health office coverage, and two maintenance positions for upkeep				
68	of new facilities. In addition, a chief of plant maintenance has been provided to fill a critical need for better technical supervisor				
69	and planning of plant maintenance and minor construction needs.				
70					
71	<b>OPERATING EXPENSES:</b> An increase of \$23,843, or 11.3 percent is accounted for by maintenance costs of new facilities, including				
72	utilities (\$13,512), and instructional supplies and services (\$8,750). Minor price adjustments compose the balance of this item				
73					
74	<b>EQUIPMENT:</b> A total of \$105,519, or \$6,190 over 1951-52, is composed principally of class teaching items needed to properly equip				
75	classrooms and laboratory facilities (\$67,914), books and other library items (\$25,160), laboratory school needs (\$2,570), and				
76	maintenance equipment for new and existing buildings and grounds (\$5,890). Office equipment and furniture for new positions				
77	has also been provided in the amount of \$3,985.				
78					
79	a Composed of savings in salaries and wages, \$4,641; operating expenses, \$12,019; equipment, \$7,224.				
80	b Composed of savings in salaries and wages, \$48,613; operating expenses, \$14,400.				
81

## SAN FRANCISCO STATE COLLEGE

A four-year liberal arts college specializing in teacher training. In connection with its curricula for training nursery school teachers and for other preschool studies the college has operated a child care center, in addition to its regular elementary demonstration school.

## SAN FRANCISCO STATE COLLEGE—Continued

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
------	--------------	-------------------	----------------------	---------------------	------------------------

## GENERAL ANALYSIS—Continued

Continuation of the growth pattern at this college corresponds with the completion of additional building facilities at the new campus, with 4,150 full-time equivalent students anticipated for 1952-53. Costs added by two-campus operations (until completion of the entire building program now financed), will increase during the budget year as more students will be shifted to the new campus. For this reason, and because of expanded enrollments, expenditures will exceed 1951-52 costs by \$218,195, or 8.8 percent, as follows:

**SALARIES AND WAGES:** An increase of \$157,086, or 7.6 percent, results primarily from 17 maintenance positions to care for facilities at the new campus, and a chief of plant maintenance to fill a critical need for better technical supervision and planning of plant maintenance and minor construction needs. An additional 3.1 teaching positions are included to meet enrollment needs, as well as 5 instructional clerks and technicians, and 4.5 administrative clerical positions. One additional clerk is included to meet selective service requirements, and 3 library positions are provided to staff the new library building to be occupied in the budget year.

**OPERATING EXPENSES:** An increase of \$49,508, or 17.4 percent, is accounted for by utility costs of new structures (\$12,800), other maintenance costs for the new campus (\$5,400), telephone installations for new buildings (\$3,000), moving expenses from old campus (\$10,000), instructional expense due to added enrollment (\$9,880), payments to local school districts for master teaching services (\$5,000), and operation of new library facilities (\$1,500).

**EQUIPMENT:** A total of \$119,383, or \$11,601 over 1951-52, is composed almost entirely of class teaching items needed to properly equip classrooms and laboratory facilities (\$71,643), books and other library items (\$31,298), laboratory school needs (\$3,052), and maintenance equipment for new facilities (\$5,074). Office equipment and furniture for new positions has also been provided in the amount of \$7,368.

## Department of Education

## SAN JOSE STATE COLLEGE

A four-year liberal arts college with a primary function of teacher training. The school is operated in conjunction with the San Jose Junior College on the State College campus, but separation of the two schools in the near future is planned. Demonstration teaching is conducted in the public schools, as opposed to the standard practice at other state colleges of operating an elementary demonstration school for this purpose.

43	Cost per student -----	\$4	\$4	\$4	-
44	Stabilization of enrollment at 5,600 full-time-equivalent students will permit the same level of instructional activity as in 1951-52.				
45	Price increases in operational costs, and occupancy of three new buildings will result in general increases in operating expenses;				
46	and these factors, coupled with minor staff augmentations to meet work load shortages, will result in an increase of \$112,606, or				
47	3.9 percent over 1951-52, as follows:				
48	<b>SALARIES AND WAGES:</b> A proposed increase of \$70,527, or 2.9 percent is caused primarily by inclusion of six new positions based				
49	upon selective work load needs—one plumber for maintenance of new and existing buildings, one senior librarian in the order				
50	section of the library, one equipment technician for this college's extensive laboratory facilities, one account clerk for the business				
51	office, and one clerk for selective service requirements. A chief of plant maintenance is also provided to fill a critical need for				
52	technical supervision and planning of plant maintenance and minor construction needs.				
53	<b>OPERATING EXPENSES:</b> An increase of \$41,498, or 13.5 percent is accounted for primarily by operational costs of new facilities				
54	(\$18,889), increased costs of instructional supplies and services (\$13,670), additional library binding and periodical expense				
55	(\$3,000), and general price adjustments (\$6,268).				
56	<b>EQUIPMENT:</b> A total of \$125,960, or an increase of \$581 over 1951-52, is composed principally of class teaching items needed to				
57	properly equip classrooms and laboratory facilities (\$63,407), books and other library items (\$41,012), and a 42-passenger bus				
58	to transport students between physical education facilities and the main campus (\$14,000). Maintenance equipment of \$4,617 is				
59	provided for adequate plant upkeep, while minor additions to office furniture and equipment compose the balance.				
60	<sup>a</sup> Composed of savings in salaries and wages, \$77,713; operating expenses, \$11,086; and equipment, \$4,285.				
61	<sup>b</sup> Composed of savings in salaries and wages, \$16,303; operating expenses, \$14,960; and excess of reimbursements, \$4,000.

## Department of Education

## CALIFORNIA STATE POLYTECHNIC COLLEGE

technical college providing occupational training in agriculture, engineering and industry, and in selected liberal arts fields. The college grants a Bachelor of Science degree in agricultural, engineering, and liberal arts; and has been accredited for granting a general secondary credential, a special secondary credential in vocational agriculture, a special secondary credential in physical education, and the special secondary limited credential in agriculture. In addition a program for graduate study leading to a Master of Arts degree is provided. Two-year vocational and three-year technical curricula are offered in all agricultural majors. Two and three-year technical curricula are offered in all engineering majors. The college maintains two branches in Southern California—the Voorhis Campus located at San Dimas, and the nearby Kellogg Campus located at Pomona. The Voorhis Campus offers programs in agricultural inspection, citrus fruit production, and ornamental horticulture. The Kellogg Campus, consisting of 812 acres acquired by gift deed November 1, 1949, is for expansion of the instructional facilities at this branch.

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>GENERAL ANALYSIS</b>				
2					
3					
4	Number of positions-----	357.5	353	409	5
5					
6	<b>ENROLLMENT AND UNIT COST</b>				
7	Enrollment (Full Time Equivalent Students) :				
8	San Luis Obispo-----	3,145	2,353	3,060	70
9	Voorhis-----	378	425	453	2
10					
11	Total-----	3,523	2,778	3,513	73
12					(26.5%)
13	Cost per student-----	\$566	\$733	\$677	—\$85
14					(—7.6%)
15	With the resumption of control of Camp San Luis Obispo by the Army, shortages in student housing facilities forced a curtailment of enrollment of 792 full-time equivalent students at the San Luis Obispo campus during 1951-52. Completion of new dormitory facilities will permit a return to normal enrollments in the budget year. Additional teaching positions and related instructional expenditures to meet this population growth are responsible for the increase of \$342,616, or 16.8% over 1951-52, as indicated below :				
16					
17					
18					
19	<b>SALARIES AND WAGES:</b> An increase of \$297,715 is caused by the addition of 49.2 instructors at the recognized student-teacher ratio of 15-1 ; a registrar at the Voorhis campus to meet minimum administrative staffing needs ; a graduate nurse and supervising clerk at San Luis Obispo and a senior librarian and a head janitor at Voorhis to meet serious shortages in work load coverage ; an immediate stenographer-clerk for selective service requirements ; and two equipment technicians for maintenance of scientific equipment.				
20					
21					
22					
23					
24	<b>OPERATING EXPENSES:</b> An increase of \$27,385 is caused primarily by additional instructional expenses (\$15,235), with minor increases in utilities, postage, and general office expenditures accounting for the balance.				
25					
26					
27	<b>EQUIPMENT:</b> A total of \$127,018, or \$13,838 over 1951-52, is composed principally of instructional items to properly operate classrooms, rooms and laboratories (\$52,750), books and other library equipment (\$32,742), maintenance equipment (\$24,000), and farm implements (\$11,754).				
28

## Department of Education

## CALIFORNIA MARITIME ACADEMY

The academy educates and trains young men to become licensed officers in the Merchant Marine. Three-year courses are offered leading to a Bachelor of Nautical Science Degree in navigation and seamanship and in marine and electrical engineering. Prior to graduation, candidates for the degree take the U. S. Coast Guard examinations for licenses as third mates or third assistant engineers. In addition, graduates are appointed ensigns in the U. S. Maritime Service and also are issued appointments as ensigns in the U. S. Naval Reserve. The academic course is supplemented by training at sea approximately three months each year on the training ship Golden Bear, which is on loan to the State from the Federal Maritime Administration.

The State receives for the academy an annual subsidy (currently \$25,000) for general overhead and 75 cents per diem for subsistence for qualified Naval Reserve students from the Federal Government. The Maritime Commission pays directly for the annual overhaul and drydocking of the training ship.

Located near Vallejo

## GENERAL ANALYSIS

Number of positions	65.6	63.2	63.2	-
<b>ENROLLMENT AND UNIT COSTS</b>				
Average enrollment	130	185	200	15
Cost per student	\$2,511	\$1,976	\$1,935	(8.1%)
				-\$41
				(-2.1%)

The academy's enrollment will expand from 185 in 1951-52 to 200 in 1952-53, which is the maximum number that can be billeted with existing accommodations.

**SALARIES AND WAGES:** During 1951-52 an authorized reorganization of the commissary department resulted in one additional position. This additional position was provided due to increased enrollment and in order to provide better food management, and was financed from increased appropriated student fees.

**OPERATING EXPENSES:** A net increase in operating expenses of \$15,943 is broken down into the following major changes: increase of \$952 in administration due to price and population increase; increase of \$7,226 in support and subsistence (feeding \$6,892; housekeeping, \$243; and medical care, \$91) due to price and population increase; increase of \$828 in maintenance and operation of base due to price and population increase; and increase of \$6,850 in maintenance and operation of ship to provide sufficient fuel oil for a cruise of 10,600 miles, which includes \$4,130 for foreign port consumption.

**EQUIPMENT:** Amount requested (\$2,747) is a decrease of \$1,733 over 1951-52. This request includes \$1,132 for instructional equipment, and the balance for various small items required for operation of the academy.

## Department of Education

## CALIFORNIA SCHOOL FOR THE BLIND, BERKELEY

A residential school for general education of blind, partially blind, and deaf-blind children through the elementary and secondary school levels. The education of the blind requires special equipment, particularly library and writing facilities, models for tactile study, and apparatus for corrective physical education. Guidance service is rendered to graduates and ex-pupils by the school field service. The deaf-blind unit is the only one in the western part of the United States where these doubly handicapped children may be educated.

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>SUMMARY AND RECONCILIATION WITH APPROPRIATIONS</b>				
2	<b>General Fund</b>				
3	<b>SUPPORT</b>				
4	Budget Act Appropriation:				
5	Support	\$281,226	\$336,866	\$368,467	
6	Field service—preschool children	12,356	<sup>a</sup>	<sup>a</sup>	
7	Readers for blind college students	25,000	<sup>a</sup>	<sup>a</sup>	
8	Allocations from Price Increase Fund	—	2,917	—	
9	Allocations from Emergency Fund	4,740	—	—	
10	Allocations from Salary Increase Fund	4,743	17,763	—	
11	Special appropriation for preschool children, Chapter 1492/51	—	6,000	—	
12	Transfer to School for Deaf	—2,279	—	—	
13	Total Available	\$325,786	\$363,546	\$368,467	
14	Unexpended balance, estimated savings	—14,031 <sup>b</sup>	—	—	
15	<b>TOTAL EXPENDITURES FOR SUPPORT</b>	<b>\$311,755</b>	<b>\$363,546</b>	<b>\$368,467</b>	<b>\$4,921 (1.4%)</b>

## GENERAL ANALYSIS

Number of positions	67.4	69.8	71.1	1.5
<b>ENROLLMENT AND UNIT COSTS</b>				
Average Student Enrollment:				
Blind	152	160	160	—
Deaf-blind	12	12	12	—
Totals	164	172	172	—
Cost Per Student:				
Blind	\$1,732	\$1,920	\$1,948	\$28 (1.5%)
Deaf-blind	2,320	2,612	2,651	39 (1.5%)

The budget proposes a continuation of the 1951-52 level of activities except for provision of one additional janitor required to provide adequate janitor service and relief coverage. Operating expense increase of \$2,693 represents price increases. Equipment total of \$6,155 is a decrease of \$6,423 from 1951-52 and consists only of minor items for the school, dormitories and hospital.

32					(21.4%)
33	The completion of additional facilities during the current fiscal year will allow an enrollment increase of 72 students giving a total population of 452 residential students and 40 nonresidential students. The operation of the school was planned and financed for an enrollment of 492 for 1951-52. As facilities for only 420 were completed and occupied a portion of the appropriation was not expended and will therefore revert.				
34	<b>SALARIES AND WAGES:</b> The budget provides for four additional positions at a total cost of \$10,200, as follows:				
35	2 Teachers costing \$5,100 which will lower the student-teacher ratio for advanced students from 1-12 to 1-10, this being in line with the other grades except for the primary kindergarten which has a ratio of 1-8. Previous to this budget year, classroom space has been limited so that it has not been possible to establish proper ratios.				
36	1 Vocational teacher at a cost of \$2,550 to permit the teaching of advanced sewing which is a worthy adjunct to the other vocational trades taught at the school. Completion of the new vocational building early in the budget year will permit the offering of this new course.				
37	1 Counselor at a cost of \$2,550 in order to provide night relief coverage for the dormitories. This position is necessary in order to staff the dormitories, including the three new dormitories now nearing completion, on a seven-day week basis.				
38	<b>OPERATING EXPENSES:</b> Total increase of \$30,112 is made up of some price increases, but with the major increases reflected in those operating expenses affected by the increased enrollment such as increased feeding cost of \$11,390 and laundry and housekeeping expense increase of \$4,240. \$4,800 is provided for manufacture and installation of group hearing aids by the Division of Architecture.				
39	<b>EQUIPMENT:</b> The request of \$28,302 includes \$8,369 for replacement of feeding equipment, necessitated by age or condition beyond worthwhile repair, and \$3,719 for additional feeding equipment required because of increased enrollment. Drapes and furniture costing \$3,368 is needed for the Primary Girls Dormitory, and \$1,925 is provided for a 1½ ton truck to replace the present truck which is too small, and because of age and condition is not worthy of needed repairs. Other equipment items are in line with normal needs of the school.				

<sup>a</sup> Composed of savings in salaries and wages, \$82,711; operating expenses, \$20,973; and excess reimbursements, \$1,204.

<sup>b</sup> Composed of savings in salaries and wages, \$16,964; operating expenses, \$23,884; and loss in reimbursements, \$2,436.

11	<b>GENERAL ANALYSIS</b>				
12	Number of positions-----	1.5	1.3	43	41.7
13	The partial completion of initial facilities during the next fiscal year will allow an enrollment of 50 students beginning in January of 1953. This budget proposes addition of 41.7 positions which are considered to be a minimum operating staff for this school. This school will be staffed on the same pattern as approved at the school in Berkeley. Operating expenses have been computed on the basis of experience at the northern school. Equipment recommended consists primarily of a 1½-ton truck and a suburban carry-all to provide for minimum transportation needs. Initial complements of equipment for buildings will be purchased from existing capital outlay appropriations. The present building program will be completed by the fall of 1953, providing for an enrollment of 225 to 250 students.

## Department of Education

## SCHOOL FOR CEREBRAL PALSID CHILDREN, NORTHERN CALIFORNIA

A residential school for the education and treatment of children afflicted with cerebral palsy, temporarily located at Redwood City. Students are enrolled from 3 to 12 months and are then returned to their local district facilities for continued medical supervision and treatment by the State Department of Public Health, and for special education in the local district schools. A diagnostic and treatment center is maintained through cooperation with the University of California School of Medicine, which provides diagnoses and clinical treatment for all children with cerebral palsy who are referred to the center.

## GENERAL ANALYSIS

Number of positions ----- 55.0 49.6 48.6 —1.0

## ENROLLMENT AND UNIT COSTS

Average student enrollment—resident students ----- 28 32 32 -  
 Average cost per student (excluding diagnostic and treatment  
 costs for nonresident children) ----- \$8,094 \$7,874 7,957 \$83  
 (1.0%)

The budget proposes a continuation of the 1951-52 level of activities. The net increase of \$3,305 consists of price increases and minor operating adjustments. The total of \$4,038 equipment provided for necessary items which would have become available in the course of constructing and equipping the new school, and for other minor items.

## Department of Education

## SCHOOL FOR CEREBRAL PALSID CHILDREN, SOUTHERN CALIFORNIA

A residential school for the education and treatment of children afflicted with cerebral palsy, temporarily located at Altadena. Students are enrolled 3 to 12 months and are then returned to their local district facilities for continued medical supervision and treatment by the State Department of Public Health, and for special education in the local district schools. A diagnostic treatment center is maintained under contract with the Children's Hospital and the Orthopedic Hospital in Los Angeles, which provides diagnosis and clinical treatment for all children with cerebral palsy who are referred to the center.

13					
14	<b>TOTAL EXPENDITURES FOR SUPPORT</b> -----	<b>\$270,932</b>	<b>\$310,925</b>	<b>\$333,024</b>	<b>\$22,099</b>
15					<b>(7.1%)</b>

16					
17	<b>GENERAL ANALYSIS</b>				
18					
19					
20	Number of positions-----	52	52.4	55	2.6
21					
22	<b>ENROLLMENT AND UNIT COSTS</b>				
23	Average Enrollment:				
24	Resident students-----	28	28	28	-
25	Day students-----	1	-	-	-
26	Cost per child-----	\$6,638	\$7,846	\$8,635	\$789
27					<b>(10.1%)</b>

The budget proposes a continuation of the 1951-52 level of activities except for provision for one additional attendant required because more severely handicapped children are being received. Provision is also made for purchase of a bus to transport the children in larger groups and for other equipment which would have become available in the course of constructing and equipping the new school, had it not been deferred.

## OAKLAND ORIENTATION CENTER

The Oakland Orientation Center was established September 22, 1951, by Chapter 1144 of Statutes of 1951. The orientation center shall admit blind persons as residents and trainees in an intensive program designed for the preparation of blind persons for useful and remunerative work in trades, professions, private business, private industry or public service.

11	<b>GENERAL ANALYSIS</b>				
12	Number of positions -----	-	34.4	48.2	13.8 (2.9%)
13	<b>POPULATION AND UNIT COSTS</b>				
14	Average resident population -----	-	110	110	-
15	Cost per resident member -----	-	\$1,545	\$1,972	\$426 (27.6%)
16	Conversion of the Training Center for Adult Blind to the Oakland Center, California Industries for the Blind and the transfer of the residential facilities to the Oakland Orientation Center was provided by legislative action in the 1951 session.				
17	No change is contemplated in the programmed expenditures for 1952-53 over those authorized for 1951-52 except to provide for the full year.				
18	As the program was in effect only part of the 1951-52 Fiscal Year, a comparison of expenditures with those for 1952-53 would be of no value.

## Department of Education

## LOS ANGELES CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons who are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The educational and training activities are a direct charge against the support budget. Manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund, as shown in the Appendix.

## Department of Education

## SAN DIEGO CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons who are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The educational and training activities are a direct charge against the support budget. Manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund as shown in the Appendix.

## TEACHERS' RETIREMENT SYSTEM

administers, through the State Teachers' Retirement Board, the Teachers' Retirement Act. Computes, collects, records, invests, and refunds contributions, and computes and pays retirement benefits. Members of the system consist of certificated employees of the Public School System and employees of state departments holding valid teaching credentials.

## GENERAL ANALYSIS

Number of positions----- 28.4 30 33 3

The Teachers' Retirement System will continue on the same level of service in 1952-53 as in the present year. Increased expenditures will result from an increasing work load of active and retired accounts and an added effort to put retirement verifications on a more current basis. Anticipated active and retired accounts by July 1, 1953 will be 157,000 members as compared with 141,800 members on July 1, 1951.

**SALARIES AND WAGES:** Increase of \$11,417 is caused principally by addition of one semisenior accountant at \$4,296 for technical skill and supervision of accounting work, and addition of two senior clerks at \$5,832 for verification of members' service prior to 1935.

**OPERATING EXPENSES:** An increase of \$1,131 is attributable to increased business machine rental of \$1,320, expenses of moving the Retirement Office to the new Education Building, and minor price increases, offset by decreases in rent and printing.

**EQUIPMENT:** A total of \$6,440 is proposed, a decrease of \$903 from 1951-52. The major portion of this amount provides for replacement of obsolete and worn out desks and chairs (\$4,478). Remaining requests are for equipment for new positions.

26					(16.1%)
27	Operations of the University of California in 1952-53 will require expenditures of \$59,125,751, exclusive of activities and expenses financed from gifts, endowments and contracts with governmental and private agencies. This represents an increase of \$2,517,664 or 4.4 percent over budgeted expenditure for 1951-52. About one-third of the increase is for new and extended activities. Funds needed for the development of these important elements in the University's program, including the new Medical School and other professional schools at Los Angeles and the two new Colleges of Letters and Science, constitute 31.1 percent increase over 1951-52 provisions. The remainder of the increase, \$1,698,032, represents 3.1 percent increment in the budget devoted to regular and continuing activities on the eight campuses of the University.				
28	In order for the University to continue to serve the State effectively and to carry forward the plan of development already embarked upon to meet needs recognized as worthy by the Legislature and the regents, such as the Teaching Hospital and Medical School expansion at San Francisco, the new Medical and Nursing Schools at Los Angeles, and the new Colleges of Letters and Science at Davis and Riverside, reductions in the 1952-53 year over previous budgets are not possible despite declines in enrollment. Rising prices have absorbed savings effected by more careful and economical management of expenditures for supplies, expense, and equipment. A large portion of the budget represents practically fixed expense such as requirements for maintaining and servicing the large physical plant. Another segment is only slightly, if at all, affected by variation in student enrollment, such as the work in research and public service activities—typified by the University Hospital and by the College of Agriculture where less than 20 percent of total expenditures are for resident instruction. Even in teaching activities, reductions in expenditure requirements do not follow declines in enrollment. Teaching requirements are determined essentially by the number of classes rather than the number of students. An instructor is provided for each class, large or small. Changes in class size are reflected in the low-paid auxiliary staff of teaching assistants whose numbers are changed with enrollments but whose salaries have little effect on general costs. Essential supporting staff and facilities—laboratories and libraries—are maintained to serve research as well as teaching needs. Classes cannot be dropped in significant number without changing curricula or abandoning subject matter coverage—either of which endangers standards and impairs fulfillment of the University's obligations to students in need of its training.				
29	The increases proposed include \$819,632 required for advancing the program for new and extended activities in accordance with fundamental long-range plans; \$1,305,300 for normal merit increases and promotions for both academic and nonacademic personnel in accordance with long established policy; and \$272,169 for maintenance and operation of plant, required principally to meet needs of new facilities.

UNIVERSITY OF CALIFORNIA—Continued

1			
2			
3			
4	ENROLLMENT	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53
5			CHANGE FROM 1951-52
6	Enrollments in the University for 1951-52 are approximately the same as the estimates on which the state budget for the current year		
7	were based, but are substantially greater than the more conservative estimates made last spring. At that time it was expected that		
8	average regular session enrollments for the year would be slightly over 31,000 for all campuses under the restrictive deferment policies		
9	announced by Selective Service aimed at reducing student deferments by some 200,000. In practice, draft calls have been met thus		
10	far without substantial cancellation of student deferments, with the result that registrations this fall reached a total of 34,398 and		
11	it is now estimated that the average for the two semesters of the current academic year will aggregate 33,127, a decline of 11.1 per-		
12	cent from the preceding year. The heavier enrollments were registered at both major campuses, Berkeley and Los Angeles, and at		
13	both the undergraduate and graduate levels. Although total registrations are meeting the budget level, the number of veteran stu-		
14	dents is running below previous estimates; an average for the year of somewhat over 6,500 is now expected, compared to the earlier		
15	estimate of slightly less than 7,000.		
16	The drop in enrollments this fall continues the decline begun last year from the four-year level set by the great influx of veterans after		
17	the close of the war. This fall's drop was almost wholly in veterans, the number of nonveteran students decreasing only nominally.		
18	This decrease in nonveterans is the first since the war and represents a continuation of the trend which became evident in the fall		
19	of 1950, when increases in nonveteran enrollments failed for the first time to compensate for the loss of veterans. With a heavy		
20	concentration of the remaining veterans at the senior and graduate levels, and with limited entitlements remaining, the number of		
21	students receiving federal veteran educational benefits is expected to drop to some 2,050 by the fall of 1952, exclusive of returning		
22	Korean campaign veterans. No significant number of these now appears likely to be registered by next fall.		
23	Registration of students for 1952-53 will be affected to a large degree by military manpower requirements and deferment policies and		
24	by the progress of Universal Military Training. However, on the basis of foreseeable conditions, nationwide surveys of enrollment		
25	prospects support university forecasts that a somewhat smaller decline may be expected next year than occurred this year.		
26	Differing local conditions, most notably in connection with the development of new facilities and curricula, are reflected in wide varia-		
27	tions between the forecasts for the various campuses. At Davis some enlargement in registration is expected with the development		
28	of the new College of Letters and Science and as a result of increasing public knowledge of the opportunities it now affords follow-		
29	ing its initial operations this year. Moderate further expansion of graduate classes on that campus is also expected as a result of		
30	the material development of graduate-level facilities. Professional classes at the San Francisco Medical Center are expected to show		
31	a slight increase, although limitations of facilities will continue to bar significant gains here until the enlarged plant becomes avail-		
32	able in 1953-54. As in recent years, declines in both undergraduate and graduate student enrollment in Berkeley are expected to be		
33	greater than at Los Angeles, where development of new schools, such as Law, Medicine and Nursing, and increased demand for		
34	training in such fields as Engineering tend to offset other decreases. At Santa Barbara a definite slackening in the rate of decline		
35	is expected. A drop of some 9.8 percent is anticipated, compared to 17.7 percent this year.		
36	Average enrollment for all departments of the University in the two regular sessions of 1952-53 is now expected to aggregate 30,194, a		
37	decline of 2,933 from the 1951-52 average. Veteran students receiving federal or state educational benefits, however, are expected		
38	to drop to about 3,600 or 12 percent of the student body, as compared with 20,000, or nearly half of the total, in 1947-48.		
39			
40	REGULAR AND CONTINUING ACTIVITIES		
41	The \$55,670,026 proposed for regular and continuing activities of the University in the coming year constitutes 94.1 percent of the total		
42	budget proposed for the University for 1952-53 and is an increase of \$1,698,032 or 3.1 percent over 1951-52. Significant components		
43	of the increase are explained below by function:		
44			
45			
46	General Administration	\$3,661,276	\$3,815,486
47	General Expense	852,273	905,042
48			\$154,210
49			52,769
50	Proposals in these functional groups have held generally to existing levels with increases confined to normal merit salary adjustments.		
51	Minor adjustments are required in a few cases to conform to changing conditions or variations in work load. The largest significant		
52	increase is \$30,000 for higher costs of state compensation insurance based on recent actual experience and increased wage and		
53	salary rates. Other significant increases are:		
54	(a) Provision of \$12,500 made for continuation of the study of problems of higher education in cooperation with the		
55	State Department of Education, as recommended by the Strayer Committee. This work was inaugurated during		
56	1951-52 with funds provided for this purpose several years ago, but only this year matched by the State Depart-		
57	ment of Education.		
58	(b) An increase of \$34,586 in the Controller's Office is largely due to requirements for merit increases, the \$12,175 for		
59	other needs being primarily required for rental of tabulating machines for further mechanization of the account-		
60	ing operations to meet the increased work load incident to the expanding activities of the university.		
61	(c) Addition of two staff members to the Personnel Office at Los Angeles is related to the expansion on that campus		
62	and at Riverside, including the problem of classifying and recruiting nonacademic personnel for the new Medical		
63	School and related facilities.		
64	(d) An increase of \$6,530, providing 1.5 clerks and related expenses for the Purchasing Office at Los Angeles because		
65	of its growing volume of business.		
66	(e) An increase of \$5,038 involved in the full year operation of the Purchasing Office in San Francisco, transferred		
67	from Berkeley effective January 1, 1952, to more adequately serve the expanding Medical Center there.		
68	(f) At the new hospital and other medical facilities at San Francisco \$9,463 to set up receiving and inventory units		
69	to properly receive and account for the increased volume of supplies and equipment involved.		
70	(g) Restoration of an assistant director in the Office of Relations with Schools, dropped from the current year's budget		
71	for economy reasons when the incumbent resigned, is required for liaison work with junior colleges and four-year		
72	colleges which now provide the largest part of the lower division pre-engineering training for students in the		
73	University's two colleges of engineering.		
74	(h) Other additions include \$4,085 for the sanitation and public health program and \$4,270 for radiological safety,		
75	needed for prevention and abatement of health hazards.		
76			
77	General Maintenance and Operation of Plant	\$3,845,777	\$4,117,946
78			\$272,169
79	Requirements for the servicing of new facilities provided from the long range construction program of the University account for the		
80	major portion of the increases in the budget for this group. Approximately 176,000 square feet of building space is expected to be		
81	added during 1952-53 and during that period full annual operating requirements must be met for some 740,000 square feet of new		
82	buildings which will be occupied less than the full year in 1951-52. The largest increase is required at Los Angeles with an addition		
83	of \$93,987 and at Berkeley, up \$84,063.		
84	Higher costs for prevailing wage increases, increased prices for supplies and services, and higher utility rates already experienced are		
85	also reflected.		
86			

## UNIVERSITY OF CALIFORNIA—Continued

REGULAR AND CONTINUING ACTIVITIES—Continued	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53	CHANGE FROM 1951-52
Instruction and Research-----	\$40,075,590	\$41,878,865	\$1,803,275
The great bulk of all increases in regular and continuing activities budgets is found in this group made up of the departments which carry on the instructional functions and research investigations that are the basic reason for the University's existence. These units constitute 73 percent of the total for all regular and continuing activities compared to 71.8 percent last year. The increases proposed in them exceed the total for all regular activities, being partially offset by decreases elsewhere.			
A very large portion of the expenditures for this group are related only indirectly, or not at all, to fluctuations in student enrollment. Provisions for organized research, for organized activities of educational departments (86 percent of which is for the university hospital), and for pensions and retiring annuities, for example, have little or no relation to current enrollments. Provisions for libraries, also, are affected only slightly by enrollment since the number of books to be purchased and catalogued and the calls for service are dependent primarily upon the size of the faculty and the extent of research and graduate work pursued.			
Even in the teaching departments, the necessity of providing instructors for all classes, for manning research projects, for maintaining the supporting staff and instructional and library facilities necessary for effective operation, present considerations which negate to a large extent the effect of reduction in student load. The number of teaching faculty is determined principally by the number of classes rather than the number of students. Although teaching assistants and section leaders can be and are reduced (there is a reduction of 36 teaching assistants in the 1952-53 Budget following a reduction of 174 in the 1951-52 Budget) their salaries are relatively minor in comparison to other costs. The number of classes can be cut down, aside from duplicate sections in large courses, only by reducing subject offerings and altering curricula. This is a practical impossibility except over a long period, if the University is to meet its demands and maintain faith with students who have embarked on definite programs.			
In the College of Agriculture budget, research and public service functions predominate over teaching. Slightly more than 50 percent of its total budget is expended for agricultural research, something more than 30 percent for agricultural extension, and less than 20 percent for resident instruction, including home economics at Berkeley and Davis, the School of Forestry at Berkeley, and veterinary medicine at Davis. Thus, more than 80 percent of the annual resources of the college is used to create new scientific knowledge to contribute to the solution of immediate problems, and to teach farmers how to apply it on their farms.			
The importance of this to the State is apparent in view of the place of agriculture in the State's economy. California's agriculture is the most complex and diverse of any state in the Union. More than 200 agricultural commodities of commercial importance are produced each year. They annually return to growers and to the economy of the State more than two and a quarter billion dollars—a greater amount of new basic wealth than that produced by agriculture in any other state. Appropriations for the College of Agriculture are, therefore, an investment of public funds rather than an expense. They not only increase food production for an ever expanding population, but also help to create new basic wealth, and a larger tax base for the benefit of many other activities of government.			
The 1952-53 budget for the College of Agriculture (excluding provisions for the new Colleges of Letters and Science at Davis and Riverside), requires an increase of \$989,708 above support for 1951-52. Of this amount, \$177,400 is for new and extended activities. The \$812,308 for regular and continuing activities makes up about one-half of the entire net increase for regular and continuing activities of the University. The largest increases are for Agricultural Extension, \$160,792; for activities at Davis, \$384,019; and for the Citrus Experiment Station at Riverside, \$110,829. Included in the increase for Agricultural Extension are provisions for 11 new positions required to meet the most urgent demands for farm and home advisors in counties which have already provided or committed county funds for office space, equipment, and expenses. Agricultural Extension provides service through resident representatives in 49 of the 58 counties of the State.			
Apart from agriculture, the largest increase is for the Los Angeles campus, up \$411,875. Two-thirds of this (\$275,071) is required for normal merit increases and salary adjustments. Some needed strengthening of academic departments for catching up with minimum requirements and to meet individual situations is provided, as in the case of home economics, music and theater arts, where the increases will cover costs of extending instruction to include television.			
Increases for the San Francisco Medical Center total \$355,270, more than half of which, \$182,471, is for requirements of the university hospital because of increasing costs, and necessary provisions to keep pace with developments in hospital practice. Increases for the medical school amount to \$109,254 for postgraduate instruction, advances in medical technique, support of research, and addition of another class in physical therapy. Increases for the College of Dentistry for similar reasons amount to \$26,400; for the School of Nursing, \$18,674, including provision for an extra class to step up the number of nurses which can be trained; and for pharmacy, \$13,347, where state law and accreditation now require five years, instead of four as in the past, for college preparation.			
At Berkeley the corresponding increase is \$219,523 after allowing for a decrease of \$194,374 in summer sessions. Increases at Berkeley are very largely for the cost of normal merit salary adjustments and regular promotions.			
Two functions of the instruction and research group, whose operations are directly related to student load, show sharp declines in line with decreased enrollments. With an estimated further drop of 1,180 in summer session expected next year, drastic revisions have been made in this self-supporting budget which result in a decrease of \$254,405 from the 1951-52 budget provisions. Summer sessions at Berkeley account for \$194,374 of the decrease and at Los Angeles for \$44,221. A decline is also budgeted for the extension divisions group where increases for agricultural extension are more than offset by the \$177,247 drop in university extension, \$60,100 of which is due to the lower level of operations expected in the self-supporting Far East Command program. The program of University Extension itself is being adjusted to the lower level of operation, but declines in income are expected to exceed somewhat the decrease in costs, leading to an increase of \$39,490 in state support. This is principally related to requirements for normal merit increases and promotions requiring \$24,233.			
Budgets for organized research are increased by \$161,459. The largest increase, \$65,548, is for state-wide projects, including \$25,000 for cancer research to cover a 10 percent increase in costs; \$14,110 for the Institute of Transportation and Traffic Engineering; and \$19,544 for the University Press. The latter includes an increase of \$15,000 in provisions for scientific publications, which, although needed for publication of the large backlog of important studies, will be required to a large extent to offset higher costs.			
The \$198,184 increase for libraries is necessary to cover costs of extending service to professional schools and for other specialized units, particularly at Los Angeles, for offsetting the sharp increases in book prices and other operating expenses, and for normal merit increases and salary adjustments of the necessarily large permanent staff.			
Almost all of the \$189,161 increase for Organized Activities-Educational Departments is accounted for by the University Hospital. Increases of \$182,863 are required to meet the increased volume of service to patients; to cover minor improvements necessary to keep abreast of advances in hospital practice; to offset higher costs of equipment, supplies, medicines, food, etc., and for the \$23,020 requirement for normal merit increases and salary adjustments. A gain of 1 percent in patient days and of 5 percent in out-patient service is expected for 1952-53. The increased expenditures are largely offset by a \$150,000 increase in hospital income.			
Auxiliary Enterprises -----	\$3,909,480	\$3,813,177	—\$96,303
The decrease in this account is entirely the result of a drop of \$149,060 at Davis. With the beginning of dining service in the new Residence Hall and the reduction in enrollment, the volume of activity in the old Dining Hall operations on that campus is smaller by approximately this amount in both income and expenditures. A \$22,945 increase at Berkeley is largely for merit salary adjustment requirements for the Student Health Service and for small increases due to higher prices of supplies and other operating expenses. At Los Angeles there is a similar \$10,288 increase, largely related to the Student Health Service.			

## UNIVERSITY OF CALIFORNIA—Continued

REGULAR AND CONTINUING ACTIVITIES—Continued	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53	CHANGE FROM 1951-52
Miscellaneous -----	\$1,462,793	\$965,435	—\$497,358
Provisions for emergency funds, including local emergency funds allowed at one-half of 1 percent of the budgets they support, aggregate \$726,484 or 1.2 percent of the total 1952-53 Budget. These provisions are \$267,856 smaller in total than those set up in the operating budget for the current year, where the many uncertainties as to enrollment and income made it advisable to carry a larger reserve against unforeseen contingencies.			
In view of the continued threat of further price rises not covered in budget estimates for 1952-53, which give effect only to price changes occurring up to the beginning of the current fiscal year, a lump sum provision of \$500,000 equal to approximately 5 percent of budgeted expenditures for supplies, expenses, and equipment, is included in the request for 1952-53. The amount is \$50,000 greater than is provided in the current year's budget, in recognition of the longer forward period and larger expenditure program covered.			
A lump sum provision of \$831,500 is included in the estimated expenditures for the current year for the cost of those salary increases for which allocations have been made by the Director of Finance to November 3, 1951. A similar provision of \$842,000 is included in the budget for 1952-53 to provide for the continuing costs of these 1951-52 adjustments.			
<b>NEW AND EXTENDED ACTIVITIES</b>			
Under this heading in the budget there are brought together those items representing new activities or significant extensions of existing activities in the 1952-53 Fiscal Year, together with recently inaugurated schools, colleges, departments and institutes whose initial development is not substantially complete. Special research projects undertaken by the University as the result of specific legislation are also included. In each case the amount listed for 1952-53 represents the full sum proposed to carry out the activity or project during the ensuing year. The following paragraphs briefly summarize the reasons for the amounts requested for these items:			
<b>Air Science and Tactics, Berkeley</b> -----	—	\$7,972	\$7,972
This represents the appearance in the regular budget for the first time of this new department, whose operations in the current year have been financed from emergency funds. The proposal for 1952-53 continues present year's support, without significant change and provides the necessary clerical and storekeeping personnel and expense to cover operation as a university department and to maintain accountability for military property for which the University is held responsible. Instructional and administrative personnel and expense, together with military equipment, are provided by the Federal Government. The Air ROTC Unit, established on the Berkeley campus this year at the request of the U. S. Department of Defense, currently gives instruction to 530 cadets as a part of the national military training program.			
<b>Institute of Engineering Research, Berkeley-Richmond Field Station</b> -----	\$56,500	\$71,944	\$15,444
Following conversion and renovation of approximately 60,000 square feet of frame buildings, field research facilities are now being put into operation at the Richmond Field Station. With the renovation of these facilities and completion of the new headquarters for the Institute of Transportation and Traffic Engineering, it will be possible to transfer many research activities from crowded campus facilities at Berkeley to this newly-acquired tract embracing 100 acres of upland and 50 acres of tide land. This budget proposes the equivalent of three additional maintenance employees and one guard required to service the new buildings, for higher utility usage, and for purchase of expendable service materials and janitorial supplies.			
<b>Agriculture, Davis—Food Technology</b> -----	\$26,390	\$88,685	\$62,295
Additional expenditures are required for the continuation of the plan for developing this program of vital interest to the food producing industry of the State. The new Food Technology Building was occupied in the fall of 1951 and operations previously carried on at Berkeley will be transferred to Davis during the current year, so that by 1952-53 the program will be predominantly centered on the latter campus. The budget increase is for staff and teaching requirements of the expanded program, made possible by the new facilities which provide opportunities for low temperature research, commodity evaluation, pilot plant studies and other research in response to requests from the food industries.			
<b>Agriculture, Davis—Hopland Range Field Station</b> -----	—	\$40,460	\$40,460
This item is to provide for the operation of the newly acquired Pratt Ranch near Hopland as a permanent range and brush land field station. \$20,950 of the budgeted expenditures will be covered by income from operation of the ranch. This new research center is designed to afford additional permanent facilities for the study of various factors controlling the production of feed and forage on some 30,000,000 acres of range lands in California.			
<b>College of Letters and Science, Davis</b> -----	\$228,899	\$366,782	\$107,883
In accordance with the recommendation in the Strayer Report, authorization was granted by the regents for opening the new College of Letters and Science at Davis on a limited scale in the fall of 1951, with instructional offerings limited to those which could be provided by existing staff. Enrollment in the initial semester has been 137. The coming academic year, 1952-53, will be the first year of real development and operation for the new college with its own organization and facilities. For the first time a regular catalog will be available and with the general increase in public information and awareness of the college, a materially increased enrollment is anticipated. In fact, most of the estimated 350 increase in enrollment at Davis for 1952-53 is expected to be in the College of Letters and Science.			
In order to provide a reasonable, but modest development in the coming year, increases of \$84,328 are required over current provisions for instructional divisions now constituting the college, such as geology, history, physical education, etc. Augmentations of \$17,905 for the library and \$5,650 for the registrar are also necessary for these direct service activities. These increases will provide 14 new academic and three nonacademic positions.			
In addition to the above increase in the budget of the College of Letters and Science itself, substantial strengthening of five related regular and continuing academic divisions in the College of Agriculture (botany, bacteriology, chemistry, mathematics-physics and zoology) is required in order to provide majors for liberal arts students. This involves increases aggregating \$42,625 in these regular and continuing departments of the College of Agriculture, including 6.5 new academic and one new nonacademic position.			
In all, increases totaling \$150,508 for both colleges are involved in the letters and science development at Davis in the coming year.			

## UNIVERSITY OF CALIFORNIA—Continued

## NEW AND EXTENDED ACTIVITIES—Continued

	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53	CHANGE FROM 1951-52
<b>Agriculture, Los Angeles—Floriculture and Ornamental Horticulture</b> -----	\$59,620	\$102,320	\$42,700
Planned increase in research and public service to the extensive commercial nursery interests causes the 71.6 percent increase in this budget. The increase is principally in response to requests for service from the large ornamental horticulture and turf culture industries in Southern California. Floriculture and ornamental horticulture is now a major division of the College of Agriculture on the Los Angeles campus, and is inadequately supported.			
<b>School of Law, Los Angeles</b> -----	\$198,785	\$240,878	\$42,093
This school, which moved into its new quarters this year and for the first time offered instruction in all three years of professional classes, has had a rapid growth. With an enrollment of 73 in 1949-50, registration rose to 163 in 1950-51 and this fall reached 283. A further large increase is expected in the fall of 1952 with an anticipated entering class of 200. Increases of \$28,080 in additional positions requested to meet this load include two academic and one secretarial position. Other increases requested for the greater activity include \$3,000 to inaugurate a bookbinding program for the Law Library collection.			
<b>School of Medicine, Los Angeles</b> -----	\$1,056,849	\$1,396,296	\$339,447
The budget for 1952-53 carries forward the plan of progressive build-up which has been followed thus far for the Medical School, with an increase approximately the same as in previous years. Plans for 1952-53 contemplate the admission of a second entering class of 28 plus instruction of the 28 students admitted this fall and of some 40-60 graduate students. In general, the curriculum for the first- and second-year classes will continue to have clinical material integrated with the lectures and laboratory, as in 1951-52, and further increase in staff is necessary since staff complement for preclinical departments needs to be nearly complete in 1952-53. Opening of the school before completion of the building and organization of the hospital reduces requirements which otherwise would be necessary for instruction of first- and second-year classes. It is of interest that the Veterans Administration has proposed to increase space available in their facilities without financial obligation on the university for maintenance.			
New positions are proposed which will cost \$178,170, including 19½ full-time equivalent academic positions (\$129,000) and 14½ full-time equivalent nonacademic positions (\$49,170) in 1952-53. Increases of \$43,100 in supplies and expense and \$42,634 in equipment and facilities are also required for the enlarged scale of activities. The Biomedical Library budget is to be expanded by \$27,000 to provide and additional \$20,000 in books and \$7,000 in binding.			
<b>School of Nursing, Los Angeles</b> -----	\$78,317	\$109,377	\$31,060
The first class in the Basic Collegiate Nursing program will be admitted in the fall of 1952 and enrollment is expected to increase some 30 percent. Four new instructors and provision for four part-time clinical instructors are included in the requested budget. Non-personnel increases include \$5,000 for laboratory and research equipment needed in the new program, and \$1,600 additional for travel and other expenses in connection with the clinical field work required.			
<b>School of Social Welfare, Los Angeles</b> -----	\$72,990	\$89,715	\$16,725
Rounding out of the developing curriculum for this new school is proposed, which anticipates an increase of load to 100 full-time students in 1952-53 compared to 77 this fall. One assistant professor and a stenographer are proposed to handle the work load and to expand field and case work activities. Provision also is required for an associate professor of medical social work added during the current year because of urgent need to develop the program of medical social work training to be carried on in conjunction with the Medical Center. The major portion of the increases represents items requested in the University's budget for 1951-52 but deferred in order to meet the reduced allowance.			
<b>College of Letters and Science, Riverside</b> -----	\$20,510	\$112,388	\$91,878
The total of \$112,388, reflecting an increase of \$91,878 over the 1951-52 provisions, is required to provide the nucleus organization necessary for planning and organizing curriculum, staff and facilities preparatory to activating the new college in the fall of 1953. This will provide 11.7 new positions (3 academic and 8.7 nonacademic) including a registrar and admissions officer, a dean and the chairmen of five proposed divisions—biological sciences, physical sciences, social sciences, humanities and physical education—most of whom will be appointed for the second half of the year only. It was originally expected that the new college could be opened in 1952, but difficulties attendant upon the present emergency have delayed construction facilities. It reasonably can be expected that the new facilities will be ready for occupancy in September, 1953, provided the necessary clearances are secured from the Federal Government without undue delay. This proposal is virtually the same as was included in the approved budget request of 1951-52.			
<b>Moffitt Teaching Hospital, San Francisco</b> -----	—	\$53,320	\$53,320
Based on an expected building completion date of November, 1953, the 1952-53 proposal provides the basic staff needed during the planning period preceding actual occupancy. A total of 21 positions is proposed at salaries aggregating \$39,320 for the 1952-53 year. The appointment period for these positions varies from two to 12 months to provide key administrative, clerical, professional and technical personnel for the progressive preparatory phases as the opening date approaches.			
This is the forerunner of a very large operational budget which will be required in 1953-54 when the 500-bed Moffitt Hospital is opened for business as the teaching hospital for the Medical Center at San Francisco. The present 300-bed University Hospital thereafter will serve as a private patient hospital and will be placed on self-supporting basis under University administration. The availability of this hospital for the private patients of the staff doctors will serve as a material aid in the difficult problem of attracting and retaining top quality professional staff for the Medical School.			
<b>Agriculture, Davis—Orchard Heating Investigations</b> -----	\$18,555	\$18,870	\$315
Activity during 1952-53 in this program will shift increasingly to data interpretation and analysis work at Davis. Field experimental work will be continued at Riverside to determine proper combination of the use of wind machines and heating for effective frost protection at the least expense of fuel and labor.			

## UNIVERSITY OF CALIFORNIA—Continued

1 NEW AND EXTENDED ACTIVITIES—Continued	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53	CHANGE FROM 1951-52
2 3 Agriculture, Berkeley, Davis, Riverside—Oriental Fruit Fly 4 Investigations -----	\$82,135	\$77,350	—\$4,765
5 6 Further reduction in support for this project is possible with the tapering off of the work. Several phases of the investigation have been 7 completed. Some investigation and follow-up work remains, however, in two phases of the investigation to round out findings on 8 methods for guarding against the serious danger to the State's fruit and vegetable industries from this pest: First, investigation of 9 fumigation methods, carried on at Davis and Riverside; and, second, continuation of controlled environment studies, conducted at 10 Honolulu but carried in the Berkeley budget, to determine the temperature and humidity ranges in which the pest can survive, 11 thereby indicating the areas favorable and unfavorable to its survival if introduced in this State. 12			
13 14 Agriculture, Davis—Southern California Berry Investigations -----	—	\$36,395	\$36,395
15 16 In response to urgent demands from the organized strawberry industry in Southern California, a project for research in cultural and 17 breeding practices aimed at greater strawberry production in that area is planned for 1952-53. Present varieties of berries and 18 methods of production, developed for use in Northern California, do not produce favorable results in the south. Average production 19 per acre is said to be so low that southern growers cannot operate successfully or even satisfy the requirements of the Los Angeles 20 and San Diego markets. With very strong demands to meet this need, work will be carried on to develop varieties of plants and 21 methods of operation which will give good production under the soil and climatic conditions of the area. Successful development 22 would very greatly expand the strawberry-growing acreage of the State and increase the annual value of the crop, which in 1950 23 was approximately \$15,000,000. 24 25			
26 27 Agriculture, Statewide—Red Scale, Beet Leafhopper and Grape- 28 leaf Skeletonizer Investigations -----	\$38,920	\$38,920	—
29 30 Continuation of these three special studies, undertaken in 1951-52 at the request of the Joint Legislative Interim Committee on Agri- 31 cultural problems, will be provided in 1952-53 at the same level of support. Development of more effective means of biological con- 32 trol of these three pests would result in great savings in eradication costs and reduction in crop losses. 33			
34 35 Engineering, Berkeley—Sanitary Engineering Research -----	\$56,279	\$60,174	\$3,895
36 37 1952-53 will be the fourth year of this research project carried on by the University at the specific request of the Legislature. The project 38 has now reached maturity, having already produced several studies of refuse and garbage disposal and a report on sewage water 39 reclamation. Experimental work on reclamation of sewage waste water is being carried on at the Lodi sewage disposal plant in 40 cooperation with local authorities. Testing of incinerators in Southern California has yielded significant performance data and work 41 in this field is to be extended. The study of the removal of boron from irrigation water and an investigation of sulphate reducing 42 bacteria in sea water in relation to reduction of offensive odors along tide flats and deterioration of wooden structures in and near 43 sea water is in progress. 44 Modest increases are imposed to provide for printing of additional bulletins on results of recent research for distribution to California 45 cities and counties, and for minor items of pilot plant and fieldstation equipment. 46			
47 48 Institute of Engineering Research, Berkeley—Sea Water 49 Research -----	\$30,000	—	—\$30,000
50 51 An appropriation of \$30,000 to the regents was made by the 1951 State Legislature (Chapter 1634, Statutes of 1951), to provide for the 52 technical and economic investigation of certain schemes for producing potable fresh water from sea water. This research is now 53 under way and is to be concluded in the current year. 54			
55 56 Biochemistry, Berkeley—ACTH Research -----	\$102,530	\$55,642	—\$46,888
57 58 Significant advances have been made since 1949-50 by this research group in the production of medically usable derivatives of ACTH 59 and other hormones and in their therapeutic application in combatting arthritis, allergies, rheumatic fever, and allied diseases. Be- 60 cause of extensive outside support from private organizations and the U. S. Public Health Service which has been attracted to this 61 important and promising research, a decrease in the state funds required for its continuance in 1952-53 is made possible. 62			
63 64 Scripps Institute, La Jolla—Marine Life Research -----	\$412,049	\$419,907	\$7,858
65 66 This large scale program of fundamental research in the problems of conserving marine life of importance to commercial fisheries, initi- 67 ated by the Legislature in 1947, was originally conceived principally as a study in the forecasting of size and location of the catch 68 of sardines. However, re-examination of the problem by the research staff and the fishing industry, in consultation with the State 69 Marine Research Committee, has revealed that the scope of productive education and research in this field is far wider than the 70 field originally delineated and that the problems of marine fisheries involve many aspects of the University other than oceanography. 71 Because of the great importance of the fishing industry, one of the five leading basic industries of the State, steps were taken this 72 year to broaden this program to include development of research in the many problems relating to economic utilization of the 73 resources of the sea. To this end there was provided within the current year's budget for Marine Life Research two faculty posi- 74 tions of professor and assistant professor rank as a beginning staff for an Institute of Marine Resources to foster and develop 75 research and educational activities relating to marine resource problems on an all-University basis. No increase in level of activity in 76 1952-53 is proposed; the increase results entirely from normal merit salary adjustments. 77 78 79 80 81 82 83 84 85 86			

## UNIVERSITY OF CALIFORNIA—Continued

## NEW AND EXTENDED ACTIVITIES—Continued

	ESTIMATED EXPENDITURES 1951-52	PROPOSED EXPENDITURES 1952-53	CHANGE FROM 1951-52
Medicine, San Francisco—Research in Arthritis and Allied Diseases	\$84,420	\$85,650	\$1,230

Material progress is being made in the development of this long-term program of clinical investigation and evaluation of new means of combatting arthritis and allied diseases. Dietary control and management facilities have been completed and conversion of two buildings for laboratories will be completed early in 1952. Pending the availability of the new laboratories the facilities of the Hooper Foundation have been used on a loan basis. Studies are being carried forward on new ACTH products in relation to rheumatoid arthritis. Likewise, extensive studies are being conducted in evaluating the interrelations of ACTH and potassium salts, since deficit of the latter is observed when ACTH is given. Investigation of the treatment of fibrotic lung disease by the use of cortisone is also being carried on in collaboration with the Cardio-Vascular group.

Medicine, San Francisco—Research in Multiple Sclerosis	\$12,345	\$12,600	\$315
--	----------	----------	-------

Further progress in this program has been made in the past year as the result of studies conducted by the Department of Neurology of the Medical School at San Francisco. Since faulty fat metabolism has been suspected as a cause and low-fat diets have been used therapeutically, the lipid proteins of the blood and cerebral spinal fluid of patients with multiple sclerosis are being studied by the ultracentrifuge technique and a report on this is being prepared. Treatments aimed at testing other etiologic hypotheses also are being conducted and include the use of enzymes, supra-vital dyes, high doses of vitamins, vaso dilators and cortisone. In addition, improved methods of clinical study have been established and a follow-up clinic is being organized. Further basic studies on the cause of this disease are planned but will require continuing support over a period of years to accomplish.

## HASTINGS COLLEGE OF LAW

The Hastings College of Law was founded in 1878 by S. C. Hastings with the grant of \$100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay the sum of 7 percent interest on the grant or repay the \$100,000 in full to a Hastings heir. According to the act creating the college, it is affiliated with the University of the State "and is the law department thereof."

The college offers facilities for the acquisition of learning in all branches of the law, and to this end it has established a complete curriculum of studies, and matriculates students who are granted the degree of "Bachelor of Laws."

Located at San Francisco

16	The over-all decline in enrollments in the field of higher education is expressed at this college in a decrease to 315 students estimated for the 1952-53 Fiscal Year or a drop of 168 students from the 1951-52 Fiscal Year. In previous years the revenues have exceeded the college funds made available for expenditure to the extent that an accumulated surplus has been effected. In this budget an opposite trend is reflected to the extent of \$68,142. The funds for this difference will be provided from the accumulated surplus. If this trend continues in subsequent years eventually other sources of financing will be necessary.				
17	EXPENDITURES: The estimated expenditures in this budget show an increase of \$19,178, most of which is attributable to the cost of operation of the new Hastings Law College building from January 1, 1953 to June 30, 1953. The balance is due to salary adjustments and anticipated equipment purchases for the new building.				
18	REVENUE: Estimated revenue shows a decrease of \$53,254 which is attributable to two factors; the running out of veterans' entitlements with the consequent loss of the \$150 per semester non-resident fee for resident veterans, and an anticipated drop in enrollment.

## BOARD OF CONTROL

The board makes rules and regulations governing the presentation and audit of claims; relating to the amount and methods of traveling on official business of the State, and relating to the making of Merit Awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made.

## STATE CONTROLLER

The State Controller is the accounting and disbursing officer for the State and is responsible for legality of all payments and for the receipt of moneys due the State. He supervises the assessment and collection of state inheritance and gift taxes, collects motor vehicle fuel tax, petroleum and gas assessments and motor transportation license taxes, assists county and city officials in maintaining required accounting and budgetary records and prepares reports of their financial transactions, makes refunds of motor vehicle fuel taxes, leases lands deeded to the State for nonpayment of taxes, and audits expenditures made by local governments under the Local Postwar Public Works, Plans and Sites Law, Local Postwar Construction Law, State School Building Loan Act and the Collier-Burns Act.

## GENERAL ANALYSIS

Number of positions ----- 455.7 467.3 494 26.7

The State Controller's total program for 1952-53 shows an increase of \$166,422 or 6.8% over 1951-52. This increase includes the following major changes in programs and work loads; the costs given include the salaries and wages of the new positions and related operating expenses and equipment.

PROGRAM CHANGES	NUMBER OF POSITIONS	COSTS
(1) New Manual for Accounting Division -----	1	\$5,885
(2) State School Building Aid Program, Chapter 1389, Statutes of 1949 -----	1	4,890
(3) Audit of Public Health Subsidies -----	4	26,352
(4) Central Pay Roll System -----	10	28,343

WORK LOAD CHANGES	NUMBER OF POSITIONS	COSTS
(1) Stenographic assistance to administrative positions -----	1	2,782
(2) Audit of Central Pay Roll System -----	1	4,076
(3) County Welfare Audit -----	1	8,391
(4) Field Audit Unit Reorganization -----	1	5,472
(5) General Disbursements -----	5	15,964
(6) Inheritance and Gift Tax -----	3	13,626
(7) Motor Vehicle Fuel Tax Refunds -----	1	6,308

The breakdown by category of the total proposed increase may be found by reference to the analysis under each division.

<sup>a</sup> Composed of savings in salaries and wages, \$7,418; operating expenses, \$2,187; equipment, \$180; and unscheduled, \$34,204.

<sup>b</sup> Composed of savings in salaries and wages, \$1,955; operating expenses, \$4,261; and unscheduled, \$21,049.

<sup>c</sup> Composed of savings in salaries and wages, \$5,996; operating expenses, \$3,272; equipment, \$340; excess reimbursements, \$469; and unallotted, \$4,339.

1	GENERAL FUND						
2							
3							
4	ADMINISTRATION						
5							
6	Analysis						
7							
8	This division consists of the general administration, departmental accounting, and general service functions of the State Controller's						
9	Office. The total decrease for the division below 1951-52 is \$4,829, categorically as follows:						
10							
11	SALARIES AND WAGES: The increase of \$216 consists of a decrease of \$2,500 in indefinite military leave pay offset by the addition						
12	of an intermediate stenographer-clerk at a cost of \$2,640. This position is provided to do secretarial work for the administrative						
13	assistant and Assistant Deputy State Controller, two positions recently established without clerical assistance. This position will also						
14	act as receptionist for the Controller's Sacramento Office.						
15							
16	OPERATING EXPENSES: The \$2,217 decrease represents the elimination of rental expense and a decrease in office expense as a						
17	result of moving into the Capitol Annex.						
18							
19	EQUIPMENT: A total of \$517 is proposed which is a decrease of \$2,728 below 1951-52. Of the amount proposed \$442 is for additional						
20	equipment for the proposed new position and for miscellaneous items, and \$75 is for replacement of old equipment.						
21							
22	SALARIES AND WAGES						
23	General Administration:

1	ACCOUNTING DIVISION						
2							
3							
4	Analysis						
5							
6	The principal function of this division is to maintain a central control of all state appropriations. Except for the addition of the duties						
7	required by Chapter 1389, Statutes of 1949, no significant change in this function is anticipated.						
8	The total increase for the division over 1951-52 is \$1,833, categorically as follows:						
9							
10	SALARIES AND WAGES: The increase of \$4,733 represents the elimination of two positions in anticipation of the absorption						
11	agency revolving funds, now under the State Treasury System, into the Central Pay Roll System, at a savings of \$5,160, and						
12	the following two new positions at a cost of \$9,528:						
13	1 Senior accountant through 6-30-53, only, to prepare a manual for the division relating to the operation of state funds.						
14	1 Semisenior accountant to maintain the Public School Building Loan Fund accounts required by Chapter 1389-49.						
15							
16	OPERATING EXPENSES: The \$925 increase represents price increases, primarily.						
17							
18	EQUIPMENT: A total of \$2,947 is proposed which is a decrease of \$3,825 below 1951-52; it includes \$1,247 in additional equipment						
19	for the proposed new positions, \$962 for additional files and miscellaneous items, and \$738 for replacement of furniture aged and in						
20	poor condition.						
21							
22	SALARIES AND WAGES

15	<b>AUDITS DIVISION</b>																																														
16	<b>Analysis</b>																																														
17	This division reviews and determines legality of all claims submitted for payment by state and local government agencies. The total increase in this function over 1951-52 is \$68,816, categorically as follows:																																														
18	<b>SALARIES AND WAGES:</b> The increase of \$29,637 represents seven proposed new positions as follows:																																														
19	Claim Audit Unit:																																														
20	1 Accountant-auditor I through June 30, 1953 only, to assist in pre-auditing on a test check basis all pay roll documents originating under the expanding Central Pay Roll System. During the growing period of the new system, it is necessary that the review be much more thorough to early detect and correct errors in procedures, documents, and transactions.																																														
21	Field Audit Unit:																																														
22	1 Auditor II to maintain the level of representation of the Controller's auditors in the audit of county welfare programs conducted jointly with the Department of Social Welfare that was recently authorized another crew of auditors.																																														
23	2 Auditors II and 2 accountant-auditors I to provide more adequate coverage in audits of state-subsidized public health programs of local governmental units. The detail of this proposal follows:																																														
24	<table border="0"> <thead> <tr> <th colspan="4">PUBLIC HEALTH PROGRAMS</th> <th>MAN-YEARS REQUIRED</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>Aid to local health departments -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>2.</td> <td>Tuberculosis sanatoria -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>3.</td> <td>Crippled children -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>4.</td> <td>Children with Rheumatic Diseases -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>5.</td> <td>Mosquito and Gnat Control -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>6.</td> <td>Hospital Construction -----</td> <td></td> <td></td> <td>1</td> </tr> <tr> <td colspan="4">Total Man-Years -----</td> <td>4</td> </tr> </tbody> </table>							PUBLIC HEALTH PROGRAMS				MAN-YEARS REQUIRED	1.	Aid to local health departments -----			1	2.	Tuberculosis sanatoria -----			1	3.	Crippled children -----			1	4.	Children with Rheumatic Diseases -----			1	5.	Mosquito and Gnat Control -----			1	6.	Hospital Construction -----			1	Total Man-Years -----				4
PUBLIC HEALTH PROGRAMS				MAN-YEARS REQUIRED																																											
1.	Aid to local health departments -----			1																																											
2.	Tuberculosis sanatoria -----			1																																											
3.	Crippled children -----			1																																											
4.	Children with Rheumatic Diseases -----			1																																											
5.	Mosquito and Gnat Control -----			1																																											
6.	Hospital Construction -----			1																																											
Total Man-Years -----				4																																											
25	1 Auditor III to enable the reorganization of the Field Audit Unit, a move made necessary by the addition of the above proposed new positions. The work can logically be divided into two functions, namely, welfare program audits and public health subvention audits as one function, and reimbursable program audits, court audits and internal audits as the other function.																																														
26	This proposed position will provide two Auditor III positions, or one for each nine lower level positions in line with State Personnel Board specifications for the class.																																														
27	<b>OPERATING EXPENSES:</b> The increase of \$9,779 is a result of providing an additional \$10,381 in travel and auto-operation expenses for the new positions, partially offset by the elimination of rent due to the move into the Capitol Annex.																																														
28	<b>EQUIPMENT:</b> The total of \$15,536 proposed is an increase of \$12,694 over 1951-52. It includes \$1,658 in office equipment and \$6,400 for four automobiles for the proposed new positions, \$2,050 for replacement of two automobiles expected to reach 100,000 miles sometime in 1952-53, \$1,465 in additional files and miscellaneous equipment, and \$3,963 for replacement of an old bookkeeping machine and other old equipment, all in poor condition.																																														
29	<b>REIMBURSEMENTS:</b> The remaining \$16,706 increase represents a drop in reimbursements received from a special appropriation from the General Fund for audit of the School Building Aid Program. The same volume of work will be completed in 1952-53; however, the payment for this service will be made from the Public School Building Loan Fund and not as a reimbursement.																																														
30	<b>Claim Audit Unit</b>																																														
31	<b>SALARIES AND WAGES</b>																																														
32	General Administration:																																														
33	Chief -----	1	1	1	SALARY RANGE \$676-\$21	\$9,735	\$9,852

22	INHERITANCE AND GIFT TAX DIVISION						
23	Analysis						
24	This division administers the state inheritance and gift tax laws.						
25	The proposed increase of \$12,235 provides generally for a continuing growth in work load and for cost increases, categorically as follows:						
26	SALARIES AND WAGES: The additional \$9,052 represents a \$2,900 reduction in temporary help and \$11,952 for the following proposed new positions:						
27	1 Assistant counsel and one senior information clerk for the San Francisco office.						
28	1 Auditor II for the Los Angeles office.						
29	Between 1940 and 1953 there will have been a 67 percent state population increase. The work load of the Inheritance and Gift Tax Division is directly related to state population. With the addition of the requested personnel, the division's staff of 74 positions will have increased 51 percent over the 49 positions authorized in 1940.						
30	OPERATING EXPENSES: The net increase of \$6,170 for operating expenses consists of \$2,948 for general cost increases, and \$2,741 for printing, traveling, and additional space for work load and related proposed new positions.						
31	EQUIPMENT: The total of \$7,644 requested for 1952-53 is \$2,987 less than the re-estimate for 1951-52. Of the requested amount \$1,674 will equip the three new positions, \$2,809 is for the normal expansion of filing space, and \$3,161 for the purchase of necessary legal books and miscellaneous equipment.

51	COUNTY BUDGETS AND REPORTS DIVISION						
52	Analysis						
53	This division administers the law relating to county budgets and to the reporting of county, city, and district financial transactions. This includes the review of county budgets and reports of tax levies and the preparation for publication of data on property evaluation, tax levies, etc.						
54	No change in program is proposed for 1952-53. Under equipment, the total of \$1,030 proposed is a decrease of \$395 below 1951-52 and includes \$800 for replacement of an automobile expected to reach 100,000 miles in 1952-53 and \$230 for additional miscellaneous equipment items.

## STATE CONTROLLER—Continued

**Tax Collection Division**

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	Motor Vehicle Transportation Tax Fund						
2							
3							
4	Analysis						
5							
6	The Tax Collection Division collects motor vehicle transportation license taxes, fuel taxes, insurance company taxes, and petroleum						
7	and gas taxes.						
8	No change in program is proposed for 1952-53. However, the method of financing is changed to the extent that the appropriation will						
9	be scheduled out of the Motor Vehicle Transportation Tax Fund instead of the General Fund. This is done because approximately						
10	85 percent of the support expenditures of the division are paid each year out of the Transportation Tax Fund whereas only 15						
11	percent is paid by the General Fund. The General Fund's share of the expenditures are hereafter included in the appropriation						
12	for General Activities as an operating expense and in the appropriation for the Tax Collection Division as a reimbursement.						
13	The \$91 increase over 1951-52 for the division includes a \$2,938 increase in Operating Expenses due to a rental rate increase in the						
14	Capitol Annex, a \$2,570 decrease in Equipment, and a \$277 increase in the share paid by the General Fund. The \$4,372 proposed						
15	for equipment includes \$1,662 for additional files and miscellaneous equipment, \$1,685 for replacement of office machines that are						
16	old and uneconomical to repair, and \$1,025 for replacement of an automobile expected to reach 100,000 miles in 1952-53.

## Motor Vehicle Fuel Tax Refund Division

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	Motor Vehicle Fuel Fund						
2	Analysis						
3	The Motor Vehicle Fuel Tax Refund Division refunds motor vehicle fuel taxes after auditing and investigating refund claims.						
4	The program for 1952-53 is based upon an increased volume of refund claims received as follows:						
5					ACTUAL	ACTUAL	ACTUAL
6					1948-49	1949-50	1950-51
7							ESTIMATED
8							1951-52
9							ESTIMATED
10	Refund claims received				79,742	86,258	82,315
11							100,612
12	The total increase over 1951-52 is \$8,392, categorically as follows:						
13	SALARIES AND WAGES: The increase of \$3,540 is the cost of one proposed new field representative to handle the increased						
14	volume of refund claims expected to be received in 1952-53.						
15	OPERATING EXPENSES: The increase of \$5,625 represents an increase in rental rates in the Capitol Annex, price increases, and						
16	traveling expenses for the proposed new position.						
17	EQUIPMENT: The total of \$3,950 proposed for 1952-53 is a decrease of \$773 below 1951-52. It includes a \$1,600 automobile for the						
18	proposed new position, \$2,050 for replacement of two automobiles expected to reach 100,000 miles in 1952-53, and \$300 for ad-						
19	ditional miscellaneous equipment.

## STATE CONTROLLER—Continued

## Tax-deeded Lands Division

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	Redemption Tax Fund						
2	Analysis						
3							
4	The Tax-deeded Lands Division administers the general procedures for tax sales, tax deeds, and redemptions of lands deeded to the						
5	State for nonpayment of taxes; enters into leases for the rental of tax-deeded property; advises county officials regarding the levy-						
6	ing and collection of taxes on real property; and renders service to the counties by setting up an abstract and index of tax-deeded						
7	lands.						
8	The program for 1952-53 will remain substantially the same as for 1951-52 and actual 1950-51. For this reason three positions budgeted						
9	in 1950-51 but not used have been abolished during the current year.						
10	The total decrease below 1951-52 is \$2,015 and is composed of a \$2,088 increase in operating expenses, as a result of price increases, offset						
11	by a \$2,523 decrease in equipment and a \$1,000 increase in reimbursement. The \$877 in equipment includes \$507 for replacement of						
12	aged equipment and \$370 for additional miscellaneous items.

## BOARD OF EQUALIZATION

This agency equalizes the assessment of local property between counties, assesses public utility properties and insurance taxes, administers and enforces the Alcoholic Beverage Control Act, assesses and collects retail sales and use taxes, alcoholic beverage taxes, motor vehicle transportation license fees, motor vehicle fuel taxes and private car taxes.

Headquarters Office at Sacramento

## GENERAL ANALYSIS

34					
35					
36					
37	Number of positions—General Fund activities-----	2,402.6	2,405.7	2,416.2	10.5
38	Number of positions—Special Fund activities-----	197.5	203	204	1
39					
40	Total Number of Positions-----	2,600.1	2,608.7	2,620.2	11.5
41					

This budget provides generally for continuation of the existing level of service. The additional \$148,975 for 1952-53 represents price increases; 2.3 proposed new positions for work load; a 17.7 man year decrease in vacant positions; and approximately \$30,000 for the purpose of mechanizing two manual and a partially manual operations. These increases are offset by an operating expense and 8.5 position saving caused by the new machine installations, and the termination of the property tax assessment survey program authorized by Chapter 1523, Statutes of 1947.

A detailed explanation of the total proposed increase may be found by reference to the analysis under each division.

<sup>e</sup> Composed of savings in salaries and wages, \$12,732; operating expenses, \$6,160; and equipment, \$878.

<sup>f</sup> Composed of savings in salaries and wages, \$5,735.

1	GENERAL FUND						
2							
3							
4	GENERAL ADMINISTRATION						
5							
6	Analysis						
7							
8	This division consists of the general administration, departmental accounting, and personnel administration functions of the Board of						
9	Equalization. The total decrease for the division below 1951-52 is \$10,341 based primarily upon the fact that the biennial printing						
10	of the revenue laws of California will occur in 1951-52.						
11	The \$10,134 for equipment is an increase of \$1,999 over 1951-52. This includes \$6,788 for replacement of five automobiles, three on the						
12	basis of age and mileage, and two for the board's normal annual contingency against wrecks. \$1,026 is included for replacement of						
13	aged and worn out office equipment and \$2,320 is included for additional office equipment consisting of a calculator, legal books,						
14	and miscellaneous items for work load.						
15

19	<b>DIVISION OF RESEARCH AND STATISTICS</b>						
20	<b>Analysis</b>						
21	This division performs the research and statistical functions for the board. The total decrease below 1951-52 is \$12,442 consisting of						
22	the elimination of two research writers and an intermittent position of senior statistician in 1952-53, partially offset by a decrease						
23	in vacant positions. The elimination of the writers coincides with the near completion of the program of property tax assessment						
24	surveys started in 1948 under what is now Sections 15640 to 15645 of the Government Code. The senior statistician was allowed						
25	for a six-month period in 1951-52 to start the project of studying the costs and selectivity of the board's various audit programs						
26	under authorization of the 1951 Legislature.

		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1							
2	<b>SERVICE DIVISION</b>						
3							
4	<b>Analysis</b>						
5							
6	The division, established July 1, 1951, consolidated the service functions of the board in order that economies due to centralized operations could be realized. The division has the responsibility for cashiering, mailing, addressograph, supply, tabulating, and other general services.						
7							
8	The actual costs of the component units of the division for 1950-51 are combined and shown in parentheses for purposes of comparison with the current and budget year operations. Since they are a duplication of costs shown elsewhere, they are not included in the budget totals.						
9							
10	The increase over 1951-52 is \$89,192, categorically as follows:						
11							
12							
13							
14	<b>SALARIES AND WAGES:</b> The total decrease in this category is \$5,752 representing the elimination of 6 positions in 1952-53 as a result of new addressing, folding, stuffing, and photographic reproduction machines installed during the 1951-52 and 1952-53 Fiscal Years—partially offset by a contemplated three-man-year decrease in vacant positions.						
15							
16							
17							
18	<b>OPERATING EXPENSES:</b> The \$78,388 increase in operating expenses provides \$57,000 for price increases in the various items; \$2,780 for the rental of stuffing and Xerox machines; \$1,582 for refinishing office furniture; \$43,927 for increases in rental rates and necessary additional space throughout the various districts of the board; offset by a \$8,521 savings resulting from the new machine installations, and a \$19,050 decrease in office alteration costs.						
19							
20							
21							
22							
23	<b>EQUIPMENT:</b> The \$32,352 proposed for 1952-53 will provide for the following:						
24	1. Replacement of an addressograph with a form printing and addressing machine.....						\$12,900
25	Replacement of two hand-operated graphotypes with one automatic graphotype.....						5,900
26	Replacement of an addressograph.....						1,178
27	One new flexewriter.....						2,500
28	One new folding machine.....						450
29	This \$22,928 worth of equipment, together with the rental of the Franchise Tax Board's stuffing machine and a new photographic reproduction machine, is expected to provide the State with an annual savings of approximately \$24,000.						
30	2. Replacement of badly worn equipment.....						5,263
31	Includes one mimeograph at \$1,100; one perforating machine at \$1,650; dictograph handsets purchased about 15 years ago, \$900; and two adding machines acquired 17 years ago, \$594.						
32	3. Replacement of one panel truck purchased in 1942, because of excessive maintenance costs.....						1,238
33	4. Additional equipment required for work load and necessary improvements.....						2,923
34							
35							
36							
37							
38	<b>REIMBURSEMENTS:</b> The increase of \$6,654 in this item represents an increase of \$4,657 in charges to special fund divisions due to price and rent increases, and an increase of \$1,997 in reimbursements from subscribers to Sellers Permit Information, due to the fact that this service will be provided for a complete year in 1952-53 as compared to 10 months in 1951-52.						
39

42	<b>DIVISION OF ASSESSMENT STANDARDS</b>						
43	<b>Analysis</b>						
44	This division has the administrative responsibility of equalizing the assessment of local property between counties. To fulfill this responsibility the division is required to issue cost and other appraisal data to the county assessors, to prepare maps for county use, and in general to assist the county assessors in the performance of their duties.						
45	This budget includes five positions added in 1948 for property tax administration surveys under what is now Sections 15640 to 15645 of the Government Code. While the initial surveys are nearing completion, the positions, four appraisers and one clerk, have been continued to meet a growing work load in advising and assisting assessors under Section 15606 of the Government Code and in making comparative appraisals under Section 1831 of the Revenue and Taxation Code. The surveys have demonstrated the existence of these needs, attributable in large part to the unprecedented growth in the volume of taxable property.						
46	The total decrease below 1951-52 is \$20,219. This includes an increase of \$9,933 in salaries and wages due to the extension of 11 positions in the County Contract Mapping Unit for a full year in 1952-53 as compared to only a part year in 1951-52. Since this program is completely reimbursable, this increase is consequently offset by an increase of \$11,186 in reimbursements for mapping services to counties. Operating expenses shows a decrease of \$13,918 due to the termination of the county survey program, and equipment shows a decrease of \$5,048. The \$1,678 for equipment in 1952-53 includes additional portable calculators, files, and miscellaneous items for normal work load.						
47	<b>SALARIES AND WAGES</b>

## VALUATION DIVISION

## Analysis

This division administers the assessment of the public utility properties in the State. The program for 1952-53 is to expand the appraisal of public utility properties in line with the tremendous expansion in utility property since the end of World War II. At present, the staff has fallen behind in its program to reappraise the property in the State within each five years. For that reason, two additional positions are proposed.

The total increase over 1951-52 is \$9,829, categorically as follows:

**SALARIES AND WAGES:** The increase in this category is \$7,740, which provides for two additional engineering positions at a cost of \$7,800, to handle the increase in work load.

**OPERATING EXPENSES:** The increase in this category is \$1,338, consisting primarily of additional travel expenses for the two new positions.

**EQUIPMENT:** The increase in this category is \$751 over 1951-52. Of the total provided of \$1,326, \$488 is for furniture for the new positions and \$838 is for additional desks and chairs for existing personnel and miscellaneous items for normal work load.

## RETAIL SALES TAX DIVISION

## Analysis

This division assesses and collects the retail sales and use taxes. No significant change in program is planned in 1952-53. The increase for the entire division over 1951-52 is \$68,353, categorically as follows:

**SALARIES AND WAGES:** The increase of \$51,487 consists of part-time janitorial service for the San Rafael and Mt. Shasta offices and an estimated filling of vacant positions. The \$900 cost of janitor service and the \$54,000 increase due to fuller employment is partially offset by the replacement in December, 1952, of four positions at a cost of \$5,889 with a mechanized system of preparing working papers.

**OPERATING EXPENSES:** The increase of \$20,619 consists of \$11,532 in price increases; \$971 for refinishing furniture; \$3,255 for alterations and moving to new office space; \$2,625 for additional telephone service in new offices; and \$2,070 for increased travel due to the filling of vacant positions.

<sup>a</sup> Transferred to Service Division.

66							
67	ALCOHOLIC BEVERAGE CONTROL DIVISION						
68							
69	Analysis						
70							
71	The division administers and enforces the Alcoholic Beverage Control Act, and assesses and collects the alcoholic beverage taxes. There						
72	is no significant change in program in 1952-53.						
73	The total increase over 1951-52 is \$4,049, categorically as follows:						
74							
75	SALARIES AND WAGES: The decrease of \$117 arises from minor changes in blanket positions.						
76							
77	OPERATING EXPENSES: The increase of \$346 consists of a \$3,370 decrease in printing in the headquarters office offset by price in						
78	creases in various other line items.						
79							
80	EQUIPMENT: The amount of \$24,111 proposed for 1952-53 is an increase of \$3,820 over 1951-52. It consists of \$2,692 for replacemen						
81	of 9 typewriters, a billing machine, and other office equipment aged and in poor condition; \$17,252 for replacement of 16 automo						
82	biles expected to exceed 100,000 miles in 1952-53; and \$4,167 in additional equipment for furnishing 3 new branch offices in						
83	District I, equipping a new conference room in District IV, and for various miscellaneous items throughout the division.						
84							
85							
86

## Motor Transportation License Tax Division

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	MOTOR VEHICLE TRANSPORTATION TAX FUND						
2							
3							
4	Analysis						
5							
6	This division administers the Motor Transportation License Tax Act.						
7	Effective October 1, 1951, Chapter 507, Statutes of 1951, transferred the administration of licensing itinerant merchants from the						
8	Public Utilities Commission to this division. The 1951-52 and 1952-53 Budgets include \$13,787 and \$16,491, respectively, for three						
9	positions and related traveling, payable out of the Itinerant Merchants Fund.						
10	There is no significant change in program anticipated for 1952-53. The total increase of \$17,174 consists of an additional \$7,944 in salaries						
11	and wages for a contemplated decrease in vacant positions and a full year's employment of the itinerant merchant staff as com-						
12	pared to nine months in 1951-52; \$11,770 in operating expenses for rental rate and other cost increases; and a \$164 increase for						
13	equipment. The total of \$3,457 for equipment provides \$984 for the replacement of four badly worn typewriters, eight files and two						
14	chairs; \$1,025 for the replacement of a light automobile expected to reach 100,000 miles in 1952-53; and \$1,448 for additional equip-						
15	ment required by normal expansion in work load and necessary improvements.

1	<b>MOTOR VEHICLE FUEL FUND</b>						
2							
3							
4	<b>Analysis</b>						
5							
6	This division assesses the motor vehicle fuel tax and the liquefied petroleum gas taxes and assesses and collects the use fuel tax. This						
7	program shows no change for 1952-53. The total decrease below 1951-52 is \$583 composed of an increase of \$736 in operating expenses						
8	and a decrease of \$1,319 in equipment. The \$2,519 in equipment includes \$369 for replacement of aged and dilapidated furniture,						
9	\$1,025 for replacement of an automobile expected to reach 100,000 miles in 1952-53, and \$1,125 for additional files and other mis-						
10	cellaneous items for normal work-load increases.

79					

<sup>a</sup> In accordance with the provisions of Sections 13163, 13164, and 13165 of the Government Code, all expenditures of the Buildings and Grounds Division are paid from the Service Revolving Fund. Collections from special fund agencies for janitor and maintenance service, and from agencies requesting other special services, are deposited in the Service Revolving Fund. After the cost of services rendered and charged to other agencies has been deducted, the remaining expenditures are charged to the support appropriation of the Buildings and Grounds Division. The "Net Total Expenditures for Support" represent such remaining expenditures.

## DEPARTMENT OF FINANCE—Continued

## General Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)				
1	GENERAL ANALYSIS							CHANGE FROM
2								1951-52
3								
4	Number of positions -----				406.2	428.6	434.4	5.8
5								
6	ADMINISTRATION DIVISION							
7								
8	Analysis							
9								
10	General supervision of the department, supervision of leases and contracts of the State, investment of surplus funds, review of the							
11	agricultural policies of state agencies, fidelity bonds and insurance, construction activities, review of use of state-owned automotive							
12	equipment, and the operation of traffic management are the principal functions of this division.							
13								
14	SALARIES AND WAGES: The increase of \$26,616 for five new positions is as follows:							
15	2 Senior architectural designers -----							\$13,344
16	1 Assistant investment advisor -----							4,980
17	1 Assistant administrative advisor (to June 30, 1953) -----							5,772
18	1 Intermediate account clerk -----							2,520
19	The two senior architectural designers are to augment the architectural and construction advisor's staff in							
20	order to (1) make advance program plans in order to furnish proper criteria for preparation of budget							
21	estimates; (2) establish standards for types of construction, finishes and equipment, economy in usage of							
22	facilities to minimize recurring support expenditures and special allowances; and to (3) assure conformity							
23	with established standards.							
24	The assistant investment advisor will absorb the increased work load within the office and assist the invest-							
25	ment advisor in making analysis of market conditions and various issues of securities owned and to							
26	increase the supervision of present investments.							
27	The assistant administrative advisor is provided for one year in order to reduce the backlog of work within							
28	the administrative advisor's office.							
29	The intermediate account clerk will consolidate all activities pertaining to the disposal of surplus state							
30	vehicles and complete the necessary documents, title transfers and eventual sale or return of confiscated							
31	vehicles. Experience has proved that it is possible to obtain from \$5 to \$200 more per vehicle by public							
32	auction than by sealed bid or trade-in.							
33								
34	OPERATING EXPENSES: The increase of \$2,289 consists primarily of price increases plus \$500 required for garage supplies in the							
35	Capitol basement garage, and \$390 for increased rental costs.							
36								
37	EQUIPMENT: The amount budgeted provides equipment for new positions, \$1,923; six additional files, \$705; technical and legal							
38	books, \$600; four micrometers for automotive inspectors, \$320; replacement of two typewriters, \$265; bookcases, supply cabinets							
39	required for expansion and small miscellaneous items, \$1,085.							
40								
41	SALARIES AND WAGES							
42	Executive:				SALARY RANGE			
43	Director -----	1	1	1	\$1,458	\$16,875	\$17,500	
44	Deputy director -----	1	1	1	1,100-1,200	14,250	14,400	
45	Assistant director -----	1	1	1	1,000-1,100	13,200	13,200	
46	Secretary -----	1	1	1	395-481	5,772	5,772	
47	Secretary-stenographer -----	1	1	1	295-358	4,296	4,296	
48	Intermediate typist-clerk (one-half							
49	salary) a -----	0.5	1	1	210-255	1,260	1,260	
50	Advisory:							
51	Principal architectural designer -----	1	1	1	745-905	10,731	10,860	
52	Staff architectural designer -----	1	1	1	613-745	8,940	8,940	
53	Associate estimator of building							
54	construction -----	1	1	1	458-556	6,160	6,464	
55	Administrative advisor -----	1	1	1	613-745	8,940	8,940	
56	Assistant administrative advisor -----	3.5	4	4	481-584	24,213	26,026	
57	Junior counsel -----	0.5	1	1	325-376	3,948	4,143	
58	Insurance advisor -----	1	1	1	556-676	8,112	8,112	
59	Assistant insurance advisor -----	1	1	1	415-505	6,060	6,060	
60	Agricultural advisor -----	1	1	1	556-676	8,112	8,112	
61	Investment advisor -----	1	1	1	613-745	8,940	8,940	
62	Senior legal stenographer -----	1	1	1	255-310	3,720	3,720	
63	Senior stenographer-clerk -----	3.5	5	5	255-310	17,309	17,752

48	Net Totals, Administration Division -----				\$226,429	\$292,904	\$325,518
49	ACCOUNTS AND DISBURSEMENTS DIVISION						
50	Analysis						
51	This division maintains the accounting, personnel, and property records of the department.						
52	SALARIES AND WAGES: The net increase of \$3,980 results from the following new positions partially offset by six positions						
53	eliminated as a result of the mechanization of the accounting system:						
54	3 Intermediate account clerks -----						\$7,560
55	2 Intermediate typist-clerks -----						5,040
56	Two intermediate account clerks are to meet the increased work of the personnel section. Authorized						
57	positions in the department have increased from 1,233 in 1950-51 to 1,414 in 1952-53. One intermediate						
58	account clerk is required in the ordering section due to the increased work load.						
59	The two intermediate typist-clerks are required for general typing and claim preparation work based on						
60	increased work load.						
61	OPERATING EXPENSES: The increase of \$4,419 consists of \$3,044 increase in rental costs and price increases.						
62	EQUIPMENT: The amount budgeted provides for replacement of worn equipment, \$365; annual payment on purchase of tabulating						
63	installation, \$7,497; additional tabulating files and tabulating equipment, \$1,784; and additional files, calculators and other equip-						
64	ment to meet increased work load, \$2,082.

1	AUDITS DIVISION						
2	Analysis						
3							
4							
5							
6	The primary functions of this division are the regular detailed examination of the books and records of all state agencies, and such						
7	other studies and special audits as are required. Chapter 1259, Statutes of 1951 added the auditing of school districts to the work						
8	of this division. Increased efficiency in the performance of audits and an anticipated increase in efficiency brought about by re-						
9	vamping the audit program and installation of the new accounting system, effective July 1, 1951 has made it possible to absorb the						
10	additional duties without increasing the total staff of this division. The accounting services section, formerly part of the Division						
11	of Budgets and Accounts was transferred to this division effective July 1, 1951.						
12	The expenditures of this division show an increase of \$10,803.						
13							
14	OPERATING EXPENSES: The increase of \$5,435 is made up principally of price increases and a \$3,500 increase in traveling and						
15	mileage costs due to the additional duties imposed by the auditing of school districts.						
16							
17	EQUIPMENT: The budget provides the following:						
18	Replacement of two adding machines, \$642; 12 brief cases, \$160; two calculators, \$600; and a duplicating machine,						
19	\$1,296; and four additional files, books, etc., \$724.						
20							
21	SALARIES AND WAGES

		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1							
2	DIVISION OF BUDGETS AND ACCOUNTS						
3							
4	Analysis						
5							
6	This division prepares and presents the Governor's Budget; reviews and approves fiscal year working budgets for each state agency;						
7	administers budgetary control, allocates the Emergency Fund and other lump sum appropriations; does research and analysis of						
8	economic conditions, revenue yields; expenditure trends and other developments affecting over-all state financial affairs and fiscal						
9	policies; designs, installs and supervises accounting systems of all state agencies; and surveys, analyzes and recommends improve-						
10	ments of the administrative structure and procedures of state agencies.						
11	Expenditures of this division remain at approximately the same level as during the current year. The increase of \$5,188 results prin-						
12	cipally from estimated fuller employment of positions, plus price increases. The amount budgeted for equipment consists of \$1,091						
13	for replacement of two typewriters, one calculator and miscellaneous items which are worn out; \$663 for five files, two cabinets,						
14	and small items; and \$900 for the purchase and binding of books for the library in order to maintain it in a current condition.

32	DIVISION OF COMMUNICATIONS						
35	Analysis						
37	This division has the responsibility for improving and coordinating the use of radio and other communication facilities owned or operated						
38	by the State, cities, counties, and other political subdivisions. The division also acts as liaison and representative of the State before						
39	the Federal Communications Commission.						
40	A program of centralized radio maintenance, whereby the division is to maintain radio equipment for state agencies, was started during						
41	1949-50. This activity was transferred to the Purchasing Revolving Fund January 1, 1950, for the purpose of simplifying the finan-						
42	cial arrangements involved in charging for the maintenance service and to insure its operation on a self-sustaining basis.						
43	Expenditures for this division are proposed at the same level as in the current year. Minor price increases are reflected in operating						
44	expenses. Equipment provides for technical and miscellaneous items.

38	PURCHASING DIVISION						
39	Analysis						
40	The division acts as the central purchasing agent for the State. In addition the division maintains storerooms in Sacramento, San Francisco, and Los Angeles, the expenditures for which are not included in the budget of this division.						
41	Expenditures of this division are proposed at approximately the same level as in the current year. The increase of \$1,327 is made up principally of price increases plus an increase of \$1,500 in laboratory services. The amount budgeted for equipment includes replacement of two chairs, two typewriters, one adding machine, and one mailing machine which are worn out and no longer usable, \$1,324; and the addition of one time stamp for the San Francisco office, and one electric typewriter for the Los Angeles office, \$531.

1	<b>LIQUIDATION OF SURPLUS EQUIPMENT AND LEASES,</b>							
2	<b>DEPARTMENT OF SOCIAL WELFARE</b>							
3								
4	<b>Analysis</b>							
5	The work of liquidating the leases and equipment acquired by the Department of Social Welfare for the administration of Article XXV							
6	of the Constitution was assigned to this unit. The increase in expenditures results from the fact that it is estimated that the surplus							
7	equipment will be disposed of during the current year, thereby reducing the estimated reimbursements during the budget year.							
8	The last lease under the program will expire in December, 1954, and the completion of the program is estimated at the end of the							
9	1954-55 Fiscal Year. Of the \$718,175 budgeted, \$683,175 is for rental payments.

## DEPARTMENT OF FINANCE

## Buildings and Grounds Division

This division maintains state-owned and leased buildings and grounds in Sacramento, San Francisco, and Los Angeles. Its staff reviews for approval all leases of real property for use by state agencies.

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
1	<b>GENERAL ANALYSIS</b>				
2					
3					
4	Number of positions -----	656.7	729.7	873.7	144
5					
6	The increase of \$446,708 results primarily from the maintenance and custodial costs of the new Motor Vehicle, Education, and Public				
7	Works Annex buildings which are scheduled for completion on January 1, 1953.				
8					
9	SALARIES AND WAGES: The increase of \$280,441 results from the following:				
10	56 New positions for maintaining and operating the new Motor Vehicle Building -----				\$74,618
11	3 Positions for heating and air conditioning -----			\$6,510	
12	43 Positions for cleaning the building -----			53,906	
13	3 Positions for operating the elevators -----			3,600	
14	3 Positions for maintaining buildings and grounds -----			4,170	
15	4 Positions for policing the building -----			6,432	
16	32 New positions for maintaining and operating the new Education Building -----				41,943
17	2 Positions for heating and air conditioning -----			\$4,340	
18	25 Positions for cleaning the building -----			31,153	
19	3 Positions for operating the elevators -----			3,600	
20	2 Positions for maintaining buildings and grounds -----			2,850	
21	24 New positions required as a result of greater work load explained functionally as follows -----				\$80,855
22	Administration:				
23	1 Junior staff technician -----			\$3,540	
24	1 Intermediate clerk -----			2,520	
25	The junior staff technician is provided for one year to assist in developing operating standards,				
26	staffing patterns, post assignment schedules and a manual of good operating procedures on				
27	all phases of the work of the division. The development of this material is required to develop				
28	information for both management and budgetary use.				
29	The intermediate clerk is required to assist in handling the increased work load resulting from				
30	completion of new buildings and to reduce delays now occurring in the processing of work				
31	within the division.				
32	Sacramento Buildings:				
33	1 Assistant building manager -----			\$4,512	
34	2 Intermediate clerks -----			3,780	
35	2 Electricians -----			11,440	
36	1 Carpenter -----			4,971	
37	2 Painters -----			9,536	
38	1 Plumber -----			5,720	
39	1 Head janitor -----			3,060	
40	1 Office equipment repairman -----			3,216	
41	1 Laborer -----			2,640	
42	4 Janitors -----			9,600	
43	The assistant building manager will assist the building manager in the maintenance and opera-				
44	tional problems of buildings in the Sacramento area and will absorb the work load increase				
45	resulting from completion and occupation of new buildings in the budget year.				
46	One intermediate clerk will assist the storekeeper at the state warehouse in handling the sale of				
47	surplus equipment turned in for disposition, and to maintain inventories and sales records.				
48	The other position (effective January 1st), is required by the central messenger service when				
49	the new buildings are completed.				
50	The two electricians, two painters, one carpenter, and one plumber are required to meet the				
51	demands for emergency repairs, minor alterations and preventive maintenance for buildings in				
52	the Sacramento area. The existing staff has not been able to keep abreast of the demands.				
53	The head janitor is required to supervise the staff of window cleaners and to develop stand-				
54	ards for future requirements.				
55	The office equipment repairman and laborer are to augment the staff of the typewriter repair				
56	shop which has had a consistent backlog of work for the last six months. These positions are				
57	completely reimbursable.				
58	The four janitors are required to provide janitorial service in the basement of the original Capi-				
59	tol which will be occupied by the Secretary of State, Legislative Bill Room, Treasury, Govern-				
60	nor's files, and the state police; the fourth floor of the original Capitol and the sixth floor of				
61	the east wing.				
62	San Francisco Buildings:				
63	1 Intermediate information clerk -----			\$2,520	
64	This position is to serve the needs of the public for information regarding state agencies and				
65	employees when visiting the State Building.				
66	Los Angeles Buildings:				
67	1 Stationary engineer -----			\$3,720	
68	2 Laborers -----			5,280	
69	2 Janitors -----			4,800	
70	These positions are for the purpose of taking over the maintenance and operation of the High-				
71	way Patrol Building in Los Angeles. The cost of these positions will be recovered through				
72	reimbursement from the Department of California Highway Patrol.				
73	The balance represents maintenance and operational costs of the new Public Works Annex which				
74	had been scheduled for completion on February 1, 1952, but because of construction delays				
75	will not be completed until January 1, 1953.				
76	OPERATING EXPENSES: The increase of \$171,960 represents the additional cost of operating the Public Works Annex, \$16,790;				
77	Education Building, \$16,815; and Motor Vehicle Building, \$23,811. A new item of General Maintenance has been added in the				
78	amount of \$39,100 to offset those maintenance costs previously borne from other funds and included in the amount recovered				
79	through the work order process. The remainder of the increase is to provide for price increases.

## DEPARTMENT OF FINANCE

## Local Allocations Division

is division is responsible for the administration of programs involving the allocation of funds to local agencies. These include allocations from the General Fund, the Postwar Unemployment and Construction Fund, and the Public School Building Loan Fund. In addition, the division is responsible for the supervision of the management phase of the Emergency Veterans' Housing Program.

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52
------	--------------	-------------------	----------------------	---------------------	------------------------

## GENERAL ANALYSIS

Number of positions----- 66.4 69 69

The activities of the Local Allocations Division are expected to continue at a level equal to that of the current year. However, work load related to the various programs is expected to change substantially during 1952-53 with the school building loan program constituting 70 percent of the division's work load. Programs supported from the General Fund constitute 15 percent of the division's total work load, and the same applies to programs supported from the Postwar Unemployment and Construction Fund. The following table shows the change:

	ESTIMATED 1951-52	ESTIMATED 1952-53
General Fund .....	20%	15%
Postwar Unemployment and Construction Fund .....	20%	15%
Public School Building Loan Fund .....	60%	70%

Principal changes in the expenditure program are as follows:

**SALARIES AND WAGES:** The increase of \$500 is attributable to temporary help requirements.

**OPERATING EXPENSES:** The increase of \$1,332 is for normal price increases.

**EQUIPMENT:** The amount of \$1,703 provides for the following: additional office equipment, including six files, \$848; replacement of one desk and five chairs to replace obsolete equipment, \$470; and replacement of one standard typewriter, which is 14 years old, with an electric machine to do multiple copy work.

## Department of Finance

## DIVISION OF FAIRS AND EXPOSITIONS

Exercises general supervision over the district, county, and citrus fairs. Prepares a master premium list, approves premium lists and operating budgets of the fairs. Prepares claims for distribution of funds appropriated from the Fair and Exposition Fund and recommends allocations for Capital Outlay.

34					

The increase of \$8,902 is made up primarily of a \$5,000 item for Annual Judges' Conference, the purpose being to arrive at general acceptance of judging standards; to train additional judges; to establish standards with relation to breed types; to train existing judges to judge more than one breed and to inform judges and keep them abreast of changing conditions in livestock types. This activity has been supported in the past by private resources which have been withdrawn. Principal changes in the expenditure program by category are as follows:

**SALARIES AND WAGES:** The increase of \$3,836 is made up of \$2,426 for full time employment of one assistant engineer and one senior accountant who were ill during the first few months of the current fiscal year; \$1,000 for temporary help—judges' conference, and \$400 for temporary help—general.

**OPERATING EXPENSES:** Of the \$7,704 increase, \$4,000 is for the judges' conference; \$2,475 for increased traveling and automobile operation costs and approximately \$400 for a complete reprinting of the master premium list. The balance represents price increases.

**EQUIPMENT:** The amount of \$797 provides for five transfer files, \$55; one bookcase, \$198; one calculating machine, \$394, and \$150 for miscellaneous items.

**OTHER CURRENT EXPENSES:** Expenditure for this project is continued at the same amount in order to complete the three-year survey program started two years ago.

## GENERAL ANALYSIS

Number of positions ..... 75.9 76.1 76.1 -

The budget provides for maintaining the California State Fair at the same level as in the current year. The increase of \$124,585 is due primarily to price increases and a few adjustments where required to maintain the attendance and revenue. The expenditures for 1952-53 will exceed the estimated revenue by \$637,375. It is proposed that this deficiency be financed from: available surplus in the amount of \$197,375; transfers from the Fair and Exposition Fund under provisions of existing law amounting to \$140,000; and an additional transfer of \$300,000 from the Fair and Exposition Fund.

**SALARIES AND WAGES:** The increase of \$24,895 is made up by increases in temporary help and overtime as follows: \$1,530 in Administration to absorb increased work load in the preparation of schedules and issuance of premium warrants which have increased 11.3 percent over 1950; \$7,403 in Exhibits and Horse Show; \$2,100 for carrying on the new program of Consumer Reaction Council offset by approximately \$1,500 in entry fees, and the balance to employ additional personnel to properly administer the program throughout the department; \$4,560 in Concessions and Commercial space to offset additional work load resulting from increased space available in the machinery building; \$2,941 in Attractions and Special Events for payment of stagehands and electricians for additional rehearsal time for improvement of the evening attractions; and \$5,514 in Racing for additional pari-mutuel clerks to staff additional wagering facilities that are to be constructed.

**OPERATING EXPENSE:** The increase of \$105,969 is made up principally from price and cost increases and \$1,000 increase in directors expenses due to increased rates, costs of food and filling of vacancies; approximately \$17,800 in premiums for increased number of exhibits; \$2,300 for judges to take care of increased fees and larger number of entries to be judged; \$15,000 for paid advertising for increased rates in order to bring advertising up to the 1947 level—the last year in which an increase for this item was given; \$3,000 increase in public relations, promotions and publicity to meet increased prices and to provide funds for a theme development for the fair; \$10,000 increase in night shows in order to provide better shows which will in turn increase attendance and revenues; approximately \$3,700 in free attractions and \$2,700 in band and music to provide for increased costs; approximately \$15,000 for racing—of which \$9,000 is for increased purses, and \$3,000 for rental expense of a Tel Autograph system and increased rental of other equipment; and \$3,000 for breeders fees and racing expenses.

**EQUIPMENT:** The amount of \$24,229 provides \$20,968 for replacement of office furniture and equipment, tools, canvas, exhibit furniture, air conditioning and circulating equipment, two 1½ ton trucks and one automobile, and police badges. \$3,269 has been provided to purchase one additional file, one coin wrapping machine, five turnstiles and one refrigerator. The refrigerator is required in connection with racing activities for urine and saliva samples.

**REVENUES:** It is expected to continue the increased level that was made in the current fiscal year. The estimate for the budget year exceeds that of the current year by \$83,368 and the past year by \$286,890.

## Department of Finance

## DIVISION OF STATE LANDS

Administers the public lands belonging to the State, consisting of school land, swamp, overflowed, salt marsh, tide, submerged and other sovereign lands. Principal revenue-producing function is the leasing of the public lands for the extraction of oil and minerals.

Office at Los Angeles

53	Santa Barbara .....	109	103	99	
54	Rio Vista .....	178	186	192	
55					
56	Totals .....	593	637	683	

The increase in gross expenditures for 1952-53 over 1951-52 is \$26,639, an increase of 7.3 percent. Increase in estimated reimbursements of \$32,320 for administration of tideland mineral leases and engineering boundary determinations accounts for the difference in decreased costs indicated by comparative total expenditures for support. The increase in estimated reimbursements results from the following:

1. Renewal of the operating stipulation between the State and the Federal Government which provides for reimbursements to the State for tideland lease administration in the amount of \$14,000 instead of \$12,000 monthly from October 1, 1951, forward.
2. An estimated reimbursement of \$10,000 as provided by Chapters 1406 and 913, Statutes of 1951, requiring the division to establish boundaries of legislative grants to the County of Sonoma and City of Sausalito.

Changes in the various categories of expenditures are as follows:

**SALARIES AND WAGES:** Increase of \$9,600 is made up of three new positions; one intermediate file clerk to reorganize and reindex files along the lines of the Los Angeles office and to assume responsibility for all filing and filing maintenance within the office; two oil gaugers, one for Huntington Beach area to take care of the additional work load resulting from approximately 90 new wells since July 1, 1950, and one for the Rio Vista office to take care of a 30 percent increase in work load resulting from increased wells, area to be covered and supervision of the new River Island field.

**OPERATING EXPENSE:** Major portion of the \$17,335 increase results from: \$10,000 reimburseable item of engineering boundary determinations for County of Sonoma and City of Sausalito; \$2,380 for rent to continue existing space assignments for full year; \$300 for verification of proprietary lands index; \$800 for processing applications for assuming jurisdiction by the Federal Government over military installations and \$2,520 for traveling to provide increased costs resulting from new positions and full crews traveling.

<sup>a</sup> Composed of savings in salaries and wages, \$5,094; operating expenses, \$8,946; equipment, \$1,165, and excess reimbursements, \$101,081.

<sup>b</sup> Composed of savings in salaries and wages, \$4,002; operating expenses, \$6,666, and loss in reimbursements, \$10,080.

## Department of Finance

## DIVISION OF STATE LANDS—Continued

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52	
1	GENERAL ANALYSIS—Continued					
2	EQUIPMENT: An increase of \$236 from 1951-52. The amount requested provides for:					
3	(a) Equipment for new positions.....				\$209	
4	(b) Equipment to replace equipment on loan from other state agency.....				498	
5	(c) Replacement of five typewriters and one adding machine which are worn out and inefficient.....				1,099	
6	(d) Additional drafting table drawer units, file, bookcase and miscellaneous items to provide space for tools and equipment and for normal expansion.....				1,612	
7	(e) Additional laboratory equipment for testing oil and gas samples.....				375	
8	(f) Additional automobile for additional personnel.....				1,600	
9	(g) \$450 for mobile radio transmitter-receiver for contacting field walkie-talkie units, and \$300 for miscellaneous surveying equipment.....				800	
10	OTHER CURRENT EXPENSES: One new project is added—establishment of index of state lands under jurisdiction of the United States. This is a mandatory project required under Government Code Section 127, Chapter 875, Statutes of 1951. This work, together with the establishment of the resultant index, is anticipated to cost \$5,000.					
11	Expenditures for other projects are anticipated at the same level as in 1951-52.

## Department of Finance

## NAPA STATE FARM

The farm is under the control of the Department of Finance. Through cooperation with the state institutions, it may be utilized for agricultural or horticultural purposes or as a stock or dairy farm and may distribute to state institutions the products of the farm or the livestock. The Rector Canyon Dam is located on the farm and is the water supply for the Veterans' Home of California.

## FRANCHISE TAX BOARD

This agency administers the Bank and Corporation Franchise Tax Act, the Corporation Income Tax Act, and the Personal Income Tax Law. Members of the board are the State Controller, Director of Finance, and Chairman of the State Board of Equalization. Direction of the agency's affairs is assigned to the Executive Officer of the Franchise Tax Board.

28					
29	Number of positions .....	550.9	617	619	2
30					
31	The total budget increase for 1952-53 over 1951-52 is \$18,720, categorically as follows:				
32					
33	<b>SALARIES AND WAGES:</b> The \$4,958 increase in this category represents two additional clerical positions for the processing of a				
34	greater volume of Information at Source reports.				
35					
36	<b>OPERATING EXPENSES:</b> The additional \$44,529 for operating expenses provides for a new program of investigating exempt corpo-				
37	rations, and for a general increase in costs and work load volume.				
38					
39	<b>EQUIPMENT:</b> A total of \$26,153 is proposed, which is a decrease of \$30,767 from 1951-52. The amount for 1952-53 is required for the				
40	following purposes:				
41	1. Proposed new positions .....				\$745
42	2. Exempt corporation investigation program .....				1,335
43	3. Allocation audit program .....				852
44	4. Work load and necessary improvements .....				16,603
45	5. Replacement of worn out and obsolete items .....				6,618

## ADMINISTRATION

## Analysis

In addition to the general administration of the state income and franchise tax programs, this division includes the agency's accounting, statistical, collection, legal, and special investigation functions.

There is no significant change in program anticipated for 1952-53.

The total increase of \$15,418 over 1951-52 represents an estimated five man-year decrease in vacant positions, and cost increases in the various operating expense items—offset by a \$21,294 decrease in equipment resulting from the purchase in 1951-52 of a \$20,398 tabulating installation for the statistical section. The \$7,529 for equipment provides \$5,001 for the replacement of a worn out duplicator, bookkeeping machine, and other minor items; \$300 for an addressing plate file to be used in the Accounting Division for exempt corporations; and \$2,228 for general work load increases and necessary improvements.

20	FRANCHISE TAX DIVISION						
21							
22	Analysis						
23							
24	This division administers the Bank and Corporation Franchise Tax Act, and the Corporation Income Tax Act. There is no significant						
25	change in program anticipated for 1952-53.						
26							
27	SALARIES AND WAGES: The \$4,013 decrease is caused by an estimated 1 man-year increase in vacant positions.						
28							
29	OPERATING EXPENSES: The additional \$5,832 consists of \$5,874 for cost increases; \$3,000 for out of state travel required by a full						
30	year allocation audit program; and \$2,428 for a new program of investigating exempt corporations. These increases are offset by a						
31	\$5,470 decrease in printing caused by the biennial printing in 1951-52 of Bank and Corporation Franchise and Corporation Income						
32	Tax regulations.						
33							
34	EQUIPMENT: The \$2,932 for this function provides the Allocation Audit staff with \$852 worth of equipment not budgeted when the						
35	positions were first authorized; \$1,035 for the Exempt Corporation program; \$841 for work load and necessary improvements; and						
36	\$204 for the replacement of an obsolete chair and a worn-out typewriter.

32	PERSONAL INCOME TAX DIVISION						
33	Analysis						
34	This division administers the Personal Income Tax Act.						
35	The program for 1952-53 is based upon a continuing increase in the number of personal income tax returns, and upon a sudden growth						
36	in the volume of information at source reports. The following table illustrates the upward trend in the number of information at						
37	source reports checked in headquarters and investigated in the field:						
38		1947	ACTUAL	1949	1950	ESTIMATED	1951
39	Number checked	176,000	208,000	484,000	650,000		700,000
40	Number investigated	20,860	27,482	99,239	125,000		125,000
41	The 1949 increase, caused by lowering the personal income tax exemptions, has had a significant effect on the field staff's work load.						
42	The total budgeted increase for this function over 1951-52 is \$1,437, categorically as follows:						
43	SALARIES AND WAGES: The \$19,957 decrease in salaries and wages consists of:						
44	1. Two additional clerical positions for processing information at source returns—one in each of the Los						
45	Angeles and San Francisco offices						\$5,040
46	2. An estimated increase in turn-over and a 4 man-year increase in vacant positions						
47							-24,997
48	OPERATING EXPENSES: The additional \$30,913 for this category provides \$4,552 in postage for information at source reports						
49	and correspondence; \$25,895 for cost increases in the various line items; and a net increase of \$466 for minor work load and pro-						
50	gram changes.						
51	EQUIPMENT: The \$15,692 required for 1952-53 is a decrease of \$9,519 from 1951-52. The proposed amount includes \$745 for the two						
52	new positions; \$1,413 for the replacement of worn-out and obsolete items; and \$13,534 for work load and necessary improvements						
53	such as \$7,860 for 60 file cabinets to house the growing volume of personal income tax returns and \$573 for a heavy duty tying						
54	machine.

## GENERAL ANALYSIS

50					
51					
52					
53					
54					
55	Number of positions -----	44.9	45	45	-
56					
57	The State Treasurer's program for 1952-53 will be substantially the same as that provided for in the prior year.				
58	The total budget decrease of 1952-53 under 1951-52 is \$9,106, analyzed as follows:				
59					
60	<b>SALARIES AND WAGES:</b> The \$500 increase in salaries and wages represents a statutory salary increase to the Deputy State Treasurer.				
61					
62	<b>OPERATING EXPENSES:</b> The \$9,822 increase in total operating expenses represents primarily an additional \$8,500 in fiscal agency fees. This reflects the growing activity in the bonded debt function arising out of additional issues of veterans bonds and school building bonds during the current and budget years.				
63					
64	<b>EQUIPMENT:</b> The \$4,562 required for 1952-53 is a decrease of \$422 from 1951-52. \$2,588 is for furniture and fixtures to rehabilitate the State Treasurer's office in keeping with the current rehabilitation of state offices. The remaining \$1,974 is for 2 adding machines, 2 desks, books, a tabulating card file, etc. for increased work load.				
65					
66	<b>REIMBURSEMENTS:</b> The \$20,000 in reimbursements budgeted for 1952-53 represents a new budget procedure. Heretofore, charge to special fund agencies for services rendered in collecting state-owned securities have accrued to the General Fund as a nonrevenue item.				
67					
68					
69					
70					
71					
72					
73					

<sup>a</sup> Composed of savings in salaries and wages, \$11,664; operating expenses, \$1,490; and equipment, \$887.

<sup>b</sup> Composed of savings in operating expenses, \$12,012.

<sup>c</sup> Trust and agency funds are not included in the over-all budget totals. See Schedule 3 for statement of balances in other treasury funds

## GENERAL ANALYSIS

Number of positions ----- 1,759.5 1,857.8 2,102.8 245

The principal changes from the current fiscal year are the proposed addition of 232 positions to the uniformed strength of the Highway Patrol to provide a more adequate degree of enforcement; and the inclusion of funds for the expenses of officers assigned temporarily to areas of high accident frequency to permit concentrated enforcement effort.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	
	50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)				

## ADMINISTRATION

## Analysis

This function includes the office of the commissioner and the following staff sections: General administration, accounting, personnel, office services, shops and stores, and mechanical analysis.

Two clerical positions are proposed to meet the additional work load resulting from the recommended patrolmen and funds are included for necessary equipment for the new headquarters building.

21	ENFORCEMENT						
22	Analysis						
23	This function includes all field personnel, field office operations, and the Los Angeles headquarters.						
24	To achieve more adequate policing of the highways 20 additional traffic sergeants and 200 additional traffic officer positions are pro-						
25	posed. Also 12 additional traffic lieutenant positions are proposed to improve supervision in the larger squad areas.						
26	The other additional positions proposed are: Four radio-dispatcher clerks to man a new station at Santa Rosa; and two full-time						
27	and five part-time janitors for new offices occupied during the current fiscal year or proposed for the 1952-53 Fiscal Year.						
28	The remainder of the increase is attributable to operating expenses and equipment incidental to the augmented uniformed staff, except						
29	for \$124,272 in traveling expenses to provide for the temporary assignment of officers to areas of high accident frequency to						
30	permit concentration of enforcement.

## DEPARTMENT OF INDUSTRIAL RELATIONS

The department administers the state laws relative to labor through its nine divisions. In general, it is the duty of the department "to foster, promote, and develop the welfare of the wage earners of California; to improve their working conditions; and to advance their opportunities for profitable employment."

Headquarters in San Francisco

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

LINE	EXPENDITURES	ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53	CHANGE FROM 1951-52		
1	GENERAL ANALYSIS						
2							
3							
4	Number of positions -----	747.7	759	779.1	20.1		
5							
6	The modifications in this budget are attributable to changes in the volume of work occurring since the 1951-52 Budget was originally proposed. These changes are found in the budgets for the Divisions of Industrial Accidents, Safety, Welfare, and Labor Statistics and Research.						
7							
8							
9							
10							
11	SUPPORT EXPENDITURES	NO. OF POSITIONS					
12	DETAIL	50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
13		ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53			
14							
15	DIVISION OF ADMINISTRATION						
16							
17	Analysis						
18							
19	The Division of Administration is composed of the director's office, the Supervisor of Industrial Accident Self-Insurance Plans, and the accounting office. The functions also include all general housekeeping services and fiscal management.						
20	There are no major program changes contemplated during 1952-53. Two clerical positions were transferred to this division during the current year from the Division of Apprenticeship Standards as further centralizing of supplies and mimeographing was effected.						
21

<b>DIVISION OF INDUSTRIAL ACCIDENTS</b>						
<b>Analysis</b>						
The Industrial Accident Commission when exercising judicial functions is responsible for the adjudication of cases arising under the Workmen's Compensation Law.						
Included in this budget are provisions for both work load and program changes. One referee, and one clerk have been proposed to meet anticipated annual case load increase. One reporter and one clerk are provided contingent upon the findings of a study now in progress as to the need of a reporter and clerk for each referee. Two clerks are provided for the commission's office contingent upon the development of the anticipated increase in work incident to amendments made in Sections 5315, 5911, and 5908.5 of the Labor Code, by Chapter 778, Statutes of 1951. Funds have been provided for district offices in Sacramento and San Diego, the first of which will be opened during the current year. Subsequent offices will be dependent upon an evaluation as to the success of this office.

51	DIVISION OF INDUSTRIAL SAFETY						
53	Analysis						
55	The Division of Industrial Safety is vested with supervisory and jurisdictional responsibilities necessary for the protection of employees from injuries connected with or arising out of their employment. The division administers laws pertaining to safety, issues safety orders, investigates and studies causes of industrial injuries, prepares and distributes information on prevention of accidents, and makes inspections of places of employment for compliance with minimum standards for safety.						
57	This budget provides three assistant safety engineers (boiler) and one and one-half clerks for the boiler section to enable the division to bring the inspection periods within the limits of the law. One safety engineer (elevator) is provided for the elevator section because of the increase in number of elevators to be inspected and the code provision that each be inspected annually. One clerk is provided for the clerical pool because of over-all work load increase in all sections. One and one-half clerks are included to maintain and use the machine scheduling of inspections in the construction, industrial, and petroleum fields on a limited basis. The ultimate development and utilization of this method of scheduling will require an additional clerk and one key punch operator over and above the position proposed in this budget at a cost of about \$5,400.

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	DIVISION OF APPRENTICESHIP STANDARDS						
2							
3	Analysis						
4							
5	The establishment and functioning of the Division of Apprenticeship Standards is provided by the Shelley-Maloney Apprenticeship Labor Standards Act of 1939. This act creates an Apprenticeship Council, which includes the Director of Industrial Relations as an ex officio officer, and provides that the council will establish standards for minimum wages, maximum hours, working conditions for apprenticeship agreements and shall foster, promote, and develop the welfare of the apprentice in industry; improve the working conditions of apprentices; and advance their opportunities for profitable employment.						
6	The division is the approving agency for apprenticeship and other training on the job and as such contracts with the Veterans Administration for performing the required service to employers who are training veterans.						
7	Though no program or work load changes are provided for in this budget, there is again a further shift from federal to state support of \$48,121 resulting from a decline in federal grants in aid for supervision of establishments engaged in on-the-job training of veterans. The State's work load has not suffered a comparable drop as the apprentice is still there to be trained. The expiration of G. I. benefits to the individual veteran in no way determines or affects his need for further training. As an apprentice, the veteran whose benefits have expired is indistinguishable for any other apprentice and as such he is merely absorbed into the state program for the completion of his training.						
8	The proposed budget for 1952-53 carries on the same level of program as approved in 1950-51 and again in 1951-52.

1	DIVISION OF HOUSING						
2	Analysis						
3							
4	The work of this division includes the administration and enforcement of laws relating to hotels, apartment houses, dwellings, auto						
5	courts, resorts, motels and labor and trailer camps. The division disseminates information regarding housing and construction to						
6	owners, architects, builders, and the general public.						
7	The division also investigates reports of substandard housing conditions throughout the State.						
8	No work load or program changes over the year 1951-52 are reflected in this budget.						
9

51							
52	DIVISION OF LABOR STATISTICS AND RESEARCH						
53	Analysis						
54							
55	This division collects and compiles facts and statistics relative to the condition of labor in the State; publishes monthly statistics of						
56	employment, and, in cooperation with the Department of Employment, prepares monthly estimates and forecasts on civilian employ-						
57	ment and unemployment within the State. It works in conjunction with other state agencies and the U. S. Bureau of Labor Sta-						
58	tistics in the collection and presentation of this data. The division makes studies and investigations in the field of industrial relations.						
59	It compiles statistics of industrial accidents for use in accident prevention work; administrative statistics for the Industrial Acci-						
60	dent Commission and performs similar services for other divisions of the department. All new factories are required by law to be						
61	registered with the division.						
62	This budget reflects the addition of one clerk in the industrial injury statistics section due to the necessity of handling an increased						
63	number of industrial injury reports and one clerk is provided in the employment and pay roll statistics section due to an enlarge-						
64	ment of the sample used. The sample has grown because of the increase in number of firms and the requirements of the area labor						
65	statistics program approved last year.

4	Budget Act appropriation -----	\$243,657	\$244,675	\$275,482	
5	Allocations from Salary Increase Fund -----	3,224	18,555	-	
6	Total Available -----	\$246,881	\$263,230	\$275,482	
7	Unexpended balance, estimated savings -----	-7,200	-1,029	-	
8	<b>TOTAL EXPENDITURES FOR SUPPORT</b> -----	\$239,681	\$262,201	\$275,482	\$13,281 (5.1%)
9	<b>GENERAL ANALYSIS</b>				
10	Number of positions -----	44.8	44	47	3
11	Based upon the present level of services, three additional deputy state fire marshal positions are required, based on an estimated 10 percent increase in population by June 30, 1953, thereby causing a work load increase, particularly in the number of schools and public assemblages requiring field inspection and surveys.				
12	<b>SALARIES AND WAGES</b> : The increase of \$12,387 is primarily due to the cost of the three proposed new deputy fire marshal positions.				
13	<b>OPERATING EXPENSES</b> : The \$1,843 increase is accounted for principally by a \$1,200 increase in traveling, and in other items such as office, telephone, and postage because of price and quantity increases due to increase in the staff.				
14	<b>EQUIPMENT</b> : The amount of \$2,780 requested is \$630 for files and \$200 for miscellaneous small items under additional office; \$135 for a typewriter, \$420 for a motion picture projector, and \$200 for three films under replacement office; \$1,025 for an automobile—replacement which will attain 100,000 miles in 1952-53, and \$170 for miscellaneous additional laboratory equipment.				
15	The following is a functional analysis of the agency's expenditures for comparative years:				
16	Private mental hospital inspections -----	\$3,595	\$3,933	\$3,856	—\$77
17	Welfare institution inspections -----	18,935	18,878	17,080	—1,798

## GENERAL ANALYSIS

Number of positions----- 35.1 38 39 1

Provision is made for continuation of the level of service authorized for the 1951-52 Fiscal Year which includes examination of private trust business. Private trust examinations have been delayed due to the inability to fill the new positions originally authorized to June 30, 1952. These positions are extended for another year in this budget.

**SALARIES AND WAGES:** The increase of \$4,386 is due primarily to the anticipation of filling the new positions for trust examinations on a full year basis in 1952-53 as compared to the delay in recruitment for 1951-52.

**OPERATING EXPENSES:** The net increase of \$2,116 is due primarily to price increases and additional traveling expense as related to salaries and wages. These increases are partially offset by a reduction in printing due to certain items not required annually.

**EQUIPMENT:** The amount of \$2,290 represents the cost of replacing worn out furniture and equipment and \$100 for additional books and miscellaneous equipment items.

## GENERAL ANALYSIS

Number of positions ----- 21.8 23.5 24.0 0.5

Provision is made for continuation of the existing level of service. This includes extending two examiner positions to June 30, 1953, which had been authorized in the 1950-51 Fiscal Year, to care for the continued increased work load level.

## WORK LOAD

Number of associations, June 30 ----- 1949 1950 1951 1952  
110 113 114 119<sup>c</sup>  
Number of loans in force, December 31 ----- 108,392 120,265 132,000<sup>c</sup> 143,000<sup>c</sup>

**SALARIES AND WAGES:** The increase of \$6,486 is due to the anticipation of the commissioner position being filled for the entire 1952-53 Fiscal Year, as compared to the vacancy in the current fiscal year.

**OPERATING EXPENSES:** The increase of \$1,272 is due to price increases and \$150 for tile in the Los Angeles office.

**EQUIPMENT:** The amount of \$2,637 provides for replacement of a 1941 Buick with a light automobile, an additional calculator for the examiner staff and replacement of worn out equipment.

## GENERAL ANALYSIS

Number of positions..... 122.7 125.5 127.5 2

Provision is made for continuation of the existing level of service with minor increases due to additional work load and anticipated price rises.

WORK LOAD	1948-49	1949-50	1950-51	Estimated 1951-52	Estimated 1952-53
Licensees .....	1,396	1,495	1,620	1,745	1,877
Applications to issue securities .....	8,634	8,382	8,457	8,500	8,550
Applications for agent certificates .....	3,685	3,864	4,025	4,200	4,400
Escrow orders .....	3,972	4,205	4,093	4,200	4,250

**SALARIES AND WAGES:** The increase of \$7,893 is due primarily to two new positions which are proposed for the increased work load tabulated above and \$1,050 additional temporary help for destruction of old records.

**OPERATING EXPENSES:** The increase of \$2,930 is due to increased work load and price increases.

**EQUIPMENT:** The amount of \$8,397 provides for replacement of worn out furniture and equipment over 20 years old, one 1946 automobile, additional Kardex files for expansion of licensee index and furniture for new positions.

## GENERAL ANALYSIS

19					
20					
21					
22	Number of positions -----	182.3	184.5	189.5	5
23					
24					
25	Provision is made for continuation of the existing level of service. Increases result from additional work load caused by the continuing growth of the insurance business in California.				
26	The principal increases are due to two proposed new clerical positions to handle increased work load in the License Division and three new positions in the Compliance and Legal Division to handle increases in policy form analysis work and processing of disputed policy claims. Allowance is made for estimated increases in operating expenses due to price increases and additional work load.				
27	Additional temporary help, operating expenses and equipment is provided for changing the filing system in the License Division.				
28

## ADMINISTRATION DIVISION

## Analysis

This division handles the general administrative and staff functions of the department, including the direction of branch offices, actuarial work, and fiscal, personnel and office management services.

**OPERATING EXPENSES:** Increases are due to price changes. A decrease in total operating expenses results from estimated completion, prior to 1952-53, of contractual attorney services in connection with litigation.

**EQUIPMENT:** Major items are four file cabinets \$552 for expansion; one check endorser \$315 to permit handling increased volume of remittances with present cashiering employees; and \$330 is requested to provide additional transfer cases needed for storage purposes. Provision is also made for replacement of worn out equipment at a cost of \$780.

## RATE REGULATION DIVISION

## Analysis

This division enforces the fire and casualty rate regulation laws to the end that such rates shall not be excessive, inadequate, or unfairly discriminatory. It examines rating and other organizations and insurers for compliance with rating laws, analyzes rating plans, systems and formulas, reviews complaints regarding rates and rating plans. Technical assistance is provided in connection with approval of minimum workmen's compensation insurance rates. It reviews and approves workmen's compensation insurance policy forms and endorsements.

**OPERATING EXPENSES:** The increase of \$3,073 is due to anticipated increase in out-of-state travel on rate regulation activities and price increases.

**EQUIPMENT:** The major items are replacement of an old calculator \$714, two file cabinets \$262 for normal file expansion, and \$300 for technical books and statistical volumes.

<sup>a</sup> One intermediate clerk, one intermediate office appliance operator, and one supervising addressing machine operator transferred from License Division July 1, 1951.

43							
44	COMPLIANCE AND LEGAL DIVISION						
45							
46	Analysis						
47							
48	This division is responsible for the legal work of the department, including legal compliance of companies, investigations and disciplinary proceedings. It renders legal advice to other divisions; makes legal preparations for hearings; acts for the department in hearings; grants authority to companies to do business in California; reviews and approves certain types of policy forms; makes investigations of licensees and license applicants to assure compliance with the law; analyzes and adjusts disputed policy claims.						
49							
50							
51							
52	SALARIES AND WAGES: The principal increase is due to three additional positions needed to meet work load increases. One junior counsel is requested to assist in examining and approving insurance policy forms because of new legislation on minimum benefits and standard policy provisions. An additional insurance claim investigator is requested to provide adequate staff for the Los Angeles office to check on complaints from the public regarding settlement of insurance claims. An intermediate stenographer-clerk is also proposed to handle increased stenographic work load in the Los Angeles office in connection with policy claim complaints and investigation work.						
53							
54							
55							
56							
57							
58							
59	EQUIPMENT: The amount of \$2,720 provides for replacement of worn out equipment and additional items for the new positions.						
60

21	LICENSE DIVISION						
22	Analysis						
23	This division gives examinations and issues licenses to insurance production agencies (life agents, insurance agents, brokers, solicitors, bail agents, bail permittees). It prepares training manuals, approves training courses, and compiles written tests for license applicants. License records are maintained and all changes in license status are processed in this division.						
24	SALARIES AND WAGES: The principal increase is due to two additional clerical positions required for increased work load. Continued growth in the number of active licensees makes it necessary to divide the license history file and processing work into six units in place of five units, requiring two additional employees. \$2,940 additional temporary help is provided to convert the present filing system to a more integrated system.						
25	EQUIPMENT: The major items are \$1,512 for history card file units, desks, chairs, and typewriters for the two new positions; \$539 for replacement of typewriters and chairs with more than 13 years use and \$495 for transfer cases and files needed for storage purposes; \$2,710 is provided for changing the filing system.

17	DIVISION .....				\$269,188	\$291,951	\$292,618
18	CONSERVATION AND LIQUIDATION DIVISION						
19	Analysis						
20	This division takes possession of the assets and records of insolvent companies as directed by the commissioner or by court order and						
21	administers the affairs of the companies until they have become financially sound or until their assets have been liquidated and						
22	distributed to creditors. The cost of operating this division is recovered from the assets of the companies being administered to the						
23	extent that such assets are available. The scale of operation of this division varies widely and is unpredictable.						
24	Because of the taking over of new companies, it was necessary to continue indefinitely two of the four positions previously expected to						
25	be eliminated during 1950-51. This change has not increased net costs to the department, since the salaries have been fully covered						
26	by reimbursements and are expected to continue to be so covered during 1952-53. On the basis of past experience, total reimburse-						
27	ments are estimated in excess of 90 percent of expenditures during 1952-53.

## DEPARTMENT OF JUSTICE

Under the direction of the Attorney General, the chief law officer of the State, the Department of Justice operates the state teletype system, compiles statistics pertaining to crime, interprets laws and renders opinions, represents the State and its officers in civil litigation and on appeal from trial courts in criminal cases, maintains central fingerprint and modus operandi files, assists peace officers in both criminal and civil investigations and enforces the State Narcotic Act.

Headquarters Office at Sacramento

The General Fund finances the major portion of the activities of this department.

The Motor Vehicle Fund finances a portion of the expenditures for the teletype system.

GENERAL ANALYSIS

Number of positions ----- 433.4 496.9 537.1 40.2

The principal proposed changes from the program of the current year are the augmentation of the staff of the Bureau of Narcotic Enforcement and the compilation and statistical analysis of the disposition of criminal cases heard in the superior courts.

The other activities of the department have been projected on the basis of work load and anticipated economic conditions.

<sup>a</sup> Expenditures for the above projects are reflected in the budget of the Division of State Lands and have been excluded from the totals of the budget of the Department Justice. The amounts to be expended through the Department of Justice for legal services during the 1952-53 Fiscal Year has not been determined.

## DEPARTMENT OF JUSTICE—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	DIVISION OF GENERAL ADMINISTRATION						
2	Analysis						
3	Includes the Office of the Attorney General; the accounting and personnel sections, the stenographic pool, and other service functions;						
4	and the teletype section.						
5	The only change in program is the inclusion of positions for the Sacramento and Los Angeles teletype control centers to permit an increase						
6	in the hours of operation from 16 to 24 hours per day, the continuous operation being necessitated by increasing traffic volume.						
7	Other positions proposed are one accounting officer II to relieve the administrative assistant to the Attorney General of the more routine						
8	duties so that his time may be available for business management problems and improvement of present procedures and practices;						
9	four stenographers to maintain the ratio of professional to stenographic positions at the accepted level of three to two; one teletype						
10	operator for Los Angeles where message volume warrants an additional position; an intermediate clerk in Los Angeles to care for						
11	supplies, mail, mimeographing and similar duties; and an intermediate typist-clerk for the personnel section necessitated by the						
12	number of positions and transactions.

22							
23	<b>Bureau of Criminal Statistics</b>						
24							
25	<b>Analysis</b>						
26							
27	Compiles and analyzes data relative to correctional institution population, parolees, crimes, arrests, and disposition of cases by superior courts.						
28	All new positions proposed are related to beginning the gathering and analysis of the disposition of cases heard by the superior court.						
29	This activity was part of the program contemplated at the time the statistical work related to crime was consolidated and placed under the Department of Justice. However, this portion of the original program has not yet been undertaken.						
30	It is believed that accurate data on the results of prosecution are an essential supplement to information on crimes and arrests and that by so rounding out the basic criminal statistics program a valuable aid in planning will be available to the Legislature and executive officers of the State.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1950-51	ESTIMATED 1951-52	PROPOSED 1952-53
		50-51 (Filled)	51-52 (Auth.)	52-53 (Auth.)			
1	<b>DIVISION OF CRIMINAL LAW AND</b>						
2	<b>ENFORCEMENT—Continued</b>						
3							
4	<b>Bureau of Criminal Identification and Investigation</b>						
5							
6	<b>Analysis</b>						
7							
8	Maintains central files of fingerprints, modus operandi, crime records of felons, registrations of sex offenders, and furnishes informa-						
9	tion contained in such files to law enforcement agencies; provides expert, technical assistance to local law enforcement agencies						
10	through the staff of investigators and criminologists; and renders assistance to local law enforcement agencies in the specialized						
11	fields of questioned document examinations and polygraph (lie detector) operation.						
12	<b>Fingerprint Section:</b>						
13	No new positions are proposed for the 1952-53 fiscal year but provision has been made for the continuation of positions added dur-						
14	ing the current fiscal year to process fingerprints submitted by the Department of Education and the Office of Civil Defense.						
15	<b>Special Services Section (modus operandi):</b>						
16	Based upon the 1950-51 fiscal year rate of production it is estimated that authorized staff will be able to render the same level of						
17	service as in the past. No new positions are recommended.						
18	<b>Record Section:</b>						
19	Ten new positions are proposed to meet the increased work anticipated; six are for estimated additional name searches and four						
20	are to replace four positions now borrowed from the Fingerprint Section.						
21	The increase in operating expenses is due solely to the greater volume of work anticipated and to forecast price levels with exception						
22	of \$1,960 included for microfilming necessary but infrequently used material to conserve files and space.						
23	The more important items of equipment not directly related to personnel or work load are an additional polygraph (lie detector) neces-						
24	sitated by the number of requests for this service which cannot now be satisfied; a P.H. meter for the accurate determination of						
25	acidity or alkalinity required in many analyses and tests which the laboratory is called upon to make; and a stereoscopic micro-						
26	scope to replace an obsolete model.

3							
4	Bureau of Narcotic Enforcement						
5							
6	Analysis						
7							
8	Enforces the provisions of the State Narcotic Act relative to use, sale, possession, or transportation of narcotics and harmful drugs.						
9	Six new positions, five investigators and one clerk, are proposed to augment the Fresno office and to establish a new office at San Diego.						
10	Four positions are also included to form two training teams to instruct local police officers in this specialized field of law enforcement.						
11	Indications of increased narcotic traffic warrants the additional enforcement strength.						
12	Increases in operating expenses and equipment are attributable to the added staff.						
13

## GENERAL ANALYSIS

The Department of Mental Hygiene's 1952-53 Fiscal Year budget for support operations provides a program for improved level of care in the mental hospitals and mental defective homes, and includes the opening of receiving and treatment buildings at Napa and Stockton, improvement in the social service program, an alcoholic research project at Agnews, an expanded sex psychopathic program at Mendocino, new diagnostic and pre-admission service units at Pacific Colony and Sonoma, and two major studies consisting of research into sex crimes and an outpatient clinic survey.

## DEPARTMENTAL ADMINISTRATION, LANGLEY PORTER CLINIC, OUTPATIENT CLINICS, AND ATASCADERO STATE HOSPITAL

The analysis and expenditures for these agencies will be found under their respective budgets.

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT

In this group are included the following:

- Seven state hospitals for the care of mental patients: Agnews, Camarillo, Mendocino, Napa, Norwalk, Patton, and Stockton.
- Two institutions for the care of mentally defective patients: Pacific Colony, and Sonoma State Home.
- Two hospitals for the care of both the mentally ill and mentally defective patients: DeWitt and Modesto.

These hospitals and homes provide hospitalization for the mentally ill, mentally defective, alcoholics, narcotic addicts, sexual psychopaths, and defective and psychopathic delinquents, with the emphasis being on treatment centers rather than merely custodial institutions.

Average population -----	38,399	38,943	39,068	125
				(0.3%)
Average per capita costs -----	\$916	\$1,069	\$1,135	\$66
				(6.3%)

In general, the total increase of \$2,734,450 (6.6 percent) over 1951-52 is the result of the following factors:

- (a) Standards of allowance for proposed additional positions:
  1. Population, and work load changes.
  2. Staff for the new receiving and treatment buildings at Napa and Stockton.
  3. Program changes for increased level of service, primarily in treatment through additional physician, nursing, therapist psychologist, social worker, technician, and culinary personnel.
  4. New team units for alcoholic research at Agnews, expanded sex psychopath unit at Mendocino, new diagnostic and pre-admission service units at Pacific Colony and Sonoma.
- (b) Price changes.
- (c) Increased allotments for patients' medical and drug supplies, therapy supplies, and family care leave allowances.
- (d) Need for replacement equipment and acquisition of additional equipment.

<sup>a</sup> Both mentally ill and mentally defective patients cared for in these hospitals.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

The following proposals are common to all institution budgets and are, therefore, discussed in groups rather than individually under each institution.

**SALARIES AND WAGES:** The increase of \$2,545,867 provides for the following 974.3 new positions at a cost of \$2,560,873:

**Psychiatric Technician and Nursing Personnel**

435 Psychiatric technicians (formerly hospital attendant) ..... \$667,000

The psychiatric technician (nursing) personnel plan provides additional positions to staff 87 percent of the standard complement on a ward assignment basis and includes:

(a) 282 to staff the new receiving and treatment building at Napa at 87 percent of the nursing requirement at a cost of \$493,200. Of the total positions, 141 are to be established August 1, 1952, as a nucleus staff to open the building; 70 additional on November 1, 1952, and 71 on February 1, 1953.

(b) 101 to staff the new receiving and treatment building at Stockton at 87 percent of the nursing requirement at a cost of \$95,800. Of the total positions, 50 are to be established December 1, 1952, as a nucleus staff to open the building, 26 additional on March 1, 1953, and 25 on June 1, 1953.

(c) 52 to increase ward coverage at Modesto to approximately 84 percent of its requirements by establishing 13 positions each quarter at a total cost of \$78,000. This increment provides a department average of 87 percent of nursing requirements.

Senior psychiatric nurse (replace 85 senior psychiatric technician II) ..... 53,040

Psychiatric nurse (replace 124 graduate nurse) ..... 12,580

Psychiatric nurse (replace 56 psychiatric technician) ..... 39,609

The 85 senior psychiatric nurse positions are to replace 85 senior psychiatric technician II positions to provide one head nurse in charge of each acute ward in all hospitals.

The 124 psychiatric nurse positions are to replace graduate nurses and the 56 psychiatric nurses are to replace psychiatric technicians and will augment the present psychiatric nurse staff and provide one psychiatric nurse in charge during afternoon and night shifts in the wards in the acute areas which include receiving wards, hospital wards, wards for the crippled and infirm, tubercular wards, and nursery wards. The full requirement to staff the wards is 636 psychiatric nurse positions. The 180 provided by reclassification is the estimated number that can be recruited during the 1952-53 Fiscal Year.

**Senior psychiatric technician I**

A new classification of senior psychiatric technician I, is being established in the 1951-52 Fiscal Year to provide supervision of the wards during the afternoon and night shifts. A new entrance classification of psychiatric technician trainee has been established two steps below that of the psychiatric technician (journeyman) level. Post coverage in each hospital with senior psychiatric technician, grade I, requires approximately 1,048 reclassifications. However, it is proposed to finance the full cost of such upward reclassifications as turnover permits by recruiting new employees in the lower classification of psychiatric technician trainees.

**Medical and Dental**

28 Senior physician and surgeon ..... 173,880

Twenty-eight new positions provide for increased level of service from 55 percent to an over-all average of 64 percent of goal, but with higher allowances ranging to 70 percent at certain mental hospitals and to 72 percent at mental defective homes where recruitment experience is more favorable. The department standard or goal will provide some modification after further study to allow some weight for clinical psychologists employed on therapeutic work within the ratio of 1 physician to 200 resident population, and 1 to 100 annual admissions.

20 Senior clinical psychologists ..... 104,640

The senior clinical psychologist standard for the mental hospitals has been modified from 1 to 900 admissions to 1 to 300 admission plus 1 per 1,000 resident patients. The admission load is equivalent to 6 per week per psychologist and allows time for staff conferences and teaching program responsibilities. In order to restudy the resident patients, the ratio makes allowance for four or five patients per week which will cover the entire resident population once over a five-year period. The proposed positions will provide 44 percent of the modified mental hospital requirement. The change of the mental defective standard from 1 to 700 resident population to 1 per 300 resident population will place the mental defective staff at 67 percent of goal.

Supervising dentist (replace six senior dentists) ..... 4,536

To increase the effectiveness of the dental services at the institutions, a supervising dentist will be assigned the additional responsibility of directing and coordinating the staff work and is considered in the authorized work load ratio of one dentist per 1,250 resident patients.

Physician and surgeon III (replace 11 senior physician and surgeons) ..... 8,712

The reorganization of the medical staff provides for a physician and surgeon III to head the physician staff and reduce the number of persons reporting directly to the director of clinical services. The director of clinical services has under him the total medical staff which will report to him through working chiefs of special medical services. In addition he supervises the psychologists, psychiatric social workers, outside consultants, and the nursing service, and is responsible for the general development and carrying out of the hospital treatment program, the medical and nursing training programs, and for medical research.

**Other Professional and Special Groups:**

38 Occupational therapists I ..... 112,560

9 Recreation therapists ..... 31,860

10 Music therapists ..... 35,400

9 Junior librarians ..... 28,944

66 Total ..... \$208,764

The additional 66 positions provide an increase from 25 percent to 43 percent of the department standard of one rehabilitation therapist per 100 patients. Their major function will be the treatment of patients as well as instruction of psychiatric technicians who must all be a part of the rehabilitation program to affect an accelerated rate of leave of absences.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

## Other Professional and Special Groups—Continued

14	Clinical laboratory technicians	\$42,840
	The additional laboratory technicians are required to complete laboratory procedures on all newly admitted patients, including blood counts, urinalysis, serology, and spinal fluid. The Department of Mental Hygiene standard of 9,750 procedures per technician compared with Public Health's recommendation of 8,000 per technician requires approximately 2.5 hours per admission, or one per 750 admissions. A lesser allowance for resident patients or 1.2 hours per year requires one technician per 1,500 patients.	
2	Neuropathology technicians	6,744
	The ratio for clinical laboratory technicians of one per 750 admissions plus one per 1,500 resident population does not allow for special problems such as the studies in relationship to tubercular patients and special problems involved in neuropathology and special studies. One position is provided for the tubercular unit at Patton State Hospital (512 capacity) and one position for the neuropathology unit in Camarillo's new receiving and treatment building (714 capacity).	
14	Chaplain	66,360
	Two new chaplains per institution are proposed for Agnews, DeWitt, Mendocino, Modesto, Norwalk, Patton, and Pacific Colony for religious guidance. Previous budgets provided two chaplains each for Camarillo, Napa, Sonoma, and Stockton as properly trained chaplains are also of material assistance to the psychiatrists to interpret the relationship of psychiatry and religion to the hospital staff and to the community and relatives.	
9	Chief psychiatric social worker	47,088
8	Supervising psychiatric social worker	33,180
39	Senior psychiatric social worker	137,472
	The additional 39 senior psychiatric social worker positions will increase the social worker staff from 32 percent to 61 percent of the department goal of one social worker per 100 annual admissions. This will provide a social worker for each 149 admissions. It is the intra-mural social workers' responsibility to get information from relatives for medical use to help patients solve family problems while in the hospital and work closely with the doctors to survey institutional population for possible placement material. Many of the patients' relatives visit the hospital which provides an opportunity to work out plans for the patient's reception at home. This group of personnel will materially assist the department to discharge as rapidly as possible newly admitted patients and reduce to the greatest possible degree so-called continued treatment cases who have been long term guests.	
	The eight supervising social workers will provide supervision on the basis of six case workers per supervisor. The nine chief psychiatric social workers are necessary to head the social service department at each hospital to direct and coordinate the staff work under the direction of the director of clinical services.	
3	Food administrator I	11,700
	Three food administrator I positions are provided for Agnews, Napa, and Norwalk to provide assistance to and relief for the food administrator II, who has over-all responsibility for the daily food program. The department has been staffed with a food administrator II position at each hospital and an additional position of food administrator I at five of the other eleven institutions. Such positions are required where there are unit hospitals or a considerable number of special diets in the institution as a whole.	
11	Dining room supervisor	33,660
	Eleven dining room supervisor positions under the food administrators will facilitate making the best distribution of food and use of personnel and equipment. They will also bring about (a) uniform standard food service in all dining rooms throughout an institution and integrate food service functions between the food preparation kitchens and the ward dining rooms, (b) train and supervise all dining room personnel, both employees and patients, and (c) be responsible for the materials, supplies, and equipment in all dining rooms.	
6	Diet cooks	18,360
	Six diet cooks are required to provide for the preparation and portioning of special diets in the receiving and treatment buildings at Napa and Stockton. The positions permit coverage on two shifts and relief for seven-day operation. This is comparable to the coverage previously provided for in the Camarillo receiving and treatment building.	
29	Supervising cook I	97,788
	A supervising cook I position should be provided on each shift where there is more than one cook on duty to supervise the preparation and distribution of food and assure standard quality production. These supervisors do actual cooking and have the additional responsibility of organizing and directing the necessary work, and integrating the number and personalities of cooks in overlapping shifts and the facilities for the regular preparation of nutritionally adequate and acceptable meals. The possibilities of provision of better meals within the present food allowances rest in the capabilities and capacities of the food administrators and supervising cooks.	
25	Cooks	76,500
42	Assistant cooks, effective January 1, 1953	52,920
	The allowance of 29 supervising cooks, 25 cooks, and 42 assistant cooks will provide sufficient additional paid cooking personnel to enable the civil service personnel to perform the actual cooking without patient help. The use of assistant cooks as an entry level should alleviate the recruitment problem and be used to assist the cook in food preparation and dispensing for distribution to the wards.	
11	Vegetable room charge	26,400
	These positions will place an employee in charge in the vegetable room at each hospital. With patient help the average institution prepares daily 16 to 20 sacks of potatoes, 1,300 pounds of leaf cooked vegetables, 2,200 pounds of root vegetables, a vegetable salad, plus miscellaneous vegetables for garnishes and soup stocks.	
14	Meat cutter	42,840
3	Butcher	10,116
	The 17 additional positions will provide proper staff for meat cutting and slaughtering with necessary relief positions for five days per week operation.	
15	Baker	45,900
	The 15 baker positions provide staff to operate the bakery daily in lieu of a five-day week.	

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

## Other Professional and Special Groups—Continued

11	Educational interne	\$25,080
12	One position for each hospital is provided to attract graduate students who are candidates for an M.S. degree in hospital administration, occupational therapy with specialization in psychiatry, and candidates for Ph.D. in clinical psychology, into the mental hospital program. From the recruitment efforts in the professional fields, it has been learned that an important long run solution to the problem of continuing vacancies in state hospitals is to attract students into the program, so they may become familiar with the opportunities before going into other kinds of work.	
6	Executive housekeeper (replacing 6 supervising housekeeper)	7,560
5	Executive housekeeper	19,500
14	To establish institution-wide linen control, maintenance of linen complements and replacement thereof, supervision of mending room, and full charge of all housekeeping and janitorial services. This will provide the service at these institutions presently without the staff to perform this important function.	
1	Assistant laundry supervisor	3,060
4	Laundryman	10,560
9	Laundry helpers	20,520
14	Total	\$34,140

The laundry personnel adjustments reflect necessary modifications to the present staff to adjust to the survey recommendations prepared by management engineering firm of Stevenson, Jordan, and Harrison, Inc., and provides 14 new and abolishment of five authorized positions or a net change of nine positions.

1	Automotive equipment operator	2,916
26	This position is required to establish a central pool of all automotive equipment and operators under the general control of the business manager and to have the one automotive equipment operator act as dispatcher in addition to the regular driver duties at the Camarillo State Hospital.	

17	Watchman	42,840
31	Watchman positions are required to provide two shift coverage at those institutions not presently staffed to this extent. This will provide patrol of the grounds during the evening and night shifts to protect and guard state property, report emergencies such as fires, theft, service breaks, and also patient escapes.	

## Alcoholic Research Project—Agnew

1	Senior physician and surgeon	7,728
1	Senior clinical psychologist	3,540
1	Senior psychiatric social worker	4,296

\$18,936

This is a program for the treatment of alcoholism which has been advanced within the past year in the use of new drugs such as ACE, ACTH, and also cortisone to evaluate the effectiveness of these substances. Results of this type of treatment will then be compared with the treatment programs that use conditional reflex and another that uses the drug, antabuse.

## Sex Psychopath Unit—Mendocino: (two additional positions; one senior clinical psychologist, one psychiatric resident)

8,608

Under the Sections 5500 to 5518 of the Welfare and Institutions Code, it is necessary for the courts to send patients to the Department of Mental Hygiene for 90 days observation, treatment and study before they can be given an indeterminate commitment to a state hospital as sex psychopaths. Units consisting of a psychiatrist, senior physician, occupational therapists, senior psychiatric social worker and two stenographer-clerks have been authorized at Mendocino and Norwalk. The Mendocino unit has experienced difficulty in recruitment and has had to reassign other staff to perform the service. Full time services of a senior clinical psychologist is necessary for the purpose of making more thorough routine testing to assist in group therapy and in compiling results for study and research. Repeat psychological testing in which the performances after treatment can be compared with that upon entering the institution assists in determining the advisability of returning the patient to society. The psychiatric resident position will permit more individual treatment to the patients committed as sex psychopaths. It would also extend the opportunity of teaching and training younger doctors for possible expansion of this program throughout California.

## Diagnostic and Preadmission Service Units—Pacific Colony and Sonoma State Home: (10 positions)

48,312

A total of 10 positions which include psychiatrists, psychologists, social workers and stenographer-clerks at a cost of \$48,312 are provided to adequately operate a diagnostic and preadmission service. The diagnosis of mental retardation is not in itself an adequate reason for institutional care. Low intellectual functioning combined with severe medical or social factors is basic for admission. Any functional factor alone cannot be justified for admission because of the gross overcrowding and the number of urgent applications received.

This service will be operated as an all purpose clinic offering three types of service in consultation, diagnosis, and treatment of children, adolescents, and adults having a problem of the mentally retarded which can never be solved by institutionalization. In some instances the problem can be entirely worked out on merely an outpatient basis.

## Clerical Personnel

11	Intermediate stenographer-clerk	29,040
76	One intermediate stenographer-clerk is provided for each of the 11 assistant superintendents in lieu of part-time services from the superintendents' stenographer. The heavy secretarial work and correspondence of these two positions require a secretary for each position.	
9	Intermediate stenographer-clerk	23,760
80	One intermediate stenographer is provided for the Director of Clinical Services at each of the institutions except DeWitt and Modesto. A review of his work reveals that except at DeWitt and Modesto which have more stationary populations, he is forced to spend many unnecessary hours each week on paper work for lack of a trained stenographer to help organize papers and complete the more routine portions of the form.	

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

## Clerical Personnel—Continued

7 Intermediate typist-clerk	\$17,640
A clerical position is required for the superintendent of nurses at Agnews, Camarillo, Mendocino, Napa, Norwalk, Patton, and Stockton. At present significant time is spent typing reports and keeping necessary records which a clerk under her direct control could do as well. As a result the superintendent of nurses' operations are handicapped by not having a clerk to also take and screen telephone calls, and weekly overtime occurs.	
6 Intermediate typist-clerk	15,120
A close review of clinical operations of the therapy programs at Camarillo where such programs are well established reveals that a clerk is urgently needed to help handle record keeping and correspondence now being done haphazardly by therapists. Moreover, the therapy programs' contacts with volunteer groups were slowed because clerical assistance was not available when needed. By 1952-53 the therapy programs of institutions with 10 or more such budgeted positions will have progressed to the point where direct clerical help will be needed.	
33 Intermediate typist-clerk	87,120
These positions are required for the clerical pool for work load increase to continue the ratio of one for each of three users of the pool.	
3 Intermediate typist-clerk	7,560
A typist-clerk is required for the X-ray department of Camarillo, Napa, and Stockton, where receiving and treatment buildings are being activated with more intensive medical programs. Provision of such clerical assistance will release time of a higher paid technician to do the technical work for which he is employed.	
1 Intermediate clerk	2,520
One additional clerk is required for work load increase in the personnel and pay roll section at Napa due to the expanded staff in 1952-53.	
46.3 Miscellaneous new positions	147,592
The miscellaneous positions are individually explained after each hospital's analysis.	

## Salary Savings

The increase in salary savings overall offsets the cost of merit salary adjustments for positions now authorized and partially offsets the cost of new positions.

OPERATING EXPENSES: An increase of \$133,231 is explained within the analysis of each hospital. Explanation of the program changes common to all hospitals follows:

## Oleomargarine Substitution for Butter

A reduction in food ration costs has been included in 1952-53, effective January 1, 1952, through the substitution of colored oleomargarine for butter. A saving of \$176,749 is estimated for six months in 1951-52 and \$358,157 for 12 months in 1952-53, or an increased saving in 1952-53 of \$181,408.

## Medical Supply Allowance Increase 132,632

The medical drug and hospital supply per capita allowance has been increased from \$10 to \$12.50 for the mentally ill patients and to \$17.50 for the mentally defective patients at a cost of \$132,632. For the past several years the medical program has been improving, not only with respect to newly admitted patients, but also including continued treatment cases. This improvement requires a more intensive use of various drugs.

## Rehabilitation Therapy Supply Increase 85,949

The department has established a very active rehabilitation therapy program in the institutions and with such an increase it is necessary for the therapists to have a minimum amount of operating expense funds for both group activity as well as ward activity. Previous allowances have averaged approximately \$2 per patient annually. The 1952-53 budget provision averages \$3.75 per patient for recreational, occupational and music supplies, library books, movies, etc., plus \$1.25 for approximately 11,085 patients for recreational food on wards where the expenditure will be most effective, or an overall per capita average of approximately \$4.20.

## Travel Expense Increase for Superintendents 5,060

Each of the 11 institutions' travel allotments has been increased \$460 to permit the superintendent to be in Sacramento for a six-week period for training in administration and orientation in the policies of the department, both medical and administrative. Each superintendent will be assigned specific short term studies in other hospitals in the California mental hospital system in order that they may enlarge their own program and evaluate it on the basis of a study of their observations of other hospitals.

## Family Care Leave Allowance Increase 4,946

An increase in leave allowances is provided for patients on family care to cover incidental expenses such as haircuts, tooth paste, cosmetics, and other items of this nature. Approximately 22 percent of the cases received incidental expense money from private sources and it is the remaining 78 percent of the 440 cases that require an increase from approximately \$3 per month to \$4.20.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

General Population, Price and Other Work Load Changes----- \$86,052

EQUIPMENT: Equipment items totaling \$1,223,268 are explained within the analysis of each hospital and represent replacement equipment of \$602,877 or 5.1 percent of investment, and additional equipment of \$620,391, a total increase of \$51,540 over 1951-52. The additional equipment requests in the several institutions include additional office equipment for new positions; additional feeding equipment for greater population and to improve conditions where there is insufficient equipment to meet existing needs; additional medical equipment to improve the level of medical care and treatment of patients and to make possible better application of modern techniques and treatment methods; additional maintenance equipment to provide improved and more maintenance work in many buildings and facilities, and certain farming equipment necessary in the operation of the institutional farms.

Television sets are included for use in the wards and are proposed to be financed for the first time from the General Fund. Sets now on hand have been purchased from patients' benefit funds or have been donated. The potential scope of this program might eventually be a set for each ward of 100 patients. Initial costs are approximately \$250 per set plus maintenance costs of approximately \$35 per set annually.

Standards for electric floor polishers have been developed by the Department of Mental Hygiene on a shared assignment basis between wards and other buildings based upon size and location.

Electric food carts are included for Agnews, Norwalk, and Pacific Colony. The food carts for Agnews are to be used on wards to be served on a cafeteria basis over a period of approximately one hour. In using heated carts for hot sections in the cafeteria counter it is less expensive and more efficient than building a whole standard cafeteria counter. Norwalk requires food carts in two of the infirm wards where the serving time is approximately 40 minutes as so many of the patients have to be spoon fed. The carts can be taken direct to the bedside of the patients, and provide more efficient serving of the patients. Pacific Colony requires food carts for the nursery wards where meals present special problems and meal duration is approximately 1½ hours. Food carts are also required in the hospital building for the special cases being treated and the food must be held at times for long duration. In the general medical wards the food carts are taken to the patients' bedsides and served directly to the patients' trays. At present food carts in use are giving a variety of food for 80 to 90 patients per cart. Stock pots do not keep foods hot in such items as meat loaf, vegetables, baked fish, hash, steamed potatoes, baked potatoes, etc.

REIMBURSEMENTS: A total of \$989,030 is estimated for 1952-53, a decrease of \$3,812. Elimination of commissary sales in January, 1952, accounts for a reduction of \$53,568 in 1952-53, which is offset by increased meal sales to employees amounting to \$83,028. Surplus products sales are estimated \$33,500 less in 1952-53, primarily due to reduction of dairy herd to the institutional requirements at Norwalk and Stockton in 1951-52.

## DEPARTMENT OF MENTAL HYGIENE—Continued

Under the administration function, the department carries on the activities of general direction of the hospitals, homes, clinics, and special programs; fiscal accounting and budget control, collection activities, deportations and transfers, guardianships, statistics, personnel services, food administration, nursing service, veterinary service, maintenance service, community services, and private institution inspections.

4	Number of positions—Administration-----	111.2	123.1	139.8	16.7
5	Number of positions—Extramural Care-----	113.6	130.8	161.3	30.5
6					
7	Totals -----	224.8	253.9	301.1	47.2
8					
9	Programs to be developed in 1952-53 will include a training program for the personnel in Food Service in the institutions, expansion of guardianship activities, additional financing to carry on research into sex crimes in conjunction with the University of California at the Langley Porter Clinic, and a survey to evaluate the effectiveness of the outpatient clinics and community services program. Additional services to be provided include a sanitation contract with the Department of Public Health, and comprehensive liability insurance including malpractice for the protection of officers and employees.				
10	Under the extramural care function, the field supervision of patients on leave of absence, industrial leave, and family care cases are carried on. This program is being expanded in 1952-53 to permit an improvement in level of service by lowering the field workers case load from 92.5 to 76, which is 79 percent of the proposed goal of 60 active cases per worker.

## ADMINISTRATION

## Analysis

**SALARIES AND WAGES:** The increase of \$64,136 is primarily due to the 13 new positions which cost \$43,248, plus the full year cost of the expanded staff for centralization of patients' accounts as contrasted to partial year costs in 1951-52, which is estimated to go into effect approximately March 1, 1952. Positions are being abolished in the institutions for patients' board account work in excess of the number of new positions added to the headquarters staff for the activity.

- 1 Senior account clerk is required to supervise, assign work, and assist the clerks in the numerous details of scheduling claims of the department and relieve the Bookkeeper II of direct supervision in maintaining detailed records.
- 1 Intermediate typist-clerk to take over the present overload of one typist now assigned to type all claim schedules, remittance advices, revolving fund checks, and typing required by the senior account clerk and intermediate account clerks.
- 1 Intermediate typist-clerk is required for the central office accounting section to furnish typing service to three accountants, namely, the accounting officer III, semisenior accountant, and the supervising account clerk.
- 1 Intermediate clerk for the increased work load in the personnel section attributable to the expanded staff in the institutions provided in the 1952-53 Budget.
- 1 Associate statistician is required to provide more effective statistical assistance to the Langley Porter Clinic and the state hospitals in their expanding research programs. This person will serve as a statistical consultant to the professional staff at the institutions in the development of research plans and the analysis and statistical interpretation of the data whenever such assistance would facilitate the research or increase the reliability of the results. The statistical staff is unable to take care of all the special study requests now presented.
- 1 Tabulating machine operator is required in the operation of I. B. M. equipment to eliminate the bottleneck in the bureau's punched card unit and assist the associate statistician and other bureau personnel in the collection and compilation of research data for the institutions.
- 1 Senior clerk is provided to assist the associate statistician in the statistical calculations and the processing of statistical reports from the institutions.
- 1 Instructor in cooking is proposed to establish a training program for food service personnel in the institutions in new accepted methods for large quantity cooking; in elementary knowledge of nutrition; in simple food chemistry; in efficient kitchen management; in menu making and evaluation; in efficient operation of new equipment; in developing standardized recipes in accordance with the food control; in food testing; in developing techniques to evaluate patients' acceptance of foods; and in sanitation.
- 1 Educational interne position to provide upper graduate students opportunity for laboratory work toward their master or doctorate degree in nutritional studies, surveys on feeding requirements, and other studies selected by the department.
- 1 Area agent is required to conduct investigations for the guardianship section in connection with patients' property, and negotiations for settlements of law suits and claims of various nature as covered by Section 6660.5 of the Welfare and Institutions Code.
- 1 Assistant counsel is needed in the guardianship section to take care of increasing work load. This section also takes care of all lawsuits filed against patients. The guardianship section also handles the affidavits for withdrawal of funds under Section 6661, Welfare and Institutions Code, storage of patients' property under Section 6660.5, and estate matters where patients are heirs or entitled to distribution under wills.
- 1 Intermediate stenographer-clerk is required to provide clerical services for the new assistant counsel.
- 1 Assistant superintendent of nursing services (psychiatric technician) is proposed to represent the psychiatric technician group of the department headquarters nursing staff for the following purposes: To assist with the evaluation of the hospital nursing programs, to interpret to the psychiatric technician group the aims and policies of the department, to act as liaison between the psychiatric technicians and nurses, to represent the technician group in assisting in the planning of in-service programs for psychiatric technicians, and to cooperate with the department in the recruitment of trainees and implement the total nursing program.

**OPERATING EXPENSES:** The increase of \$20,069 is accounted for as follows: Additional travel costs for new positions, \$5,200; additional printing, postage and supplies for the centralized patient accounts expanded staff, \$3,200; additional rental cost, \$4,600; additional statistical equipment rental, \$2,520; the balance is primarily due to price factors.

**EQUIPMENT:** The amount of \$33,221 represents \$2,967 for replacement equipment and \$30,254 for additional equipment. Among the more significant items of additional equipment are audio-visual equipment including training film, office equipment for new positions, and additional dictating equipment.
